The Neutered Mother, The Sexual Family and Other Twentieth Century Tragedies

Martha Albertson Fineman, 2014-04-04 Calling for nothing less than a radical reform of family law and a reconception of intimacy The Neutered Mother The Sexual Family and Other Twentieth Century Tragedies argues strongly against current legal and social policy discussions about the family because they do not have at their core the crucial concepts of caregiving and dependency as well as the best interests of women and children The Neutered Mother scrutinizes the definitions of family and mother throughout the volume while paying close attention to issues of race class and sexuality In addition Fineman convincingly contests society's refusal to dignify support and respond to the needs of caregivers and illustrates the burden they must bear due to this treatment This book is a crucial step toward defining America's most pressing social policy problems having to do with women motherhood and the family

Immigration and Democracy Sarah Song, 2018-10-31 Immigration is one of the most polarizing issues in contemporary politics It raises questions about identity economic well being the legitimacy of state power and the boundaries of membership and justice How should we think about immigration and what policies should democratic societies pursue Some contend that borders should generally be open and people should be free to migrate in search of better lives Others insist that governments have the right to unilaterally close their borders and should do so In Immigration and Democracy

Sarah Song develops an intermediate ethical position that takes seriously both the claims of receiving countries and the claims of prospective migrants. She argues that political membership is morally significant even if morally arbitrary. Political membership grounds particular rights and obligations and a government may show some partiality toward the interests of its members. Yet we also have universal obligations to those outside our borders. Where prospective migrants have urgent reasons to move as in the case of refugees their interests may trump the less weighty interests of members. What is required is not open or closed borders but open doors. An accessible ethical framework that clarifies and deepens the ideas with which members of democratic societies can debate immigration. *Immigration and Democracy* considers the implications of a realistically utopian theory for immigration law and policy. [Children, Families, and Health Care Decision Making](#) Lainie Friedman Ross, 2002. *ISSUES IN BIOMEDICAL ETHICS* General Editors John Harris University of Manchester Soren Holm University of Manchester Consulting Editor Ranaan Gillon Director Imperial College Health Service London North American Consulting Editor Bonnie Steinbock Professor of Philosophy SUNY Albany. The late twentieth century has witnessed dramatic technological developments in biomedical science and the delivery of health care and these developments have brought with them important social changes. All too often ethical analysis has lagged behind these changes. The purpose of this series is to provide lively up to date and authoritative studies for the increasingly large and diverse readership concerned with issues in biomedical ethics not just health care trainees and professionals but also social scientists philosophers lawyers social workers and legislators. The series will feature both single author and multi author books short and accessible enough to be widely read each of them focused on an issue of outstanding current importance and interest. Philosophers doctors and lawyers from several countries already feature among the contributors to the series. It promises to become the leading channel for the best original work in this burgeoning field. This book Lainie Friedman Ross presents an original and controversial examination of the moral principles that guide parents in making health care decisions for their children and the role of children in the decision making process. She opposes the current movement to increase child autonomy in favour of respect for family autonomy. She argues that children should be included in the decision making process but that parents should be responsible for their children's health care even after the children have achieved some threshold level of competency. The first half of the book presents and defends a model of decision making for children's health care the second half shows how it works in various practical contexts considering children as research subjects and as patients organ donorship and issues relating to adolescent sexuality. Implementation of Ross's model would result in significant changes in what informed consent allows and requires for paediatric health care decisions. This is the first systematic medical ethics book that focuses specifically on children's health care. It has important things to say to health care providers who work with children as well as to ethicists and public policy analysts. **Intimacy in Illegality** Flaminia Bartolini, 2021-01-12. How do migrant women living in illegality build intimate relationships? How do they experience resist or take advantage of the tight

