Daniel Lassiter, 2006-07-19 Represents the latest advances of the role of psychological factors in inducing potentially unreliable self incriminating behavior Chapters are authored by a diverse group psychologists criminologists and legal scholars who have contributed significantly to the collective understanding of the pressures that insidiously operate when the goal of law enforcement is to elicit self incriminating behavior from suspected criminals Reviews and analyzes the extant literature in this area as well as discussing how this knowledge can be used to help bring about needed changes in the legal system

Interrogations, Confessions, and Entrapment G. Daniel Lassiter, 2014-01-15 **Police Interrogation and American Justice** Richard A. How the Police Generate False Confessions James L. Trainum, 2016-07-15 Despite the rising number of confirmed false confession cases most people have a hard time grasping why someone would confess to a crime they did not commit or even why a guilty person would admit to something that could put them in jail for life How the Police Generate False Confessions takes you inside the interrogation room exposing the tactics that law enforcement uses to make confessions happen James L Trainum reveals how innocent people can become suspects and then confessed criminals even when they have not committed a crime Using real stories he looks at the inherent coerciveness of the interrogation process and why so many false confessions contain so many of the details that only the true perpetrator would know More disturbingly the book examines how these same processes corrupt witness and victim statements create lying informants and cooperators and induce innocent people to plead guilty Trainum also offers recommendations for change in the U S by looking at how other countries are changing the process to prevent such miscarriages of justice The reasons that people falsely confess can be complex and varied throughout How the Police Generate False Confessions Trainum encourages readers to critically evaluate confessions on their own by gaining a better understanding of the interrogation process

Understanding Police Interrogation William Douglas Woody, Krista D. Forrest, 2020-03-03 Uses techniques from psychological science and legal theory to explore police interrogation in the United States Understanding Police Interrogation provides a single comprehensive source for understanding issues relating to police interrogation and confession It sheds light on the range of factors that may influence the outcome of the interrogation of a suspect which ones

make it more likely that a person will confess and which may also inadvertently lead to false confessions There is a significant psychological component to police interrogations as interrogators may try to build rapport with the suspect or trick them into thinking there is evidence against them that does not exist Also important is the extent to which the interrogator is convinced of the suspect's guilt a factor that has clear ramifications for today's debates over treatment of black suspects and other people of color in the criminal justice system The volume employs a totality of the circumstances approach arguing that a number of integrated factors such as the characteristics of the suspect the characteristics of the interrogators interrogation techniques and location community perceptions of law enforcement and expectations for jurors and judges all contribute to the nature of interrogations and the outcomes and perceptions of the criminal justice system The authors argue that by drawing on this approach we can better explain the likelihood of interrogation outcomes including true and false confessions and provide both scholars and practitioners with a greater understanding of best practices going forward
