Archaeological Landscapes of the Near East Tony J. Wilkinson, 2003-11 Many fundamental studies of the origins of states have built upon landscape data, but an overall study of the Near Eastern landscape itself has never been attempted. Spanning thousands of years of history, the ancient Near East presents a bewildering range of landscapes, the understanding of which can greatly enhance our ability to infer past political and social systems. Tony Wilkinson now shows that throughout the Holocene, humans altered the Near Eastern environment so thoroughly that the land has become a human artifact, albeit one that retains the power to shape human societies. In this trailblazing book, the first to describe and explain the development of the Near Eastern landscape using archaeological data, Wilkinson identifies specific landscape signatures for various regions and periods from the early stages of complex societies in the fifth to sixth millennium B.C. to the close of the Early Islamic

period around the tenth century A D From Bronze Age city states to colonized steppes these signature landscapes of irrigation systems tells and other features changed through time along with changes in social economic political and environmental conditions By weaving together the record of the human landscape with evidence of settlement the environment and social and economic conditions Wilkinson provides a holistic view of the ancient Near East that complements archaeological excavations cuneiform texts and other conventional sources Through this overview culled from thirty years research Wilkinson establishes a new framework for understanding the economic and physical infrastructure of the region By describing the basic attributes of the ancient cultural landscape and placing their development within the context of a dynamic environment he breaks new ground in landscape archaeology and offers a new context for understanding the ancient Near East

Sanctified Landscape David Schuyler, 2012-04-06 The Hudson River Valley was the first iconic American landscape Beginning as early as the 1820s artists and writers found new ways of thinking about the human relationship with the natural world along the Hudson Here amid the most dramatic river and mountain scenery in the eastern United States Washington Irving and James Fenimore Cooper created a distinctly American literature grounded in folklore and history that contributed to the emergence of a sense of place in the valley Painters led by Thomas Cole founded the Hudson River School widely recognized as the first truly national style of art As the century advanced and as landscape and history became increasingly intertwined in the national consciousness an aesthetic identity took shape in the region through literature art memory and folklore even gardens and domestic architecture In Sanctified Landscape David Schuyler recounts this story of America's idealization of the Hudson Valley during the nineteenth and early twentieth centuries Schuyler's story unfolds during a time of great change in American history At the very moment when artists and writers were exploring the aesthetic potential of the Hudson Valley the transportation revolution and the rise of industrial capitalism were transforming the region The first generation of American tourists traveled from New York City to Cozzens Hotel and the Catskill Mountain House in search of the picturesque Those who could afford to live some distance from jobs in the city built suburban homes or country estates Given these momentous changes it is not surprising that historic preservation emerged in the Hudson Valley the first building in the United States preserved for its historic significance is Washington's Headquarters in Newburgh Schuyler also finds the seeds of the modern environmental movement in the transformation of the Hudson Valley landscape Richly illustrated and compellingly written Sanctified Landscape makes for rewarding reading Schuyler expertly ties local history to national developments revealing why the Hudson River Valley was so important to nineteenth century Americans and why it is still beloved today

Landscape... ? Gareth Doherty, Charles Waldheim, 2015-10-08 Is Landscape surveys multiple and myriad definitions of landscape Rather than seeking a singular or essential understanding of the term the collection postulates that landscape might be better read in relation to its cognate terms across expanded disciplinary and professional fields The publication pursues the potential of multiple provisional working definitions of landscape to both disturb and develop received understandings of landscape architecture These definitions distinguish between landscape as representational medium academic discipline and professional identity Beginning with an inquiry into the origins of the term itself *Is Landscape* features essays by a dozen leading voices shaping the contemporary reading of landscape as architecture and beyond
