Internationalization and Domestic Politics Robert O. Keohane, Helen V. Milner, 1996-04-26 This volume focuses on the effects of the internationalization of national markets on domestic politics      **Internationalizing China** David Zweig, 2018-05-31 China began opening to the outside world in 1978 This process was designed to remain under the state's control But the relative value of goods and services inside and outside China drove cities enterprises local governments and individuals with comparative advantage in international transactions to seek global linkages These contacts David Zweig asserts led to the deregulation of China's mercantilist regime Through extensive field research Zweig surveys the extraordinary changes in four sectors of China's domestic political economy the establishment of development zones rural joint ventures the struggle over foreign aid and higher education He also addresses the crucial question of whether on balance internationalization weakens or strengthens state power      *International Migration and the Globalization of Domestic Politics* Rey Koslowski, 2006 This book considers the impact of migrant communities on the politics of their home nations with case studies from Israel Turkey Kurdistan the Dominican Republic Mexico and Sri Lanka      **International Trade Negotiations and Domestic Politics** Oluf Langhelle, 2013-08-29 In spite of many years of negotiation on trade liberalization progress seems to have stalled This book explores why resistance to further market liberalization seems so strong given that the benefits are seen to outweigh the costs This volume argues that in order to understand the slow progress of World Trade Organization negotiations we need to take into consideration the intermestic character of trade politics that is the way in which international and domestic aspects of politics and policies have been woven together and become inextricably related to each other This is a general trend in our globalizing world and one that is most pronounced in the case of trade politics and policy International Trade Negotiations and Domestic Politics therefore presents an in depth analysis of institutions ideas interests and actors in the interplay between international trade negotiations and national negotiating positions At the international level the authors focus on the multilateral negotiations within the World Trade Organization together with the plurilateral and bilateral negotiations on free trade agreements At the regional and domestic level they analyze the trade politics and policies of two established powers the European Union and the USA two rising powers China and India and a small industrialized country with an open economy Norway      **International Environmental Agreements and Domestic Politics** Arild Underdal, Kenneth Hanf, 2019-06-04 This title was first published in 2000 In examining the domestic politics of international co operation this book addresses two important questions 1 Why do governments often take different positions in negotiations about common problems why do some states push for international regulation while others hold back 2 How can variance in the domestic implementation of and compliance with international agreements be explained why do some states deliver more than they have promised others less The authors report findings and observations from a major study which focused on efforts to establish international regulations to cope with the problem

known as acid rain They provide in depth case studies of nine European countries as well as a comparative analysis searching for patterns and general conclusions **European Monetary Integration & Domestic Politics** James I. Walsh,2000

Three nations in similar economic situations since the 1970s have pursued different monetary strategies Walsh argues that monetary policies produce predictable winners and losers and that policy choice is a function of how industrial firms banks and unions use their political resources **Internationalisation and Economic Institutions:** Mark Thatcher,2007-07-19

This book examines when how and why internationalisation affects national economic institutions It confronts questions at the heart of debates in political economy and comparative politics What does internationalisation of markets mean Who are its carriers in domestic arenas Through which mechanisms does it affect decisions about national institutional reform What are institutional outcomes in the face of internationalisation The book responds to its questions by looking at key economic institutions in five strategic sectors securities trading telecommunications electricity airlines and postal services It compares across four countries that represent different varieties of capitalism namely Britain France Germany and Italy over the period between 1965 and 2005 Thus it combines cross national historical and cross sectoral comparisons The author distinguishes technological and economic forms of internationalisation from policy forms notably decisions in powerful overseas nations and supranational regulation He argues that contrary to expectations the first was met with institutional inertia In contrast policy forms of internationalisation namely reforms in the US and European Union regulation played significant roles in undermining long standing national institutions The book explores the mechanisms whereby policy forms of internationalisation were influential by looking at the strategies coalitions and resources of key actors in national arenas It also shows that institutional outcomes were surprising all four countries albeit through different routes adopted increasingly similar reforms of economic institutions privatisation the ending of monopolies and delegation to independent regulatory agencies The book rejects the view that technological and economic forms of internationalisation drive institutional change It suggests that policy forms of internationalisation are more important because they become part of domestic decision making and aid the reform of well established national institutions **Domestic Politics and International Relations in**

**US-Japan Trade Policymaking** C. Meyerson,2003-10-14 To what extent does domestic politics affect the agreement reached in an international trade negotiation In order to address this question Christopher C Meyerson develops an approach to analyzing the relationship between domestic politics and international relations in trade policymaking This approach is used to analyze both American and Japanese trade policymaking and US Japan trade negotiations especially during the GATT Uruguay Round agriculture negotiations that occurred between 1986 and 1994 Meyerson not only develops an innovative approach to the analysis of the relationship between domestic politics and international relations in trade policymaking but also using publicly available GATT documents and publications US Congressional hearings and Japanese language sources provides a strong narrative description of the roles of the United States and Japan in the GATT Uruguay Round agriculture

