Pretend Play Among 3-year-olds Hermina Sinclair, 2013-05-13 translated by Hermina and Morris Sinclair This book was written by a group of researchers with a common theoretical constructivist framework and using the same methods of naturalistic observation and data analysis They considered that collective pretend play would provide excellent opportunities for understanding young children's thinking especially when play arose spontaneously in a familiar environment In such play children often manifest types of knowledge that cannot be captured through experimental work or by observation in adult devised situations Spontaneous play brings out children's own preoccupations their know how in negotiating with one another in order to make sustained play possible their ability to construct coherent sequences and their often surprising insight into adult behavior Play sequences are reported in full and sometimes dramatic detail in each of the chapters Different activities were elicited by different situations though all were observed in the familiar environment of day care centers Different situations play with toys such as cups spoons and dolls with pieces of cloth string and cardboard with grass pebbles and swings in the yard or with hand held puppets allow the authors to discover often unsuspected knowledge among three year olds communicative socio affective societal and psycho social At the same time the authors underline the similarity of the interactive construction processes The data and their analyses provide a solid base for two of Piaget's theoretical arguments peer interaction leads to collaborative processes at an early age and collaboration leads to objective knowledge via the attribution of shared meanings to jointly constructed experiences

Clinical Values Sandra Buechler, 2013-04-15 In this refreshingly honest and open book Sandra Buechler looks at therapeutic process issues from the standpoint of the human qualities and human resourcefulness that the therapist brings to each clinical encounter Her concern is with the clinical values that shape the psychoanalytically oriented treatment experience How she asks can one person evoke a range of values curiosity hope kindness courage sense of purpose emotional balance the ability to bear loss and integrity in another person and thereby promote psychological change For Buechler these core values and the emotions that infuse them are at the heart of the clinical process They permeate the texture and tone and shape the content of what therapists say They provide the framework for formulating and working toward treatment goals and keep the therapist emotionally alive in the face of the often draining vicissitudes of the treatment process *Clinical Values Emotions That Guide Psychoanalytic Treatment* is addressed to therapists young and old By focusing successively on different emotion laden values Buechler shows how one value or another can center the therapist within the session Taken together these values function as a clinical compass that provides the therapist with a sense of direction and militates against the all too frequent sense of flying by the seat of one's pants Buechler makes clear that the values that guide treatment derive from the full range of the clinician's human experiences and she is candid in relating the personal experiences from

inside and outside the consulting room that inform her own matrix of clinical values and her own clinical approach A compelling record of one gifted therapist's pathway to clinical maturity Clinical Values has a more general import It exemplifies the variegated ways in which productive clinical work of any type ultimately revolves around the therapist's ability to make the most of being all too human

Relational Psychoanalysis, Volume 14 Stephen A. Mitchell, Lewis Aron, 2013-04-15 Over the course of the past 15 years there has been a vast sea change in American psychoanalysis It takes the form of a broad movement away from classical psychoanalytic theorizing grounded in Freud's drive theory toward models of mind and development grounded in object relations concepts In clinical practice there has been a corresponding movement away from the classical principles of neutrality abstinence and anonymity toward an interactive vision of the analytic situation that places the analytic relationship with its powerful reciprocal affective currents in the foreground These developments have been evident in virtually all schools of psychoanalysis in America from the most traditional to the most radical The wellspring of these innovations is the work of a group of psychoanalysts who have struggled to integrate aspects of interpersonal psychoanalysis various British object relations theories and psychoanalytic feminism Although not self-selected as a school these theorists have generated a distinct tradition of psychoanalytic thought and clinical practice that has become extremely influential within psychoanalysis in the United States Relational Psychoanalysis The Emergence of a Tradition brings together for the first time the seminal papers of the major authors within this tradition Each paper is accompanied by an introduction in which the editors place it in its historical context and a new afterward in which the author suggests subsequent developments in his or her thinking This book is an invaluable resource for any clinical practitioner teacher or student of psychoanalysis interested in exploring the exciting developments of recent years

Narcissism and the Self R. Behrendt, 2015-02-03 The book examines how coevolved intraspecific aggression and appeasement gestures can give rise to complex social cultural and psychopathological phenomena It argues that the individual's need regulate narcissistic supplies and maintain feelings of safety is the overriding determinant of human conduct and thought in mental health and illness

