Korean Economic Development An Interpretive Model:

Korean Economic Development Paul W Kuznets,1994-01-30 Kuznets focuses on the four key characteristics of South Korean economic development since the mid 1960s relatively high investment rates labor market competition export orientation and a strong interventionist government He uses an informal model to simplify the complex relations that underlie Korea s outstanding growth and also assesses the relevance of the model for other countries The work is designed to be read by non specialists in that no prior knowledge of Korea has been assumed The work concentrates on economic issues and policy choices are of particular interest References are made to English language literature on economic development in general and on Korean development in particular

The Korean Economic System Jae-Seung Shim,Moosung Lee,2016-03-03 Focusing on the formation of the Korean economic system this book presents a fascinating and comprehensive analysis of economic development outside of the traditional neo classical developmental state and dependency perspectives It examines in detail the evolution of institutions that contributed to economic growth and the formation and the workings of the economic system With an emphasis on the interaction between government private institutions Chaebol and financial institutions and the influence of Japan it offers one of the most stimulating and distinctive views of Korean economic development to date It will be of key interest to scholars and researchers of financial growth and development Asian finance and regional and heterodox economics

Arming the Two Koreas Taik-Young Hamm,2012-10-12 North Korea has traditionally been seen as militarily superior to South Korea in the long feud between the two nations This brilliantly argued book taps into a great deal of news interest in North Korea at the moment in the wake of recent hostility against Japan Hamm controversially shows that the received idea

of Korea's military strength is partly a myth created by South Korea to justify a huge programme of rearmament

Education and Training for Development in East Asia David Ashton, Francis Green, Donna James, Johnny Sung, 2005-08-04

The East Asian miracle or its supposed demise is always news. The Four Tiger economies of Hong Kong, Singapore, Taiwan and South Korea have experienced some of the fastest rates of economic growth ever achieved. This book provides the first detailed analysis of the development of education and training systems in Asia and the relationship with the process of economic growth.

Han Unbound John Lie, 1998. Because the author sees South Korean development as contingent on a variety of particular circumstances, he ranges widely to include not only the information typically gathered by sociologists and political economists but also insights gained from examining popular tastes and values, poetry, fiction and ethnography showing how all of these aspects of South Korean life help elucidate his main themes.

Korea and Globalization James B. Lewis, Amadu Sesay, 2013-07-04. Korea faces two challenges in the twenty-first century: unification and globalization. Both entail problems of economic, political and cultural integration. In the past, Koreans successfully unified in various forms and globalized in many ways. This book is a study of the theme of globalization, addressing various aspects of Korea's integration into the global community from a social, scientific or humanistic perspective. This investigation begins with a focus on contemporary South and North Korea, the globalized southern daily life, South Korean labour as a global player, the southern development state and the cultural division that poses the greatest threat to reunification. Moving outwards in concentric circles, chapters address Korea's connections with its region and Koreans' contributions to the wider world. Relations with Japan, Korea's most difficult bilateral relationship, are surveyed to identify both patterns and images. The thirteenth-century Tripitaka Koreana is the most complete collection of Buddhist scripture in Chinese, and its recent digitization points towards a renaissance of this world religion. South Korea's pursuit of a Nobel Prize in Literature is put in perspective when one considers Korean contribution to the pre-modern Sinitic literary world. South Korea may owe its existence to the United Nations, but since entering the UN in 1991 it has taken to heart the altruistic urge of global peacekeeping.

International Bibliography of Economics 1994 British Library of Political and Economic Science at the London School of Economics, 1995. The IBSS is the essential tool for librarians, university departments, research institutions and any public or private institutions whose work requires access to up-to-date and comprehensive knowledge of the social sciences.

Multinationals and Maldevelopment L. Alschuler, 1998-03-11. An important contribution to the increasingly topical debate over which development strategies work best for newly industrializing countries. This new edition of a highly successful book, not previously available in paperback, offers a thorough and up-to-date assessment of development theories leading to clear policy prescriptions. There are two completely new chapters on the current debate on the East Asian Model and the different development path taken in Latin America and on the New Comparative Political Economy. Alschuler demonstrates that a new conceptual framework incorporating features of dependency theory and world system analysis is

needed in order to capture the complex interaction between multinationals development strategies and class alliances and their impact on development

Economics David A. Dieterle, 2017-03-27 A comprehensive four volume resource that explains more than 800 topics within the foundations of economics macroeconomics microeconomics and global economics all presented in an easy to read format As the global economy becomes increasingly complex interconnected and therefore relevant to each individual in every country it becomes more important to be economically literate to gain an understanding of how things work beyond the microcosm of the economic needs of a single individual or family unit This expansive reference set serves to establish basic economic literacy of students and researchers providing more than 800 objective and factually driven entries on all the major themes and topics in economics Written by leading scholars and practitioners the set provides readers with a framework for understanding economics as mentioned and debated in the public forum and media Each of the volumes includes coverage of important events throughout economic history biographies of the major economists who have shaped the world of economics and highlights of the legislative acts that have shaped the U S economy throughout history The extensive explanations of major economic concepts combined with selected key historical primary source documents and a glossary will endow readers with a fuller comprehension of our economic world

