

Sample Literature Review

Contributed by Susan McKenna and Marcia Curtis

This is the sort of literature review that might be incorporated into an analytical essay. In this case, it is a sample literature review written for an essay on Lee Silver's *Remaking Eden: How Genetic Engineering and Cloning Will Transform the American Family*. This essay examines Silver's claims that the advance of genetic engineering is inevitable, due to consumer demand for it as a technology and the unrelenting curiosity of scientists. The writer of this essay places consumer demand within the larger context of public opinion and surveys contemporary cloning films, as well as the literature on those films, to determine the degree to which popular attitudes toward reprobogenetics support scientific advancement in this field.

In the first paragraph, the writer posits and narrows the research question, and relates it to the essay's overall purpose. Paragraphs 2-4 comprise **the review of the literature** in which the writer summarizes, compares, and evaluates the various sources used in the essay's overall analysis. Following the sample literature review is the Works Cited list of sources as it would follow the complete essay.

If scientific advancement depends upon both consumer demand and scientific curiosity, then the attitude consumers have toward genetic engineering and cloning must be weighed and examined. Therefore, the question arises, "How do consumers form their opinions about cloning?" As a Communications major, I am aware that popular culture is one powerful way that ideas about controversial topics are communicated. Therefore this question becomes more specifically: What can popular movies (like Jurassic Park) tell us about people's attitudes toward

Literary Criticism from Plato to Postmodernism James Seaton, 2014-04-28 This book offers a history of literary criticism from Plato to the present arguing that this history can best be seen as a dialogue among three traditions the Platonic Neoplatonic and the humanistic originated by Aristotle There are many histories of literary criticism but this is the first to clarify our understanding of the many seemingly incommensurable approaches employed over the centuries by reference to the three traditions Making its case by careful analyses of individual critics the book argues for the relevance of the humanistic tradition in the twenty first century and beyond
