Free Boundary Problems in Continuum Mechanics S.N. Antontsev, K.H. Hoffmann, A.M. boundary problems form a scientific area which attracts attention of many specialists in mathematics and mechanics. Increasing interest in the field has given rise to the International Conferences on Free Boundary Problems and Their Applications which have convened since the 1980s in such countries as England, the United States, Italy, France, and Germany. This book comprises the papers presented at the International Conference Free Boundary Problems in Continuum Mechanics organized by the Lavrentyev Institute of Hydrodynamics, Russian Academy of Sciences, July 15-19, 1991, Novosibirsk, Russia. The scientific committee consisted of Co-chairmen K. H. Hoffmann (L. V. Ovsiannikov, S. Antontsev, Russia, J. Ockendon, UK, M. Fremond, France, L. Ovsiannikov, Russia, A. Friedman, USA, S. Pokhozhaev, Russia, K. H. Hoffmann, Germany, M. Primicerio, Italy, A. Khludnev, Russia, V. Pukhnachov, Russia, V. Monakhov, Russia, Yu. Shokin, Russia, V. Teshukov, Russia). Our thanks are due to the members of the Scientific Committee, all authors and participants for contributing to the success of the Conference. We would like to express special appreciation to N. Makarenko, J. Mal'tseva, and T. Savelieva, Lavrentyev Institute of Hydrodynamics, for their help in preparing this book for publication.

Energy Methods for Free Boundary Problems

S.N. Antontsev, J.I. Díaz, S. Shmarev, 2001-10-26. For the past several decades the study of free boundary problems has been a very active subject of research occurring in a variety of applied sciences. What these problems have in common is their formulation in terms of suitably posed initial and boundary value problems for nonlinear partial differential equations. Such problems arise, for example, in the mathematical treatment of the processes of heat conduction, filtration through porous media, flows of non-Newtonian fluids, boundary layers, chemical reactions, semiconductors, and so on. The growing interest in these problems is reflected by the series of meetings held under the title Free Boundary Problems: Theory and Applications (Oxford 1974, Pavia 1979, Durham 1978, Montecatini 1981, Maubuisson 1984, Irsee 1987, Montreal 1990, Toledo 1993, Zakopane 1995, Crete 1997, Chiba 1999). From the proceedings of these meetings we can learn about the different kinds of mathematical areas that fall within the scope of free boundary problems. It is worth mentioning that the European Science Foundation supported a vast research project on free boundary problems from 1993 until 1999. The recent creation of the specialized journal *Interfaces and Free Boundaries: Modeling, Analysis, and Computation* gives us an idea of the vitality of the subject and its present state of development. This book is a result of collaboration among the authors over the last 15 years.

Energy Methods in Continuum Mechanics

S.N. Antontsev, J.I. Díaz, S.I. Shmarev, 2012-12-06. This volume contains the proceedings of the Workshop Energy Methods for Free Boundary Problems in Continuum Mechanics held in Oviedo, Spain, from March 21 to March 23, 1994. It is well known that the conservation laws and the constitutive equations of Continuum Mechanics lead to complicated coupled systems of partial differential equations to which, as a rule, one fails to apply the techniques usually employed in the studies of scalar uncoupled equations, such as, for instance, the maximum principle. The study of the qualitative behaviour of solutions of the systems requires different techniques; among others, the so-called Energy Methods, where the properties of some integral of a nonnegative function of one or several unknowns allow one to arrive at important

conclusions on the involved unknowns This volume presents the state of the art in such a technique A special attention is paid to the class of Free Boundary Problems The organizers are pleased to thank the European Science Foundation Program on Mathematical treatment of free boundary problems the DGICYT Spain the FICYT Principado de Asturias Spain and the Universities of Oviedo and Complutense de Madrid for their generous financial support Finally we wish to thank Kluwer Academic Publishers for the facilities received for the publication of these Proceedings

A Bibliography of Free Boundary Problems Colin W. Cryer, 1977 A free boundary problem is a steady state boundary value problem involving differential equations on domains parts of whose boundaries the free boundaries are unknown and must be determined as part of the solution Free boundary problems arise in all branches of continuum mechanics The bibliography contains about 3300 references most of which are classified according to one or more of approximately 1200 subjects Listings by author and by subject are given in appendices these are on microfiche but paper copies can be obtained by writing to the Mathematics Research Center Author