link between intimacy and migration status created by the German migration legislation Drawing on rich biographical accounts and ethnographic methods the book offers an insightful and sensitive look at a mostly unknown aspect of life in illegality Adopting a critical feminist perspective Flaminia Bartolini shows how intimacy should be understood in its intrinsic power dimension and looks critically at the German migration regime and on its effects on migrants lives **Saviour Siblings** Michelle Taylor-Sands,2013-10-30 Genetic screening technologies involving pre implantation genetic diagnosis PGD raise particular issues about selective reproduction and the welfare of the child to be born How does selection impact on the identity of the child who is born Are children who are selected for a particular purpose harmed or treated as commodities How far should the state interfere with parents reproductive choices Currently concerns about the welfare of the child in selective reproduction have focused on the individual interests of the child to be born This book re evaluates the welfare of the child through the controversial topic of saviour sibling selection Drawing on relational feminist and communitarian ethics Michelle Taylor Sands argues that the welfare of the child to be born is inextricably linked with the welfare of his her family The author proposes a relational model for selective reproduction based on a broad conception of the welfare of the child that includes both individual and collective family interests By comparing regulation in the UK and Australia the book maps out how law and policy might support a relational model for saviour sibling selection With an interdisciplinary focus Saviour Siblings A Relational Approach to the Welfare of the Child in Selective Reproduction will be of particular interest to academics and students of bioethics and law as well as practitioners and policymakers concerned with the ethics of selective reproduction *Congruence in Contact-Induced Language Change* Juliane Besters-Dilger,Cynthia Dermarkar,Stefan Pfänder,Achim Rabus,2014-01-31 Modern contact linguistics has primarily focused on contact between languages that are genetically unrelated and structurally distant This compendium of articles looks instead at the effects of pre existing structural congruency between the affected languages at the time of their initial contact using the Romance and Slavic languages as examples In contact of this kind both genetic and typological similarities play a part Families of Virtue Erin M. Cline,2015-05-05 Families of Virtue articulates the critical role of the parent child relationship in the moral development of infants and children Building on thinkers and scientists across time and disciplines from ancient Greek and Chinese philosophers to contemporary feminist ethicists and attachment theorists this book takes an effective approach for strengthening families and the character of children Early Confucian philosophers argue that the general ethical sensibilities we develop during infancy and early childhood form the basis for nearly every virtue and that the parent child relationship is the primary context within which this growth occurs Joining these views with scientific work on early childhood Families of Virtue shows how Western psychology can reinforce and renew the theoretical underpinnings of Confucian thought and how Confucian philosophers can affect positive social and political change in our time particularly in such areas as paid parental leave breastfeeding initiatives marriage counseling and family therapy **Families, Violence And Social Change** McKie,

Linda, 2005-03-01 This comprehensive analysis on abuse committed in the home provides insights at both the micro and macro levels The book combines legal and social science approaches in a way that makes it essential reading for anyone studying or working on violence related issues Kev t Nousiainen University of Helsinki Johanna Niemi Kiesil inen University of Ume and Anu Pylkk nen University of Helsinki This excellent book offers a timely intervention into debates about violence Whilst most debates still focus on the spectacular rather than mundane forms of violence Linda McKie uses a synthesis of legal sociological and feminist research to show how current debates fail to deal with the violence that underpins our lives Prof Beverley Skeggs University of London An exciting new addition to the series this book tackles assumptions surrounding the family as a changing institution and supposed haven from the public sphere of life It considers families and social change in terms of concepts of power inequality gender generations sexuality and ethnicity Some commentators suggest the family is threatened by increasing economic and social uncertainties and an enhanced focus upon the individual This book provides a resume of these debates as well as a critical review of the theories of family and social change Charts social and economic changes and their impact on the family Considers the prevalence and nature of abuse within families Explores the relationship between social theory families and changing issues in familial relationships Develops a theory of social change and families through a critical and pragmatic stance Key reading for undergraduate students of sociology reading courses such as family gender health criminology and social change

Reimagining Rapport Zane Goebel, 2021 To do ethnography a researcher must have rapport with research subjects But what is rapport Ethnography and ethnographic methods have increasingly become a feature of social inquiry in general and sociolinguistics in particular and rapport is generally considered a prerequisite for fieldwork And yet unlike related terms such as communication and phatic communion this concept has remained largely unexamined Reimagining Rapport turns a critical eye to the use of the term rapport across disciplines The collection analyzes the very idea of rapport both exploring how it has been shaped by historical forces and actors within sociocultural anthropology and questioning its usefulness Rather than viewing the term as simply denoting a type of positive social relationship that needs to be formed between researcher and consultant before research can begin this book invites us to reimagine rapport theoretically methodologically and meta methodologically Zane Goebel and other leading sociolinguists challenge readers to think about how rapport has been constructed within these disciplines and ultimately to see rapport as an emergent co constructed social relationship that is actively built during situated multimodal encounters The contributors collectively examine the role of ideology and mediation in the construction of rapport and argue that reconceptualizing research subject relationships is essential for establishing more sophisticated ways of understanding interpreting and representing research context A valuable resource for scholars and students of sociolinguistics and linguistic anthropology as well as for others engaged in ethnographic fieldwork Reimagining Rapport is the first collection to provide an in depth investigation of this critically important but previously unexamined concept
