Teacher Unions, Social Movements and the Politics of Education in Asia John P. Synott, 2017-11-22 This title was first published in 2003 In the globalizing world South Korea is widely regarded as a model example of how a school education system can enhance national economic development Similar claims are made for other Asian NICs such as Taiwan However less understood is how the education system in South Korea became a site of intense conflict as in the decade from 1989-99 a large movement of teachers battled with the government over development related issues such as democratic reforms and human rights in schooling in a struggle that divided this education oriented society and at times plunged the nation's schools into chaos This book analyses the emergence of the National Teachers Union of Korea Chunkyojo and traces its struggle for educational reforms The book examines the South Korean education system within national and global contexts and the historical experiences that have shaped the modern nation such as its Confucianist history its experiences of colonialism and the legacy of the Cold War conflict with North Korea As South Korea searches for pathways for reunification economic growth and the consolidation of democratic civil society important new perspectives on the role of education emerge through this analysis of the teachers social movement This book also presents separate chapters on teacher movements in Taiwan and the Philippines that provide interesting comparisons to the South Korean case while revealing the distinctive political and historical experiences that have shaped education in these societies and the emergence of reformist teacher movements In a valuable appendix the author discusses methodological and theoretical aspects of the research in this book

Women In Korean Politics Chunghee Sarah Soh, 2021-12-24 A study of women in South Korean politics Through life histories elicited by interviews and supplemented by published materials Soh studies 29 women who were elected or appointed to the South Korean legislature She asks who these chosen women are how they attained their positions and what motivated them In doing so she attempts to illuminate the systematic limits to female life in Korean culture

Irrigation And Agricultural Politics In South Korea Robert Wade, 2021-11-28 This book examines how state and local institutions that manage water conveyance and drainage actually function Thus a great deal is revealed about the relationships and power struggles that exist between government and the people and between central and local authorities

Han Unbound John Lie, 1998 Because the author sees South Korean development as contingent on a variety of particular circumstances he ranges widely to include not only the information typically gathered by sociologists and political economists but also insights gained from examining popular tastes and values poetry fiction and ethnography showing how all of these aspects of South Korean life help elucidate his main themes

A

World Divided Eric D. Weitz, 2021-06 A global history of human rights in a world of nations that grant rights to some while denying them to others Once dominated by vast empires the world is now divided into some 200 independent countries that proclaim human rights a transformation that suggests that nations and human rights inevitably develop together But the reality is far more problematic as Eric Weitz shows in this compelling global history of the fate of human rights in a world of nation states Through vivid histories from virtually every continent A World Divided describes how since the eighteenth century nationalists have established states that grant human rights to some people while excluding others setting the stage for many of today's problems from the refugee crisis to right wing nationalism Only the advance of international human rights will move us beyond a world divided between those who have rights and those who don't

The Political Economy of the Small Welfare State in South Korea Jae-jin Yang, 2017-09-28 This book explains why the Korean welfare state is underdeveloped despite successful industrialization democratization a militant labor movement and a centralized meritocracy Unlike most social science books on Korea which tend to focus on its developmental state and rapid economic development this book deals with social welfare issues and politics during the critical junctures in Korea's history industrialization in the 1960-70s the democratization and labor movement in the mid 1980s globalization and the financial crisis in the 1990s and the wind of free welfare in the 2010s It highlights the self-interested activities of Korea's enterprise unionism at variance with those of a more solidaristic industrial unionism in the European welfare states Korean big business the chaebol accommodated the unions call for higher wages and more corporate welfare which removed practical incentives for unions to demand social welfare Korea's single member district electoral rules also induce politicians to sell geographically targeted narrow benefits rather than public welfare for all while presidents are significantly constrained by unpopular tax increase issues Strong economic bureaucrats acting as veto player also lead Korea to a small welfare state

Regional Orders at Century's Dawn Etel

Solingen, 2021-05-11 Etel Solingen provides a comprehensive explanation of foreign policy based on how states throughout the world have confronted the rapid emergence of a global economy and international institutions. A major advance in international relations theory, *Regional Orders at Century's Dawn* skillfully uses a key issue, internationalization, to clarify other recent debates, from the notion of a democratic peace to the relevance of security dilemmas, nationalism, and the impact of international institutions. The author discusses in rich detail the Middle East, Latin America's Southern Cone, and the Korean peninsula, and builds on examples drawn from almost every other region of the world. As Solingen demonstrates, economic liberalization, with its dramatic political and economic consequences, invariably attracts supporters and detractors who join in coalitions to advance their agendas. Each coalition's agenda or grand strategy has consequences at all levels: domestic, regional, and international. At home, coalitions struggle to define the internal allocation and management of resources and to undermine their rivals. Throughout their regional neighborhoods, coalitions opposing internationalization often compete for dominance, sometimes militarily. Coalitions favoring internationalization instead often cooperate. At the global level, each coalition finds support for its grand strategies from different international institutions and from competing global economic trends. Solingen's concept of grand strategy proposes more than a theory of foreign policy and explains the role of nationalism and ethno-religious revivalism in the politics of liberalization.
