Internet Research Centers Directory Eleventh Edition:

Academic Research on the Internet William Miller, Helen Laurence, 2001-03-19 Find what you're looking for with the best Internet resources for academic research in the humanities, sciences, and social sciences. Which academic resource deserves more of your budget: printed books and journals or softly glowing terminals? The answer differs depending on the subject area, the availability and reliability of Internet information in that field, and the comparative value of Internet research and traditional print media. *Academic Research on the Internet: Options for Scholars and Libraries* gives you the information you need to make those choices. This comprehensive book examines the usability of the Internet as a scholarly research and reference tool. Each chapter provides a snapshot of Internet information access and usability in a specific subject area, comparing it to traditional print media. In addition, each chapter includes a selected webliography of key resources, a time-saving tool for librarians on the reference desk. Experts in specific subject areas provide up-to-the-minute assessments of the usefulness of the Internet for research in their fields, including Arts and Architecture, Biology, Engineering, Chemistry, Physics, and Mathematics, Music, Philosophy, English and American Literature, History, Political Science, Business, Education, Anthropology, and Sociology, Health Sciences, Public Administration, Law, Environmental Sciences, and Reference. *Academic Research on the Internet* is designed to provide the facts you need about the reliability, timeliness, and availability of Internet information. With this information, you can decide on the relative value of print subscriptions, assess the degree to which the Internet alone can satisfy users' information needs, and make intelligent choices about budget allocation.

Resources for Nursing Research Cynthia Clamp, Stephen Gough, Lucy Land, 2005-01-11 The 4th edition of this extensive text is an outstanding resource prepared by nurses and a librarian for nurses. In a structured and helpful style, it presents thousands of items from the literature, published papers, reports, books, and electronic resources as a clear, accessible, and most of all, useful collection. The efforts to signpost and lead the reader to the sought-for information are effective and well conceived, and the 'How to use this book' section is remarkably simple. The book should be found in every nursing and health library, every research institute and centre, and close to many career researchers' desks. *RCN Research: This latest edition of Resources for Nursing Research* provides a comprehensive bibliography of sources on nursing research and includes references for books, journal papers, and Internet resources. Designed to act as a signpost to available literature in the area, this Fourth Edition covers the disciplines of nursing, health care, and the social sciences. Entries are concise, informative, and accessible, and are arranged under three main sections. *Sources of Literature* covers the process of literature searching, including using libraries and other tools for accessing literature. *Methods of Inquiry* includes an introduction to research, how to conceptualize and design nursing and health research, measurement and data collection, and the interpretation and presentation of data. *The Background to Research in Nursing* encompasses the development of nursing research, the profession's responsibilities, the role of government funding, research roles and careers, and education for research. Fully revised and updated, the Fourth

Edition includes just under 3000 entries of which 90% are new It has extensive coverage of US UK literature and other international resources This new edition will be an essential guide for all those with an interest in nursing research including students teachers librarians practitioners and researchers *List of Serials and Monographs Indexed for Online Users* ,1990
