Violent Globalisms Dr Anna Cornelia Beyer, 2013-03-28 During the post cold war world the world's only superpower has encountered an unprecedented challenge a non state enemy that is challenging its hegemony and is using violence as a strategic means Given the international nature of this phenomenon a structured explanation such as this is given added necessity and urgency Cornelia Beyer provides a structured explanation for terrorism and its links with the Global War on Terror as it relates to the latter's broader context causes and implications She offers a comprehensive understanding of the phenomenon of international terrorism and proposes effective policies to counter it She also remedies the current undertheorized nature of the subject area and in doing so opens up new modes of thinking about and struggling against global terrorism **International Terrorism: Multilateral Conventions (1937-2001)** M. Cherif Bassiouni, 2021-10-01 An extensive body of law designed to control international terror violence has come into being and it is this assembly of reports and resolutions conventions and scattered treaty provisions that we must rely on as we move toward an enforceable unambiguous anti terrorism regime in international law Multilateral Conventions includes all relevant conventions adopted since the League of Nations Convention of 1937 it also includes pertinent international conventions of the Organization of African Unity the League of Arab States the Council of Europe the Organization of American States and the South Asian Regional Convention as well as relevant provisions from other international conventions governing postal traffic or weapons control An introductory article by the editor provides a forward looking view of the evolving challenges in combating the ever changing manifestations of terror violence Published under the Transnational Publishers imprint **Terrorism** Ben Saul, 2012-02-07 International anti terrorism measures existed long before 11 September 2001 but have increased markedly since A myriad of norms in different branches of law are now deployed to confront transnational and domestic terrorism

There is also a proliferating body of soft law addressing terrorism stemming from United Nations organs specialised international bodies and regional organisations It is timely to draw together these diverse legal developments over time into a single reference work Bringing the original documents together provides for ease of reference and enables scholars practitioners and students to more easily compare and contrast various sources The book s coverage is comprehensive thematically organisationally geographically and temporally and open to a balance of sources hard and soft but is judicious in its selection and prioritisation of the most significant and representative documents in a field where there are many repetitive or insubstantial documents Importantly the book looks beyond the traditional trans Atlantic bias towards European British and American sources in this area to include materials from Asia Africa Latin America and the Middle East Taken as a whole the book aids in evidencing the emerging field of international anti terrorism law

The Protection of Human Rights in the Administration of Criminal Justice Alfred de Zayas,M. Cherif Bassiouni,2023-11-27 This compilation brings together all the relevant procedural norms and standards applicable to criminal processes whether national regional or international The instruments are systematically arranged and the category listing is in chronological order The procedural instruments are exhaustive providing the reader with a single comprehensive source for all these norms and standards Published under the Transnational Publishers imprint
