Liability J P and Roland Robertson Nettl, Peter W. Huber, 1968-01-01 **Systems, Relations, and the Structures of International Societies** Jack Donnelly, 2023-11-02 Argues that systems approaches are necessary in order to identify and understand important features of the world **A Society for International Development** Ann Mattis, Society for International Development, 1983 A collection of studies that examines the current problems of world development in light of the past twenty five years but goes also beyond an examination of that experience to project practical and workable plans for the future **From International to World Society?** Barry Buzan, 2004-02-26 Barry Buzan offers an extensive and long overdue critique and reappraisal of the English school approach to International Relations Starting on the neglected concept of world society and bringing together the international society tradition and the Wendtian mode of constructivism Buzan offers a new theoretical framework that can be used to address globalisation as a complex political interplay among state and non state actors This approach forces English school theory to confront neglected questions about both its basic concepts and assumptions and about the constitution of society in terms of what values are shared how and why they are shared and by whom Buzan highlights the idea of primary institutions as the central contribution of English school theory and shows how this both differentiates English school theory from realism and neoliberal institutionalism and how it can be used to generate distinctive comparative and historical accounts of international society **Information Systems And Technologies For Network Society: Proceedings Of The Ipsj International Symposium** Yahiko Kambayashi, Yoshifumi Masunaga, Makoto Takizawa, Yuichiro Anzai, 1997-09-09 This volume contains technical papers and panel position papers selected from the proceedings of the International Symposium on Information Systems and Technologies for Network Society held together with the IPSJ information processing society of Japan National Convention in September 1997 Papers were submitted from all over the world especially from Japan Korea and China Since these countries are believed to form one of the major computer manufacturing centers in the world a panel on Computer Science Education for the 21st Century was set up A special session on the Japanese project on Software Engineering invited representative researchers from the project which is supported by the Ministry of Education Japan Beyond the Anarchical Society Edward Keene, 2002-07-11 Edward Keene argues that the conventional idea of an anarchical society of equal and independent sovereign states is an inadequate description of order in modern world politics International political and legal order has always been dedicated to two distinct goals to try to promote the toleration of different ways of life while advocating the adoption of one specific way that it labels civilization The nineteenth century solution to this contradiction was to restrict the promotion of civilization to the world beyond Europe That discriminatory way of thinking has now broken down with the result that a single global order is supposed to apply to everyone but opinion is still very much divided as to what the ultimate purpose of this global order should be and how its political and legal structure should be organised International System Klaus Eugen Knorr, Sidney
