Impact Of Emerging Technologies On Reference Service And Bibliographic Instruction:

The Impact of Emerging Technologies on Reference Service and Bibliographic Instruction Gary Pitkin, 1995-09-19

Information technologies are having a profound impact on the ways libraries are providing traditional services. This book identifies emerging technologies and assesses their impact on two distinct yet interdependent entities: library service and library education. While other publications identify technologies and speculate on applications, this volume focuses on the impacts of information technology on several aspects of librarianship. The book first delineates emerging technologies and their impact on reference services and bibliographic instruction. It then discusses the resultant restructuring of reference services and the relationship between librarians and patrons. Bibliographic instruction is presented as a new paradigm based on the imperative that no faculty member should teach and no student should graduate without being fully information literate. The work also discusses staffing, organization, and financial support, and the structural and political placement of the library within the parent organization.

New Technologies and Reference Services William A. Katz, 2000. This comprehensive volume recounts the ways reference librarians have adapted traditional services to deal with the changes in both information technologies and library patrons. *New Technologies and Reference Services* shows how to provide needed services using videoconferencing, interactive classrooms, drop-in seminars, and required courses. It also discusses the other implications of new technologies, including developing trends in publishing, copyright issues, collection strategies, and decentralizing library reference services.

New Technologies and Reference Services Linda S. Katz, 2019-07-15. Offer your patrons the cutting edge reference services they demand. In the past, a reference librarian needed to develop a command of a few reference works, master the skills of the reference interview, and interface with library users in person or via telephone. Today's reference librarian is faced with much, much more. *New Technologies and Reference Services* suggests ways you can tame the information explosion and take advantage of new technologies. This comprehensive volume recounts the ways reference librarians have adapted traditional services to deal with the changes in both information technologies and library patrons. *New Technologies and Reference Services* offers tested techniques for fostering information literacy in patrons daunted by the high-tech edge of the new library. Even computer-savvy younger students may need help learning specialized searching skills. This practical volume suggests several innovative ways to teach those skills using interactive classrooms, drop-in seminars, and required courses. *New Technologies and Reference Services* discusses the other implications of new technologies, including developing trends in publishing, including value-added services and the death of the printed encyclopedia, the effects of CD-ROM, electronic publishing, and the Internet on copyright issues, videoconferencing at the reference desk, collection strategies, and budgets in an era of multiple formats, decentralizing library reference services, information apartheid, the growing gap between the information haves and have-nots. This helpful volume gives practical, tested advice and ideas on the broader issues of information technology. With plentiful Web addresses, *New Technologies and*

Lifelong Learning in Public Libraries Donna L. Gilton, 2012. *Lifelong Learning in Public Libraries* demonstrates that public librarians can promote learning by combining the elements of Information Literacy Instruction (ILI) with traditional practices of public libraries. This approach contributes to the information enfranchisement of patrons and enhances the fulfillment of the traditional goals and purposes of libraries. Donna L. Gilton provides background on ILI and current developments in public library instruction and also examines educational theories and practices derived from the fields of behaviorism, cognitive psychology, constructivism, and educational humanism. Additional chapters delve into practices developed to deal with diverse groups and translate the theories and practices that have been outlined into a well-coordinated plan. The final chapters survey the role of libraries as cultural institutions. This book introduces the field of ILI to public librarians in the context of their own traditions and shows the unique ways that ILI can be implemented in public library settings. It encourages librarians to rethink practices to incorporate the principles of ILI and will enable public librarians to extend and enrich their instruction on information use. *Lifelong Learning in Public Libraries* is a valuable resource for librarians, educators, and leaders of public organizations.
