Jackson, R. J. Davis, 1997-01-28 Enhanced sensitivity radio telescopes are producing dramatic results An international conference was held in Jodrell Bank to take stock of these advances This timely volume presents the review articles presented by a host of world experts who gathered at this meeting We are shown how high sensitivity is advancing our understanding in radio spectral line analysis radio continuum observations of galaxies cosmology pulsars and radio emission from stars what new and enhanced instruments are now available and those planned for the future This volume provides graduate students and researchers with an up to date and wide ranging review of the new and future research possible with high sensitivity radio telescopes Science with the VLT Jeremy Walsh, Ivan J. Danziger, 2013-06-05 ESO's new and exciting telescope the VLT in Chile will certainly bring a host of new results in optical astronomy for the years to come This workshop surveys a large variety of possible observations and the needed instrumentation It is an exciting overview of front research in astronomy rarely published before The book covers the whole gamut of optical IR astronomy from the solar system search for planets in nearby stars physics of galactic stars and clusters galactic structure structure of nearby galaxies AGN and quasars clusters of galaxies to large structure and cosmology Furthermore it summarizes the two panel discussions