**Preferences and Regime Change** Juan Ratto-Nielsen, 2009-12-26 This study examines the evolution of the international regime in telecommunications with the main objective of furthering our understanding of the process of regime transformation The dominant theories of international relations realism and institutional liberalism specify how states with shared interests use institutions to realize joint gains and to minimize the possibility of defection But these theories have little to say about when states will attempt to change the objectives that lead them to create the international institution in the first place The main goal of this book is to investigate and test the assumption that domestic politics by themselves can explain the dynamics of regime creation evolution and change as it happened within the International Telecommunications Union ITU      **New Frontiers in China's Foreign Relations** Allen Carlson, Ren Xiao, 2011-10-14 This book stands as a

rebuttal to any who would attempt to forward simplistic interpretations of China's rise In place of parsimonious arguments or an endorsement of any singular set of images whether pacific or confrontational it repeatedly calls attention to the remarkable complexity of China's emerging international profile More specifically the leading Chinese and American scholars working in the fields of Chinese foreign policy international political economy and national security who contributed to this volume argue that while China appears to be entering a new era in its relationship with the outside world such a development encompasses disparate even contradictory policies and as a result there is a great deal of fluidity within China's place in world politics      **Imposing, Maintaining, and Tearing Open the Iron Curtain** Mark Kramer, Vít

Smetana, 2013-11-22 The Cold War began in Europe in the mid 1940s and ended there in 1989 Notions of a global Cold War are useful in describing the wide impact and scope of the East West divide after World War II but first and foremost the Cold War was about the standoff in Europe The Soviet Union established a sphere of influence in Eastern Europe in the mid 1940s that later became institutionalized in the Warsaw Pact an organization that was offset by the North Atlantic Treaty Organization NATO led by the United States The fundamental division of Europe persisted for forty years coming to an end only when Soviet hegemony in Eastern Europe dissolved Imposing Maintaining and Tearing Open the Iron Curtain The Cold War and East Central Europe 1945 1989 edited by Mark Kramer and Vít Smetana consists of cutting edge essays by distinguished experts who discuss the Cold War in Europe from beginning to end with a particular focus on the countries that were behind the iron curtain The contributors take account of structural conditions that helped generate the Cold War

schism in Europe but they also ascribe agency to local actors as well as to the superpowers The chapters dealing with the end of the Cold War in Europe explain not only why it ended but also why the events leading to that outcome occurred almost entirely peacefully

**Neoclassical Realism, the State, and Foreign Policy** Steven E. Lobell, Norrin M. Ripsman, Jeffrey W. Taliaferro, 2009-01-15 Neoclassical realism is an important approach to international relations Focusing on the interaction of the international system and the internal dynamics of states neoclassical realism seeks to explain the grand strategies of individual states as opposed to recurrent patterns of international outcomes This book offers the first systematic survey of the neoclassical realist approach The editors lead a group of senior and emerging scholars in presenting a variety of neoclassical realist approaches to states grand strategies They examine the central role of the state and seek to explain why how and under what conditions the internal characteristics of states intervene between their leaders assessments of international threats and opportunities and the actual diplomatic military and foreign economic policies those leaders are likely to pursue

**American Crossings** Maiah Jaskoski, Arturo C. Sotomayor, Harold A. Trinkunas, 2015-12-15 US Agencies at the Mexican Border were overwhelmed in 2014 as tens of thousands of unaccompanied children arrived from Central America Unprepared to receive migrants of this particular kind the US government deployed troops to carry out a new border mission the feeding care and housing of this wave of children This event highlights the complex social economic and political issues that arise along international borders In American Crossings nine scholars consider the complicated modern history of borders in the Western Hemisphere examining them as geopolitical boundaries key locations for internal security spaces for international trade and areas where national and community identities are defined

**Regional Orders at Century's Dawn** Etel Solingen, 1998-09-13 Etel Solingen provides a comprehensive explanation of foreign policy based on how states throughout the world have confronted the rapid emergence of a global economy and international institutions A major advance in international relations theory Regional Orders at Century's Dawn skillfully uses a key issue internationalization to clarify other recent debates from the notion of a democratic peace to the relevance of security dilemmas nationalism and the impact of international institutions The author discusses in rich detail the Middle East Latin America's Southern Cone and the Korean peninsula and builds on examples drawn from almost every other region of the world As Solingen demonstrates economic liberalization with its dramatic political and economic consequences invariably attracts supporters and detractors who join in coalitions to advance their agendas Each coalition's agenda or grand strategy has consequences at all levels domestic regional and international At home coalitions struggle to define the internal allocation and management of resources and to undermine their rivals Throughout their regional neighborhoods coalitions opposing internationalization often compete for dominance sometimes militarily Coalitions favoring internationalization instead often cooperate At the global level each coalition finds support for its grand strategies from different international institutions and from competing global economic trends Solingen's concept of grand strategy proposes more than a theory of

foreign policy and explains the role of nationalism and ethno religious revivalism in the politics of liberalization      *Domestic Sources of International Environmental Policy* Elizabeth R.
