Perspectives on Soviet and Russian Computing John Impagliazzo,Eduard Proydakov,2011-09-06 This book contains a collection of thoroughly refereed papers derived from the First IFIP WG 9 7 Conference on Soviet and Russian Computing held in Petrozavodsk Russia in July 2006 The 32 revised papers were carefully selected from numerous submissions many of them were translated from Russian They reflect much of the shining history of computing activities within the former Soviet Union from its origins in the 1950s with the first computers used for military decision making problems up to the modern period where Russian ICT grew substantially especially in the field of custom made programming Climate Stabilization Targets National Research Council,Division on Earth and Life Studies,Board on Atmospheric Sciences and Climate,Committee on Stabilization Targets for Atmospheric Greenhouse Gas Concentrations,2011-02-11 Emissions of carbon dioxide from the burning of fossil fuels have ushered in a new epoch where human activities will largely determine the evolution of Earth s climate Because carbon dioxide in the atmosphere is long lived it can effectively lock the Earth and future generations into a range of impacts some of which could become very severe Emissions reductions decisions made today matter in determining impacts experienced not just over the next few decades but in the coming centuries and millennia According to Climate Stabilization Targets Emissions Concentrations and Impacts Over Decades to Millennia important policy decisions can be informed by recent advances in climate science that quantify the relationships between increases in carbon dioxide and global warming related climate changes and resulting impacts such as changes in streamflow wildfires crop productivity extreme hot summers and sea level rise One way to inform these choices is to consider the projected climate changes and impacts that would occur if greenhouse gases in the atmosphere were stabilized at a particular concentration level The book quantifies the outcomes of different stabilization targets for greenhouse gas concentrations using analyses and information drawn from the scientific literature Although it does not recommend or justify any particular stabilization target it does provide important scientific insights about the relationships among emissions greenhouse gas concentrations temperatures and impacts Climate Stabilization Targets emphasizes the importance of 21st century choices regarding long term climate stabilization It is a useful resource for scientists educators and policy makers among others **Headquarters Intercom** United States.
