Co-Scheduling of HPC Applications C. Trinitis,J. Weidendorfer,2017-01-05 High performance computing HPC has become an essential tool in the modern world However systems frequently run well below theoretical peak performance with only 5% being reached in many cases In addition costly components often remain idle when not required for specific programs as parts of the HPC systems are reserved and used exclusively for applications A project was started in 2013 funded by the German Ministry of Education and Research BMBF to find ways of improving system utilization by compromising on dedicated reservations for HPC codes and applying co scheduling of applications instead The need was recognized for international discussion to find the best solutions to this HPC

utilization issue and a workshop on co scheduling in HPC open to international participants the COSH workshop was held for the first time at the European HiPEAC conference in Prague Czech Republic in January 2016 This book presents extended versions of papers submitted to the workshop reviewed for the second time to ensure scientific quality It also includes an introduction to the main challenges of co scheduling and a foreword by Arndt Bode head of LRZ one of Europe s leading computer centers as well as a chapter corresponding to the invited keynote speech by Intel whose recent extensions to their processors allow for better control of co scheduling
