Michael Aston,2002-09-11 Most places in Britain have had a local history written about them Up until this century these histories have addressed more parochial issues such as the life of the manor rather than explaining the features and changes in the landscape in a factual manner Much of what is visible today in Britain s landscape is the result of a chain of social and natural processes and can be interpreted through fieldwork as well as from old maps and documents Michael Aston uses a wide range of source material to study the complex and dynamic history of the countryside illustrating his points with aerial photographs maps plans and charts He shows how to understand the surviving remains as well as offering his own explanations for how our landscape has evolved *Reading Ancient Objects Inside Out: Greek Figure-Decorated Pottery in Portugal* Rui Morais,Delfim Leão,Maria de Fátima Silva,Daniela Ferreira,David Wallace-Hare,2024-12-12 Collected papers examine ancient Greek vases in Portugal through two approaches scripta explores mythological literary and cultural themes while eikon provides an iconographic analysis The study includes vases from Myths Gods and Heroes and others of historical importance including non figurative examples **Ceramics in the Victorian Era** Rachel Gotlieb,2023-06-29 This book

broadens the discussion of pottery and china in the Victorian era by situating them in the national imperial design reform and domestic debates between 1840 and 1890 Largely ignored in recent scholarship *Ceramics in the Victorian Era Meanings and Metaphors in Painting and Literature* argues that the signification of a pot a jug or a tableware pattern can be more fully discerned in written and painted representations Across five case studies the book explores a rhetoric and set of conventions that developed within the representation of ceramics emerging in the late 18th century and continuing in the Victorian period Each case study begins with a textual passage exemplifying the outlined theme and closes with an object analysis to demonstrate how the fusing of text image and object are critical to attaining the period eye in order to better understand the metaphorical meanings of ceramics Essential reading not only for ceramics scholars but also those of material culture the book mines the rich and diverse archive of Victorian painting and literature from the avant garde to the sentimental from the well known to the more obscure to shed light on the at once complex and simple implications of ceramics agencies at this time

Cogs, Cargoes and Commerce Pontifical Institute of Mediaeval Studies, 2002 Using a wide range of new or previously ignored sources the authors of this volume challenge a number of long established patterns of thought in medieval historiography Focusing attention firmly on the basic commodities of everyday life rather than on objects of more or less conspicuous consumption the articles shed light on new and important aspects of the expansion of trade in northern Europe

between 1150 and 1400 Eight of the articles deal with trade transport and volumes of one or more of the most important bulk commodities of the period and the ninth is dedicated to the development of the most important means of transport the cargo ship

Something Out of the Ordinary? Interpreting Diversity in the Early Neolithic Linearbandkeramik and Beyond Luc Amkreutz, Fabian Haack, Daniela Hofmann, 2016-04-26 More than 7000 years ago groups of early farmers the Linearbandkeramik or LBK spread over vast areas of Europe Their cultural characteristics comprised common choices and styles of execution with a central meaning and functionality attached to doing things a certain way over an enormous geographical area However recent evidence suggests that the reality was much more varied and diverse The central question of this book is the extent to which notions of uniformity and diversity have caused a wider shift in archaeological perspective Using the LBK case study as a starting point the volume brings together contributions by international specialists tackling the notion of cultural diversity and its explanatory power in archaeological analysis more generally Through discussions of the domestic architecture stone tool inventory pottery traditions landscape use and burial traditions of the LBK this book provides a crucial reappraisal of the culture s potential for adaptability and change Papers in the second part of the volume are devoted to archaeological case studies from around the globe in which the tension between diversity and uniformity has also proved controversial including the Near Eastern Halaf culture the North American Mississippian the Pacific expansion of the Lapita culture and the European Bell Beaker phenomenon All provide exciting theoretical and methodological contributions on how the appreciation of cultural diversity as a whole can be moved forward These papers expose diversity and uniformity as cultural strategies and as such provide essential reading for scholars in archaeology and anthropology and for anyone interested in the interplay between material culture and human social change