The Korean Economy 1945-1995 Dong-Se Cha, Kwang Suk Kim, Dwight Heald Perkins, 1997

Eastern and Western Ideas for African Growth Kenichi Ohno, Izumi Ohno, 2013-05-29 The West and the East approach economic development differently The Europeans and Americans stress free and fair business climate promoting private activities generally without picking winners and improving governance East Asia is interested in achieving concrete results and projects rather than formal correctness prioritizing a few sectors for industrialization and eventual graduation from aid The West mostly shapes shifting strategies of the international donor community while the East has in reality made remarkable progress in industrial catch up The two approaches cannot be merged easily but they can be used in proper combination to realize growth and economic transformation This book proposes more dialogue and complementarity between the two in the development effort of Africa and other regions In this collected volume contributed by experts and practitioners from both East and West the need to introduce Eastern ideas to the global development strategy is emphasized Analysis of British and other Western donor policies is given while Japanese Korean and other Asian approaches are also explained with concrete examples The concept of governance for growth is presented and the impact of rising China on development studies is contemplated The practices of industrial policy dialogues and actions assisted by East Asian experts are reported from Tunisia Zambia Ethiopia Rwanda and others The book should be applicable to all donors institutions NGOs and business enterprises engaged in development cooperation

Low Income, Social Growth, and Good Health James C. Riley, 2008 Life expectancy and income among the first countries to begin health transitions Which countries should be studied A colonizer and the country colonized Japan and Korea Very low income is not a barrier Sri Lanka Two neighbors Panama and Costa Rica Capitalism and communism

dictatorship and democracy Cuba and Jamaica The Soviet and Chinese models of social development Oil rich lands The Latin American case income inequality and health in Mexico Limiting mortality from fecal disease malaria and tuberculosis

Capital Mobility and Distributional Conflict in Chile, South Korea, and Turkey Kurtuluş Gemici, 2020-05-04 Why did many emerging countries pursue risky financial opening policies in a reckless manner even after the painful example of the Latin American debt crisis Unlike trade liberalization which has mostly been beneficial in emerging countries the removal of capital controls has led to boom bust patterns in many countries It is not simply driven by class or sectoral interests nor is it just a result of ideational changes in policy making circles or international pressure Gemici argues that to fully understand the motivation for these policies we need to take into account distributional struggles prior to their enactment In this book Gemici shows that conflictual distributional relations significantly increase the likelihood of capital account liberalization Through in depth comparative case studies he also demonstrates that countries which liberalize in the most comprehensive manner tend to be the countries characterized by a high degree of distributional conflict The case studies Argentina Chile South Korea and Turkey have been chosen to maximise variation in distributional relations and to escape regional clustering showing quite different trajectories of capital account liberalization This will be of great interest to readers in sociology international political economy and heterodox economics as well as specialists in the countries examined *AccessAsia*, 1997 □□□□□□□□□□ Frank Joseph Shulman, Anna See Ping Leon Shulman, 2001-01-01 A descriptively annotated multidisciplinary cross referenced and extensively indexed guide to 2 395 dissertations that are concerned either in whole or in part with Hong Kong and with Hong Kong Chinese students and emigres throughout the world *Labor Control and Economic Development in South Korea, 1961-1979* Changgyun Oh, 1996 The principal theme of this study is the insistence that we must consider the broader institutional dimensions of labor politics if we are to understand why Korean workers have been politically compliant in the 1960s and 1970s The issue of labor compliance has been explained previously by the emphasis on cultural elements and the repressive power of the state A careful consideration of Korean experience in this study suggests that a reduction to cultural imposition or repressive forces would fail to capture the full range of factors affecting workers action Based on the usual practice of the historical comparative institutional studies of political economies this study examines the relationship between institutions ideas and activities One of the central claims of institutionalism is that the actions of individuals or organizations are affected by the institutional structures within which they operate It is through institutions that political and social values became linked to practical activity This study shows that the state did not rely on a simple measure when it controlled labor Rather it drew upon the kinds of cultural institutional materials identified by institutionalists And so did the working class in defining itself Workers in struggle have been drawing upon cultural institutional materials and reshaping them Thus this study insists that labor control strategy in Korea was broader in its scope than repressive control or simple imposition of traditional culture We should consider the broader context of policy

that emerged at the time
