McMahan, Kim Lacy Rogers, 2013-10-16 The essays in this anthology represent in the broadest sense an interpretive perspective of inquiry that has flourished in oral history for the past 15 years This perspective considers oral history interviews as subjective socially constructed and emergent events that is understanding interpretation and meaning of lived experience are interactively constructed The impetus for this volume was the editor's fascination with the multifaceted complexity of the oral history interview method coupled with the belief that despite many books that address methodological issues no single work takes as its focus those complex interactive processes which constitute the oral history interview The editors purpose in developing this anthology therefore was to provide a variety of essays which taken together address the possibilities and constraints inherent in oral history interviewing **All Roads Lead to Baghdad** Charles Harry Briscoe, 2006 By Charles H Briscoe et al Tells the story of Iraqi Freedom the second Army Special Operations ASO campaign in America's Global War on Terrorism Shows how the ASO supported a US led conventional air and ground offensive to collapse the regime of Saddam Hussein and capture Baghdad Includes bibliographical references Tiger Check Steven A. Fino, 2017-11-01 How did American fighter pilots respond to the challenges posed by increasing automation Spurred by their commanders during the Korean War to be tigers aggressive and tenacious American fighter pilots charged headlong into packs of fireball spewing enemy MiGs relying on their keen eyesight piloting finesse and steady trigger fingers to achieve victory But by the 1980s American fighter pilots vanquished their foes by focusing on a four inch square cockpit display manipulating electromagnetic waves and launching rocket propelled guided missiles from miles away In this new era of automated long range air combat can fighter pilots still be considered tigers Aimed at scholars of technology and airpower aficionados alike Steven A Fino's Tiger Check offers a detailed study of air to air combat focusing on three of the US Air Force's most famed aircraft the F 86E Sabre the F 4C Phantom II and the F 15A Eagle Fino argues that increasing fire control automation altered what fighter pilots actually did during air to air combat Drawing on an array of sources as well as his own decade of experience as an F 15C fighter pilot Fino unpacks not just the technological black box of fighter fire control equipment but also fighter pilots attitudes toward their profession and their evolving aircraft He describes how pilots grappled with the new technologies acutely aware that the very systems that promised to simplify their jobs while increasing their lethality in the air also threatened to rob them of the quintessential albeit mythic fighter pilot experience Finally Fino explains that these new systems often required new unique skills that took time for the pilots to identify and then develop Eschewing the typical great machine or great pilot perspectives that dominate aviation historiography Tiger Check provides a richer perspective on humans and machines

working and evolving together in the air The book illuminates the complex interactions between human and machine that accompany advancing automation in the workplace Qualitative Research Interviewing Tom Wengraf,2001-06-25 This text provides a comprehensive resource for those concerned with the practice of semi structured interviewing the most commonly used interview approach in social research and in particular for depth biographic narrative interviewing the interview methods of choice in qualitative research The New Urban Park Hal Rothman,2004 From Yellowstone to the Great Smoky Mountains America s national parks are sprawling tracts of serenity most of them carved out of public land for recreation and preservation around the turn of the last century America has changed dramatically since then and so has its conceptions of what parkland ought to be In this book one of our premier environmental historians looks at the new phenomenon of urban parks focusing on San Francisco s Golden Gate National Recreation Area as a prototype for the twenty first century Cobbled together from public and private lands in a politically charged arena the GGNRA represents a new direction for parks as it highlights the long standing tension within the National Park Service between preservation and recreation Long a center of conservation the Bay Area was well positioned for such an innovative concept Writing with insight and wit Rothman reveals the many complex challenges that local leaders politicians and the NPS faced as they attempted to administer sites in this area He tells how Representative Phillip Burton guided a comprehensive bill through Congress to establish the park and how he and others expanded the acreage of the GGNRA redefined its mission to the public forged an identity for interconnected parks and struggled against formidable odds to obtain the San Francisco Presidio and convert it into a national park Engagingly written The New Urban Park offers a balanced examination of grassroots politics and its effect on municipal state and federal policy While most national parks dominate the economies of their regions GGNRA was from the start tied to the multifaceted needs of its public and political constituents including neighborhood ethnic and labor interests as well as the usual supporters from the conservation movement As a national recreation area GGNRA helped redefine that category in the public mind By the dawn of the new century it had already become one of the premier national park areas in terms of visitation Now as public lands become increasingly scarce GGNRA may well represent the future of national parks in America Rothman shows that this model works and his book will be an invaluable resource for planning tomorrow s parks