Self-Preservation at the Centre of Personality Ralf-Peter Behrendt, 2020-10-06 The book discusses personality as a unified set of evolved and culturally developed structures that serves a single and definable purpose to maintain the individual s safety in the context of dyadic relationships group processes and more abstract and fluid social configurations The infant mother relationship remains the blueprint for modes of relating to the social surround at whatever level of complexity and for approximating the sense of safety originally provided by the mother The personality is organized around the need to maintain self esteem thereby preserving the individual s sense of safety and warding off deep seated paranoid anxiety which signals the potential of annihilation of the self Paranoid anxiety is the counterpart of intraspecific aggression and the potential of the group as a whole to attack and annihilate the individual Paranoid anxiety which was recognized by Melanie Klein as playing a critical role in infant development is not overcome as development proceeds but remains latent buried under layers of personality organization that are essentially concerned with sourcing recognition and approval from the social environment thereby inhibiting others aggression and guarding against annihilation of the self The

book adds to self psychology Kohut by showing how the principle of self preservation underpins all aspects of normal and abnormal character dynamics It integrates self psychology with other branches psychoanalytic theory and revives the link between psychoanalysis and ethology Ethology Lorenz Hass Eibl Eibesfeldt has provided insights into how interrelated intraspecific aggression and appeasement gestures are critically important for the evolution of social behavior in higher animals as well as for cultural evolution in humans insights that allow more generally for a bridging of the gap between psychoanalysis and the biology of social behavior Furthermore an evolutionary approach to character dynamics and related social phenomena will have important implications for understanding psychopathological vulnerabilities and self perpetuating processes in mental illness

Secularism and the Pursuit of Transcendence, Volume I Stanley E. Porter,Wendy J. Porter,2025-02-20 We live in a secular age or so we have been told Nevertheless the Christian church strongly believes that we still experience and in fact are surrounded by acts of transcendence encounters with God that often defy imagination and explanation And yet we do try to explain such phenomena whether theologically experientially biblically historically philosophically literarily or even or especially artistically These two volumes are more than just papers from a major conference on secularism and the pursuit of transcendence held at McMaster Divinity College in Hamilton Ontario They contain genuine attempts by people

deeply engaged with their secular surroundings to explain what we mean by transcendence Transcendence has been a longstanding topic among the best thinkers of this and previous ages and the same is true for these volumes which include contributions by Charles Taylor Robert Wuthnow Merold Westphal and Christina Gschwandtner but also by a wide range of others who address the question from divergent vantage points The responses vary as much as the orientations of those involved in the pursuit of defining not only what it means to live in our secular age but to be involved in the pursuit of transcendence or even to perceive the Transcendent's pursuit of us

Explorations in Human Relations Training and Research, 1967 **Human Health and Performance Risks of Space Exploration Missions** Jancy C. McPhee, John B. Charles, United States. National Aeronautics and Space Administration, 2009 **Coparticipant Psychoanalysis** John Fiscalini, 2007-08-01

Traditionally two clinical models have been dominant in psychoanalysis the classical paradigm which views the analyst as an objective mirror and the participant observation paradigm which views the analyst as an intersubjective participant observer According to John Fiscalini an evolutionary shift in psychoanalytic consciousness has been taking place giving rise to coparticipant inquiry a third paradigm that represents a dramatic shift in analytic clinical theory and that has profound clinical implications Coparticipant inquiry integrates the individualistic focus of the classical tradition and the social focus of the participant observer perspective It is marked by a radical emphasis on analysts and patients analytic equality emotional reciprocity psychic symmetry and relational mutuality Unlike the previous two paradigms coparticipant inquiry suggests that we are all inherently communal beings and yet are simultaneously innately self fulfilling unique individuals The book looks closely at the therapeutic dialectics of the personal and interpersonal selves and discusses narcissism the perversion of the self within its clinical role as the neurosis that contextualizes all other neuroses Thus the goal of this book is to define coparticipant inquiry articulate its major principles analyze its implications for a theory of the self and the treatment of narcissism and discuss the therapeutic potential of the coparticipant field and the coparticipant nature of transference resistance therapeutic action and analytic vitality Fiscalini explores analytic space which marks the psychic limit of coparticipant activity the living through process which he suggests subtends all analytic change and openness to singularity which is essential to analytic vitality Coparticipant Psychoanalysis brings crucial insights to clinical theory and practice and is an invaluable resource for psychoanalysts and therapists as well as students and practitioners of psychology psychiatry and social work

Cognition and Psychotherapy M.J. Mahoney, 2013-11-11 For almost three millennia philosophy and its more pragmatic offspring psychology and the cognitive sciences have struggled to understand the complex principles reflected in the patterned operations of the human mind What is knowledge How does it relate to what we feel and do What are the fundamental processes underlying attention perception intention learning memory and consciousness How are thought feeling and action related and what are the practical implications of our current knowledge for the everyday priorities of parenting education and counseling Such meaningful and fascinating questions lie at the heart of contemporary

attempts to build a stronger working alliance among the fields of epistemology theories of knowledge the cognitive sciences and psychotherapy The proliferation and pervasiveness of what some have called cognitivism throughout all quarters of modern psychology represent a phenomenon of paradigmatic proportions The re emergence of cognitive concepts and perspectives whether portrayed as revolutionary reactive or evolutionary developmental in nature marks what may well be the single most formative theme in late twentieth century psychology Skeptics of the cognitive movement if it may be so called can readily note the necessary limits and liabilities of naive forms of metaphysics and mentalism The history of human ideas is writ large in the polarities of in here and out there from Plato Pythagoras and Kant to Locke Bacon and Watson
