Japan's Subnational Governments in International Affairs Purnendra Jain, 2006-03-13 This book moves away from the common belief that Japan's international relations are firmly the preserve of the national government in Japan's highly centralised political system Examining examples of subnational governments SNGs across Japan the book uncovers a significant and generally unrecognised development in Japanese politics SNGs are ever more dynamic international actors as national borders weaken across the world Exploring what Japanese SNGs do where they do it and why the book considers the implications of these factors for Japan's international relations and domestic politics By bringing to light the scope and consequences of the international actions of Japan's SNGs this book provides a more accurate and nuanced understanding of the country's foreign policy at a time when it is pursuing a broader and more active profile in international affairs

Theory of World Security Ken Booth, 2007-12-20 What is real What can we know How might we act This book sets out to answer these fundamental philosophical questions in a radical and original theory of security for our times Arguing that the concept of security in world politics has long been imprisoned by conservative thinking Ken Booth explores security as a precious instrumental value

which gives individuals and groups the opportunity to pursue the invention of humanity rather than live determined and diminished lives Booth suggests that human society globally is facing a set of converging historical crises He looks to critical social theory and radical international theory to develop a comprehensive framework for understanding the historical challenges facing global business as usual and for planning to reconstruct a more cosmopolitan future Theory of World Security is a challenge both to well established ways of thinking about security and alternative approaches within critical security studies

The United Nations and Conflict Prevention in the Post Cold War Era Aren Sariqyan, 2006-05-26 Inhaltsangabe Introduction Following the collapse of the former Soviet Union world affairs have entered into a new era of hopes opportunities threats and challenges significantly reframing the international relations of the late twentieth century and beyond It was a momentum that states governments and organizations worldwide embraced with expectations and visions of change So did the United Nations UN The new era was particularly promising for this universal organization as it had presumably overcome the paralyzed nature of its functioning throughout the Cold War Moreover the UN was deemed to have acquired the freedom and authority it needs to exercise its primary obligation enshrined in the Charter i e to prevent and remove through collective efforts threats to the peace to suppress acts of aggression and to resolve international disputes through peaceful means and in conformity with the principles of justice and international law The first sentence in the preamble of the Charter while claiming the international community's determination to save succeeding generations from the scourge of war illustrates the high cause attached to the birth of the organization with a clear link to preventing armed conflicts The basic idea of preventing armed conflicts is not novel and the term preventive diplomacy was coined by Secretary General Dag Hammarskjöld already in 1960 Initially the term was understood in the context of the Cold War when UN efforts were undertaken to eliminate localized disputes and wars that could have provoked wider confrontations between the two superpowers Notwithstanding its conceptual importance and available operational tools conflict prevention received little attention at the margins of global power politics Traditional diplomatic instruments such as mediation conciliation good offices continued to define the toolbox of conflict prevention activities Preventive diplomacy however received particular attention because of the way Secretary General Boutros Ghali broadened and publicized it in his by now well known report Agenda for Peace The need for credible early warning mechanisms and fact finding missions was equally prioritized Since the end of the Cold War the necessity to

move from a culture of reaction to a culture of prevention has been incessantly emphasized and gradually reinforced into unequivocal policy through numerous General Assembly resolutions Security Council resolutions

Negotiating for Water Resources Andrea Haefner, 2016-10-04 Over 90 per cent of the world population lives in countries that share a river basin with others Freshwater resources are scarce and different nations actors and users compete for limited resources in transboundary river basins often conflicting with each other Water is a resource with no substitute it cannot be secured in sufficiently large quantities through long distance trade deals and due to the interconnectivity of the hydrological system the actions of one country in its water management have a direct bearing on the interests of neighbouring countries For instance in the Mekong River Basin current hydropower and navigation developments in certain countries impact on traditional sources of income such as fisheries and rice production in others These kinds of changes in water use have given rise to conflict between countries in that region and others but have also led in some cases to greater cooperation The past few decades have seen a number of new agreements about the sharing of river resources and cooperation between riparian states Negotiating for Water Resources explores the drivers of conflict and cooperation between states in transnational river basins Drawing on extensive fieldwork and interviews on the Mekong Danube and La Plata River Basins the book provides a three level analysis across three case studies including the regional framework EU ASEAN and Mercosur the River Basin Organisations ICPDR MRC and CIC and the micro level The key question of the book is To what extent do power asymmetries prevent or inhibit cooperation between riparian states over water resources This is linked to the question of how institutions contribute to mitigate competition for natural resources and how states interact in a multilateral arena Overall the book argues that cooperation in transboundary river basins is possible even where there are asymmetric power relations challenging realist assumptions about competition and conflict over resources

Cultural Imperialism and the Decline of the Liberal Order G. Doug Davis, Michael O. Slobodchikoff, 2018-12-14 The end of the Cold War heralded in a new era for liberalism Eastern European states adopted democracy and capitalism to gain acceptance by the West Yet a mere two decades later liberalism was in crisis The rise of illiberal democracies and nationalist movements in the second decade of the twenty first century have left scholars baffled How could this happen Dr's Davis and Slobodchikoff show that the decline of the liberal order lies within its own ideology as it champions freedom liberalism requires its adherents to give up their cultural traditions and adopt the global ethos to be legitimate Through a systematic analysis of Western and Russian soft

power in Poland and Serbia the authors explain the decline of liberalism and the battle over the balance of power in Eastern Europe
