

An abstract painting by Franz Marc, likely 'The Blue Horse' (1911). The composition is dominated by a large, stylized red bull's head in profile, facing left. A prominent white cross is superimposed over the bull's face. The background is a complex arrangement of dark, angular shapes in shades of blue, black, and brown, creating a sense of depth and movement. The overall style is characteristic of Dieckmann's expressionism, with bold colors and geometric forms.

Franz Marc Life And Work:

Franz Marc Claus Pese, Franz Marc, 1990 Om den tyske maler Franz Marc 1880 1916 *The Visual Arts in Germany, 1890-1937* Shearer West, 2000 This work provides an introduction to the visual arts in Germany from the early years of German unification to World War II The study is an analysis of painting sculpture graphic art design film and photography in relation to a wider set of cultural and social issues that were specific to German modernism It concentrates on the ways in which the production and reception of art interacted with and was affected by responses to unification conflict between left and right political factions gender concerns contemporary philosophical and religious ideas the growth of cities and the increasing importance of mass culture German Incertitudes, 1914-1945 Klemens von Klemperer, 2001-03-30 The history of modern Germany has all too readily been seen in terms of an historical process that inevitably led to the horrors of National Socialism As there are no certitudes in life however so there are none in German history In this book historian Klemens von Klemperer focuses on what he terms the German Incertitudes namely the tensions between a realistic acceptance of disenchantment with the modern world and an insistence upon reenchancement Exploring this tension through a critical assessment of the ideas and writings of major German thinkers von Klemperer seeks to account for both the achievements and the failings of German thought society and politics as responses to the challenge of modernity in the first half of the 20th century In addition to individuals such as Nietzsche Weber Spengler J nger Bonhoeffer and Heidegger the author considers broader movements and ideas such as the concept of Gemeinschaft and the German expressionists all in the wider context of Western intellectual currents Rather than belaboring presumed German deviance from the European norms von Klemperer explores the reasons why the sense of crisis in the face of modernity was singularly acute among Germans he traces a spectrum of reactions extending from an acceptance of modern disenchantment to the quest for reenchancement which found an extreme manifestation in National Socialism Reader's Guide to Judaism Michael Terry, 2013-12-02 The Reader's Guide to Judaism is a survey of English language translations of the most important primary texts in the Jewish tradition The field is assessed in some 470 essays discussing individuals Martin Buber Gluckel of Hameln literature Genesis Ladino Literature thought and beliefs Holiness Bioethics practice Dietary Laws Passover history Venice Baghdadi Jews of India and arts and material culture Synagogue Architecture Costume The emphasis is on Judaism rather than on Jewish studies more broadly *A Pilgrimage of Justice and Peace* Fernando Enns, Nina Schroeder-van 't Schip, Andrés Pacheco-Lozano, 2023-04-05 This edited volume includes contributions by scholars ministers artists and NGO workers from around the world who are interested in topics of Mennonitism peacebuilding and theologies of nonviolence The papers published together here reflect the richness and diversity of peacebuilding interests and approaches within the current global Mennonite family and offer interdisciplinary explorations of peace and conflict with attention to historical theological and lived perspectives The book includes papers based upon research and insights that were shared at the Second Global Mennonite Peacebuilding

Conference and Festival 2019 at Mennorode in the Netherlands The findings presented here are structured thematically with attention to key points of current concern and research including among others studies on historical and current peacebuilding efforts pertaining to migration and refugee care ecological justice gender justice interreligious dialogue church state relations and racial justice

D.H. Lawrence and Germany Carl Krockel, 2007 D H Lawrence has suffered criticism for the emotional excess of his language and for a suspected leaning towards right wing politics This book contextualises his style and political values in German culture especially its Romantic tradition which has been subjected to the same criticism as himself In his writing Lawrence struggles between opposing German cultural elements from the eighteenth century onwards to dramatise the conflicts in Modern European culture and history in the first half of the Twentieth century The book demonstrates how his failures are integral to his achievements and how the self contradictory nature of his art is actually its saving grace This volume surveys the whole span of Lawrence s career it is intended for both students and teachers of the author and for those interested in the cross cultural relations of European Modernism Previous studies have tended to outline references in Lawrence s work to Germany without focusing on the historical cultural and ideological issues at stake These issues are the subject of this book

The Expressionist Roots of Modernism Peter Lasko, 2003 This book explores the beginnings of the interior design profession in nineteenth century France Drawing on a wealth of visual sources from collecting and advice manuals to pattern books and department store catalogues it demonstrates how new forms of print media were used to sell the idea of the unified interior as a total work of art enabling the profession of interior designer to take shape In observing the dependence of the trades on the artistic and public visual appeal of their work Interior decorating in nineteenth century France establishes crucial links between the fields of art history material and visual culture and design history

The Fate of the Animals Morgan Meis, 2022-09-15 In 1913 Franz Marc one of the key figures of German Expressionism created a masterpiece The Fate of the Animals With its violent slashes of color and line the painting seemed to pre figure both the outbreak of World War I and more eerily Marc s own death in an artillery barrage at the Battle of Verdun three years later With his signature blend of wide ranging erudition and lively accessible prose Morgan Meis explores Marc s painting in depth guided in part by a series of letters Marc wrote to his wife Maria while he was a soldier in the war In those letters Marc explores the nature of art the fate of European civilization and the inner spiritual nature of all life Along the way Meis brings in other artists such as D H Lawrence Edgar Degas and Paul Klee to flesh out his argument The Fate of the Animals also explores the darker undercurrents of German apocalyptic thinking in Marc s time especially Norse mythology and the ancient Vedic texts as they influenced Schopenhauer Nietzsche and Heidegger The Fate of the Animals is the second volume of Meis s Three Paintings Trilogy the first volume of which The Drunken Silenus examined a painting by Rubens The third volume forthcoming will consider a painting by Joan Mitchell

German Expressionist Painting Peter Selz, 2023-04-28 Published in 1957 German Expressionist Painting was the first comprehensive study of one of the most pivotal movements in the art of this century When it was written however German Expressionism seemed like an eccentric manifestation far removed from what was then considered the mainstream of modern art But as historians well know each generation alters the concept of mainstream to encompass those aspects of the past which seem most relevant to the present The impact of German Expressionism on the art and thought of later generations could never have been anticipated at the time of the original writing of this book During the subsequent years an enormous body of scholarly research and an even larger number of popular books on German expressionist art has been printed Numerous monographs and detailed studies on most of the artists exist now and countless exhibitions with accompanying catalogues have taken place Much of this new research could have been incorporated in a revised edition and the bibliography certainly could have been greatly expanded to include the important writings which have been published in Germany the United States and elsewhere since this book was originally issued The author however was faced with the choice of reprinting the original text with only the most necessary alterations such as updating the captions to indicate present locations of the paintings or the preparation of a revised text and bibliography Desirable as a revision appeared present printing costs would have priced the paperback out of reach for students It is for this reason that I decided to reissue the original text which stands on its own as a primary investigation of German Expressionist Painting
