

Michael Bugeja, *INTERPERSONAL DIVIDE: THE SEARCH FOR COMMUNITY IN A TECHNOLOGICAL AGE*. New York: Oxford University Press, 2005; pp. xiv + 226, \$21.95 soft cover, ISBN: 0195173392.

Michael Bugeja's goal is to consider the effect of communication technology on our psyche, relationships, and communities. Bugeja writes in jargon-free prose that does limit citation of research. This writing style makes the work accessible to interdisciplinary readers who wish to explore how technology is shaping us and our society. Although effectively communicating with readers, it seems that Bugeja draws broad assumptions about the cumulative effect of technology on our culture and on our interpersonal interactions.

The book has nine chapters that fall into three parts. The first part, the first three chapters, considers how technology displaces us from real to virtual contexts thus impacting conscience and consciousness and then critiques the attempts of the self-help industry to manage these technological stressors. Part two, chapters 4 through 6, looks back to the impact of the telegraph and the Internet on the culture to give readers some perspective on our current technological situation. This section ends with a modern reconsideration of McLuhan's media theories through a physics paradigm. The final part of the book, chapters 7 through 9, first critiques the lack of authenticity in our media idols and in our flat, consumer lifestyles and then offers an alternative via reclaiming three-dimensional lives and communities while existing in a technological age.

Readers will benefit from the perspective offered by chapters 4 and 5 on the development and impact of the telegraph and the Internet respectively on our culture. The chapters give readers a sense of perspective into how our culture has become so enmeshed within communication technology. Chapter 6 provides astute analysis as Bugeja tempers the exuberance of McLuhan's foundational theories of media, like that of the Global Village, with a modern understanding informed by new technology. Bugeja questions McLuhan's assumptions about the extent that media are able to unite us and challenge us both cognitively and imaginatively.

A benefit of Bugeja's book is that it calls upon readers to think, to write, to discuss and to reflect about the issues it raises. At the end of each chapter Bugeja provides prompts and questions that allow readers to engage with and challenge these and other issues through reflective writing and discussion. This provides an outlet especially for readers who wish to challenge and to debate Bugeja's ideas. Additionally, Bugeja draws attention to the ethical-moral dilemmas that result from operating in virtual contexts. Specifically, most are aware of the potential for cyber-crime but

effect of mobile communication on social bonding and also examines some of the other possibly problematic issues raised by tighter social cohesion in small groups
