Jon V. Kofas

Intervention And Underdevelopment:

Intervention and Underdevelopment Jon V. Kofas, 1989-09-15 This ground breaking study by Jon Kofas provides an insightful analysis of the American aid program that determined the political and economic configuration of postwar Greece. Kofas's analysis however is equally significant for United States history because it was on Greek soil that American counterinsurgency pacification and containment tactics were evolved, tested and later applied elsewhere in the Third World. Those who seek meaningful reappraisal rather than beguiling rationalization might well begin with this study solidly grounded on all available sources. It presents a revisionist perspective regarding both the economic and the political development of Greece under American tutelage. The declared objective of the economic aid was to avoid restructuring of the Greek economy and to preserve Greece as an exporter of raw materials and an importer of manufactured goods. Kofas asserts that an alternative program similar to that of the northern Balkan countries was feasible and that failure to undertake such a program is vulnerable to today's Greek economy. Likewise in the political realm, Kofas rejects the Washington dogma that Greece has to be in either the Soviet or the American camp and therefore must be in the latter. Kofas proposes as a plausible alternative a social demographic regime that in addition to socioeconomic reforms at home could have pursued abroad a pro Greek rather than a pro Soviet or pro American course. The victory of the American supported forces in Greece obscured this alternative vision for decades. Yet it was persistently propounded in the face of discouraging odds by a variety of centrist and leftist leaders. With the coming to office of Andreas Papandreou, this vision has become official policy in Athens. Furthermore, assorted versions of this alternative strategy are cropping up globally, which is the underlying reason why the Third World today is out of control. And also why superpower doctrines and projects not recognizing this indisputable and irreversible fact are experiencing difficulties as embarrassing as they are predictable. Hence the broad significance of this thoughtful and thought provoking study. From the Foreword by L. S. Stavrianos. Intervention and Underdevelopment Jon V. Kofas, 1986

Reshaping Regional Policy Harry Ward Richardson, Chang-Hee Christine Bae, Sang-Chul Choe, 2011-01-01 The book first examines some radical new directions in Korea's regional policies instigated by the newly established permanent Presidential Commission of Regional Development. The existing nine provinces and seven Special Cities i.e. metropolitan areas will yield considerable power and budget authority to seven new mega regions. Many of the ideas behind the new policies such as territorial cohesion, regional innovation and regional competitiveness were inspired from abroad, especially Europe. There are also changes at the lower urban scale to modify Korea's traditional top down strategies. Previous policies named balanced national development were targeted at undermining Seoul by redistributing activities including government to other parts of the country under the zero sum game assumption. The new policies aim to benefit both the Capital Region and other mega regions under a win win assumption. The book evaluates these approaches. Original contributions from some of the field's foremost scholars including Sang Chul Choe, Sir Peter Hall, Andreas Faludi, Michael Storper, Takashi Onishi, Maryann
