How Jews and Christians Interpret Their Sacred Texts Charles David Isbell, 2014-08-18 How Jews and Christians Interpret Their Sacred Texts is a comparative textual study that demonstrates the connections between the Hebrew Scriptures sacred to both Judaism and Christianity and the Jewish Talmud and Christian New Testament which respectively became the bases for all modern systems of the two faiths Even as official interpretations changed from plain sense to more elaborate explications commentators in both faith systems continued to hold to the position that their conclusions were not only based firmly upon the initial authoritative text but were in fact the natural extension and continuation of it To describe these classical and early post classical appropriations Isbell discusses the transvaluation of texts or efforts to retain the core values of authoritative sacred texts that are bound to specific times and situations while seeking to extrapolate from these ancient documents meanings that are relevant to current faith and praxis As Isbell shows transvaluation presupposes both the freedom and the necessity of reinterpreting perceived timeless teachings in light of historical theological sociological and political developments that occurred long after the composition of the texts themselves **Interpreting the Truth** L.

William Countryman, 2003-10-01 Using the model of reading other people's mail L William Countryman proposes that we read the letters of the New Testament as an ongoing conversation between the text itself and the modern interpreter and the community

Spirituality: A Guide for the Perplexed Philip Sheldrake, 2014-09-25 Spirituality is a word that is used increasingly these days yet it is often ill defined What exactly is spirituality Is it distinct from religion and can we separate it from beliefs and traditions Does spirituality mainly focus on spiritual experiences and practices or is it something more This book suggests that while there may be common features in the use of the word spirituality is not a single reality Different spiritualities reflect particular religious or philosophical viewpoints as well as the cultural contexts in which they arise and develop Spirituality A Guide for the Perplexed provides students and general readers with a reliable and comprehensive guide to spirituality as an area of study religiously historically philosophically and in the social sciences It explores the tools that are used to study the subject and to interpret spiritual classics whether these are written texts or other forms such as art from different times and cultures Attention is paid to spirituality in a variety of religious and non religious forms in their own terms and comparatively However for the sake of simplicity greatest attention is given to the study of spirituality within a religious perspective with illustrations drawn from texts personalities and themes associated with five major world religions Judaism Christianity Islam Hinduism and Buddhism The book concludes with an exploration of spirituality in contemporary

perspective in particular how spirituality is currently employed in areas such as health care education and business among other examples **Reading Gandhi** Surjit Kaur Jolly,2006 **Preaching Biblical Texts** Fredrick Carlson

Tetsugaku Companion to Ogyu Sorai W.J. BOOT, Daiki TAKAYAMA, 2019-10-22 This book contains short analyses kaidai of Ogy Sorai s 1666 1728 most important works as well as a biography and a number of essays The essays explore various aspects of his teachings of the origins of his thought and of the reception of his ideas in Japan China and Korea before and after modernization struck in the second half of the nineteenth century Ogy Sorai has come to be considered the pivotal thinker in the intellectual history of Early Modern Japan More research has been done on Sorai than on any other Confucian thinker of this period This book disentangles the modern reception from the way in which Sorai s ideas were understood and evaluated in Japan and China in the century following his death The joint conclusion of the research of a number of the foremost specialists in Japan Taiwan and the West is that Sorai was and remains an original innovative and important thinker but that his position within East Asian thought should be redefined in terms of the East Asian tradition to which he belonged and not in the paradigms of European History of Philosophy or Intellectual History The book represents up to date scholarship and allows both the young scholar to acquaint himself with Sorai and the intellectual historian to compare Sorai with other thinkers of other times and of other philosophical traditions Hermeneutics and the Problem of Translating Traditional Arabic Texts Alsayed M. Aly Ismail, 2017-08-21 This book focuses on the problematic issues arising when translating and interpreting classical Arabic texts which represent a challenging business for many scholars especially with regards to religious texts Additionally the reception of these interpretations and translations not only informs the perception of Muslims and their awareness of the outside world but also impacts the vision and perception of non Muslims of Islam and the Muslim world Consequently this book reconsiders the concepts of understanding and interpretation and their nexus in the mechanism of translation and proposes a novel hermeneutic method of translating interpreting and understanding traditional and classical Arab texts Handling the issues of understanding from a hermeneutical perspective is shown here to remove the possibility of translation and interpretation rendering a distorted translated text Drawing on the powerful interpretive theories of Hans Georg Gadamer and Martin Heidegger the hermeneutic method of translation starts from a premise that the meaning of a classical text cannot be deduced solely by linguistic analysis of its words but requires in depth investigation of the invisible contextual elements that control and shape its meaning Traditional texts are seen in this model

as travelling texts whose meaning is transformed across time and space The hermeneutic method of translation allows the translator to identify those elements from the real world that informed a classical text at the time of its writing so that it can be adapted and made relevant to its contemporary context Traditional texts can enlighten our minds and cultivate our souls religious texts can elevate our behavior and thinking and help refine our confused contemporary lives When texts become isolated from their world they lose this lofty goal of enlightenment and elevation
