and harmony prevails only in the first chapter Thereafter Pawson presents a devastating critique of the dominant approach to systematic review namely the meta analytic approach as sponsored by the Cochrane and Campbell collaborations In its place is commended an approach that he terms realist synthesis On this vision the real purpose of systematic review is better to understand programme theory so that policies can be properly targeted and developed to counter an ever changing landscape of social problems The book will be essential reading for all those who loved or loathed the arguments developed in *Realistic Evaluation* Sage 1997 It offers a complete blueprint for research synthesis supported by detailed illustrations and worked examples from across the policy waterfront It will be of especial interest to policy makers practitioners researchers and students working in health education employment social care criminal justice regeneration and welfare
