Estes, 2022-07-30 Is it possible at present to identify a core cluster of theoretical ideas concepts and methods with which everyone working in the area of learning and cognition needs to be familiar Would it be possible to make explicit the relationships that we feel do or must exist among the various subspecialties ranging from conditioning through perceptual learning and memory to psycholinguistics and to present these in a sufficiently organized way to help specialists and non specialists alike in relating particular lines of research to the broader spectrum of activity These questions were posed to a substantial number of investigators who were most active in developing the ideas and doing the research in the early 1970s Originally published between 1975 and 1978 their response constitutes this 6 volume Handbook of Learning and Cognitive Processes The volumes survey the research and theory on learning and cognitive processes that were rapidly developing at the time The primary orientation was to concentrate on research and models aimed toward the development of general cognitive theory They were up to date with regard to theoretical and technical developments and sufficiently self contained to be readable by anyone with a reasonable scientific background regardless of their acquaintance with the technical jargon of particular specialties Previously out of print the Handbook is now available again as a set or as individual volumes *DHHS Publication No. (ADM).*, 1975 *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office, 1972 *Moral Dilemmas and Ethical Reasoning* Carol Harding, 2017-07-05 This book deals with moral dilemmas and the development of ethical reasoning in two senses First the editor focuses on dilemmas both real and hypothetical which require moral judgments The Heinz dilemma part of Kohlberg's scoring system for level of moral development is in some cases used as a point of departure for discussion Problems with this particular dilemma as a scoring item are examined in detail along with problems generated by similar dilemmas for moral reasoning in everyday life Those who study moral reasoning and its development are in somewhat of a dilemma as they attempt to integrate information from the domains of philosophy and psychology These

essays investigate domain issues in varied cultural settings and across genders and age ranges for what have been proposed as universals in moral judgment as well as formulate theories that reflect both empirical evidence and logical process. The essays share a conception of human nature as inherently social as well as a healthy respect for the problems or dilemmas which human sociality carries in its wake. Some of these problems are theoretical such as those having to do with the moral reasoning or the classic issues of values justification. Other problems are practical such as those having to do with distributive justice or methods of moral education. This volume will shed light on the process of resolving dilemmas both within philosophy and psychology.

Moral Dilemmas Carol Gibb Harding, 1985-01-01. Dilemmas are often thought to be unresolvable situations typically having equally abhorrant alternatives. In everyday affairs however one must not only face moral dilemmas but live through them by making moral choices. This book is a study of dilemmas, choices and the process of reasoning that goes into both. Contents: Carol Harding, *The Psychological Reality of Moral Dilemmas*; Marvin W. Berkowitz, *Four Perspectives on Moral Argumentation*; Georg Lind, *Growth and Regression in Cognitive Moral Development of Young University Students*; Lawrence Kohlberg, *The Just Community Approach of High School Moral Education*; Larry P. Nucci, *Children's Conceptions of Morality: Societal Convention and Religious Prescription*; Larry May, *The Moral Adequacy of Kohlberg's Moral Development Theory*; Marilyn Friedman, *Abraham, Socrates and Heinz: Where Are the Women?*; Care and Context in Moral Reasoning; Laurence Hunn, *The Emotions and the Development of Moral Awareness*.

The Oxford Handbook of Human Motivation Richard M. Ryan, 2013-12-15. Motivation is that which moves us to action. Human motivation is thus a complex issue as people are moved to action by both their evolved natures and by myriad familial, social and cultural influences. *The Oxford Handbook of Human Motivation* collects the top theorists and researchers of human motivation into a single volume capturing the current state of the art in this fast developing field. The book includes theoretical overviews from some of the best known thinkers in this area including chapters on Social Learning Theory, Control Theory, Self-determination theory, Terror Management theory and the Promotion and Prevention perspective. Topical chapters appear on phenomena such as ego depletion, flow, curiosity, implicit motives and personal interests. A section specifically highlights goal research including chapters on goal regulation, achievement goals, the dynamics of choice, unconscious goals and process versus outcome focus. Still other chapters focus on evolutionary and biological underpinnings of motivation including chapters on cardiovascular dynamics, mood and neuropsychology. Finally, chapters bring motivation down to earth in reviewing its impact within relationships and in applied areas such as psychotherapy, work, education, sport and physical activity. By providing reviews of the most advanced work by the very best scholars in this field, *The Oxford Handbook of Human Motivation* represents an invaluable resource for both researchers and practitioners as well as any student of human nature.
