Interaction Of Modality And Negation:

The Interaction of Modality and Negation Ferdinand De Haan, 2013-10-31 First Published in 1997 This book is an updated version of the author's 1994 dissertation submitted to the Graduate School of the University of Southern California With updated references footnotes pointing to research published after May 1994 this study of modality showcases its long history Yet for many centuries it seemed to be the exclusive domain of philosophers It was not recognized by linguists as a separate object for study until comparatively recent times The author argues that the other component of this study negation has fared much better

Modality and Its Interaction with the Verbal System Lambertus Christiaan Jozef Barbiers, Frits H. Beukema, Wim van der Wurff, 2002-01-01 This book provides a broad overview of the issues relevant for the study of syntax of modals and their interaction with the verbal system A large number of novel observations are offered from a variety of languages including Dutch Modern and Middle English German Lele Macedonian Middle Dutch and Slovene The wealth of data the critical evaluation of existing syntactic analyses of modality and the alternative analyses proposed make the book interesting for both for descriptively and for theoretically oriented syntacticians Major concerns addressed are the distinction between epistemic and root modality where the arguments pro and contra the assumption of a corresponding difference in syntactic structure are evaluated refined and supplemented by arguments for syntactic distinction between necessity and possibility modals and by consideration of the influence of the modal's complement on the interpretation the interaction between modality and clausal phenomena in particular negation but also imperatives aspect and Aktionsart and the acquisition of modality addressing cross linguistic differences in the possibility for root infinitives to express modal interpretations and the late acquisition of epistemic interpretations as compared with non epistemic interpretations The Interaction of Negation and Modality Ferdinand De Haan, 1994

Modality, Aspect and Negation in Persian Azita Hojatollah Taleghani, 2008 This monograph presents a morpho syntactic investigation on modality aspect and negation by concentrating on Persian and is designed to contribute to theoretical linguistics and the study of Iranian languages The analysis is based on the Minimalist program This research challenges the idea that the syntactic structure maps on the semantic interpretation or vice versa The discussion presented in this monograph shows that the syntactic structure of Persian modals is uniform no matter if the modals are interpreted as having root or epistemic readings Although it is claimed that modals are raising constructions in different languages modals in Persian which does not have subject raising constructions show a different syntactic behavior Furthermore the structural analysis of the interaction of Persian modals and negation shows that because of the scope interaction of negation and modals the syntactic structure of modals with respect to negation mostly corresponds to the semantic interpretation of modals

Cognitive English Grammar Günter Radden, René Dirven, 2007 Cognitive English Grammar is designed to be used as a textbook in courses of English and general linguistics It introduces the reader to cognitive linguistic theory and shows that Cognitive Grammar helps us to gain a better

understanding of the grammar of English The notions of motivation and meaningfulness are central to the approach adopted in the book In four major parts comprising 12 chapters Cognitive English Grammar integrates recent cognitive approaches into one coherent model allowing the analysis of the most central constructions of English Part I presents the cognitive framework conceptual and linguistic categories their combination in situations the cognitive operations applied to them and the organisation of conceptual structures into linguistic constructions Part II deals with the category of things and their linguistic structuring as nouns and noun phrases It shows how things are grounded in reality by means of reference quantified by set and scalar quantifiers and qualified by modifiers Part III describes situations as temporal units of various layers internally as types of situations and externally as located relative to the time of speech and grounded in reality or potentiality Part IV looks at situations as relational units and their structuring as sentences Its two chapters are devoted to event schemas and space and metaphorical extensions of space Cognitive English Grammar offers a wealth of linguistic data and explanations The didactic quality is guaranteed by the frequent use of definitions and examples a glossary of the terms used overviews and chapter summaries suggestions for further reading and study questions For the Key to Study Questions click here

The Oxford Handbook of Modality and Mood Jan Nuyts, Johan van der Auwera, 2016 This handbook offers an in depth and comprehensive state of the art survey of the linguistic domains of modality and mood An international team of experts in the field examine the full range of methodological and theoretical approaches to the many facets of the phenomena involved Following an opening section that provides an introduction and historical background to the topic the volume is divided into five parts Parts 1 and 2 present the basic linguistic facts about the systems of modality and mood in the languages of the world covering the semantics and the expression of different subtypes of modality and mood respectively The authors also examine the interaction of modality and mood mutually and with other semantic categories such as aspect time negation and evidentiality In Part 3 authors discuss the features of the modality and mood systems in five typologically different language groups while chapters in Part 4 deal with wider perspectives on modality and mood diachrony areality first language acquisition and sign language Finally Part 5 looks at how modality and mood are handled in different theoretical approaches formal syntax functional linguistics cognitive linguistics and construction grammar and formal semantics

[Perspectives on Negation](#) Frances Blanchette, Cynthia Lukyanenko, 2025-03-31 Although negation has been studied extensively by philosophers linguists and psychologists it remains an active area of inquiry across the language sciences This dynamic and cross disciplinary volume contains a unique collection of chapters by language scientists from a variety of disciplines Readers will explore novel connections and gain insights into the nature of negation one of the few uncontroversial universal elements of natural language

The Fate of Mood and Modality in Language Death Petar Kehayov, 2017-07-24 Research into the grammar of language death is often biased toward formal processes e g paradigmatic levelling In this study the author changes the perspective and shows that the relative susceptibility of linguistic elements to

loss change and innovation in language death circumstances can be dependent on meaning and thus organized along semantic notions rather than along structure

Re-Assessing Modalising Expressions Pascal Hohaus, Rainer Schulze, 2020-11-15 Mood modality and evidentiality are popular and dynamic areas in linguistics. *Re Assessing Modalising Expressions* Categories co text and context focuses on the specific issue of the ways language users express permission obligation volition intention possibility and ability necessity and prediction linguistically. Using a range of evidence and corpus data collected from different sources the authors of this volume examine the distribution and functions of a range of patterns involving modalising expressions as predominantly found in standard American English British English or Hong Kong English but also in Japanese. The authors are particularly interested in addressing co textual manifestations of modalising expressions as well as their distribution across different text types and thus filling a gap research was unable to plug in the past. Thoughts on categorising or re categorising modalising expressions initiate and complement a multi perspectival enterprise that is intended to bring research in this area a step forward

Multi-locus Analysis of Arabic Negation Ahmad Alqassas, 2018-12-21 This book studies the micro variation in the syntax of negation of Southern Levantine Gulf and Standard Arabic. By including new and recently published data that support key issues for the syntax of negation the book challenges the standard parametric view that negation has a fixed parametrized position in syntactic structure. It particularly argues for a multi locus analysis with syntactic semantic morphosyntactic and diachronic implications for the various structural positions. Thus accounting for numerous word order restrictions semantic ambiguities and pragmatic interpretations without complicating narrow syntax with special operations configurations or constraints

Modality and Ellipsis Remus Gergel, 2009-03-26 Aspects of modality and ellipsis have become prominent in theoretical linguistics over the last years. What has remained under investigated is the fact that modals tend to make excellent ellipsis licensors and conversely that many of the naturally occurring cases of ellipsis are licensed by modals. The book concentrates on the syntax of the modal auxiliaries with special focus on English and investigates the grammatical relationship with the process of ellipsis that interacts most relevantly with the modals in grammaticalized fashion by including a special emphasis on verb phrase ellipsis. After a critical discussion of pertinent approaches in the two domains the book focuses on establishing the connection between the two areas by essentially drawing on the history of English and on observable effects in modern grammars which it puts into perspective with semantically grounded features on the modals involved. Two major generalizations are proposed in the monograph. The first generalization concerns the treatment of the interaction between modals and ellipsis as determined by the features located in the licensing modal heads. To this end the syntactic effects of the main semantic factors are explored in detail in English and partial effects obtaining in other languages are discussed. The second generalization concerns the syntactic component involved in ellipsis licensing. It is suggested that ellipsis types with the distributional features of verb phrase ellipsis are licensed by interpretable features of the licensing head. The two

generalizations are intertwined with one another and derive a series of further legitimate ellipsis licensors beyond the modals. The role of formal features that are interpretable is distinguished from agreement features which are claimed not to be in charge of ellipsis licensing. **The interaction of negation and epistemic modality** Daniela E. Casartelli, 2017

Secondary Predication and Adverbial Modification Nikolaus P. Himmelmann, Eva F. Schultze-Berndt, 2006-09-28
Depictive secondary predicates such as *raw* in *George ate the fish raw* are central to current issues in syntactic and semantic theory in particular predication theory phrase structure theories issues of control and grammatical relations and verbal aspect. This is the first book to approach depictive secondary predication from a cross linguistic perspective. It describes all the relevant phenomena and brings together critical surveys and new contributions on their morphosyntactic and semantic properties. It considers similarities and differences between secondary predicates and other types of adjuncts including adverbials of manner comparison quantity and location. The authors are leading scholars with a first hand knowledge of the languages they discuss. Their approach is theory neutral and pragmatic they draw on insights and research traditions ranging from the minimalist program to semantic maps methodology. The book will interest scholars working on the semantics or syntax of secondary predicates adverbials and the role of agreement and other morphological marking. It has been designed for use in advanced syntax and typology classes. **East Asian Sign Linguistics** Kazumi Matsuoka, Onno Crasborn, Marie Coppola, 2022-12-05. This book is one of the first references of linguistic research of sign languages in East Asia including China Korea Japan Taiwan and Hong Kong. The book includes the basic descriptions of aspects of Chinese Shanghai Tianjin sign language Hong Kong Sign Language Japanese Sign Language Korean Sign Language Taiwanese Sign Language and Tibetan Sign Language. This book explores the cognitive constraints and principles of variation in structures of linguistic meaning across languages. It unifies cognitive semantic representations with formal semantic representations to make a unique contribution to the study

of typological generalizations and universals in natural language semantics This unified approach not only helps reveal why semantic structures have the observed variation they have but also sheds light on the compelling cognitive and formal regularities and patterns in the variation of linguistic semantics The book also advances the general principles of a cognitively oriented semantic typology Lucid and topical the book will be an indispensable resource for students and researchers of language typology linguistics cognitive linguistics and semantics It will also be of interest to theoretical linguists of both cognitivist and formalist schools Sign Language Research Sixty Years Later: Current and Future Perspectives Valentina Cuccio,Erin Wilkinson,Brigitte Garcia,Adam Schembri,Erin Moriarty,Sabina Fontana,2022-11-14

On Speaking Terms Luke Owles Fleming,2024-12-16 Why are kin in societies all over the world divided into joking and avoidance relations Foundational figures in the human sciences from E B Tylor and Alfred Radcliffe Brown to Sigmund Freud and Claude Lévi Strauss have sought to explain why some classes of kin are normatively expected to prank and tease one another while others must studiously avoid each other's presence In this extensively researched comparative study linguistic anthropologist Luke Owles Fleming offers a bold new answer to this problem With a particular focus on avoidance relationships *On Speaking Terms* argues that in order to understand cross cultural convergences in the patterning of kinship keyed comportments we must attend to the sociolinguistic codes through which kinship relationships are enacted Drawing on ethnographic data from more than one hundred different societies the book documents and analyses parallels in the linguistic and non verbal signs through which avoidance relationships are experientially realized With dedicated discussions of Aboriginal Australian mother in law languages name and word tabooing practices pronominal honorification and non verbal strategies of interactional and sensorial avoidance it reveals recurrent sociolinguistic patterns attested in kinship avoidance In demonstrating the vital role of sociolinguistic codes for transforming kinship categories into phenomenologically rich relationships *On Speaking Terms* makes an important contribution to the anthropology of kinship *Language* George Melville Bolling,Bernard Bloch,2006 Semantics - Noun Phrases and Verb Phrases Paul Portner,Klaus Heusinger,Claudia Maienborn,2019-02-19 Gain a deeper understanding of essential research on the semantics of noun phrases and verb phrases Clear explanations of significant recent research bring complex issues to life with expert guidance on topics of debate within the field The book gives readers valuable insights into topics such as definiteness specificity genericity aspect aktionsart and mood It also discusses directions for future research Written by a world class team of authors these highly cited articles are here in paperback for the first time since their original publication An essential reference for researchers in the area
