Bibliography in Literature, Folklore, Language and Linguistics David William Foster, James R. Kelly, 2003-02-11 While the academic world devoted to literary study has been absorbed with new and distinct forms of literary criticism bibliography has received scant attention much less than in former times when it was understood as more than just an aid to research Enormous changes have taken place in enumerative bibliography over the past thirty years especially with the widespread use of computers but these changes have gone unrecognized as bibliography has gone unappreciated This work is a collection of essays concentrating exclusively on bibliography and its uses in the academic world especially in literature folklore language and linguistics The book begins with a discussion of what bibliography is what it does and how to create the optimum bibliography Other subjects include bibliography and

postcolonialism critical theory and bibliography in cross disciplinary environments issues and problems with tools for feminist and women s studies scholars in literature strategies for the incorporation of pluridisciplinary work bibliographical databases and databased bibliographies and ideas for the future of the MLA International Bibliography Critical Making in the Age of AI Emily Johnson, Anastasia Salter, 2025-04-15 Critical Making in the Age of AI invites students teachers learners and digital humanists to explore making as scholarship Inspired by the craft traditions of textile arts this book combines a survey of forms of alternative scholarly communication such as comics GIFs maps games and generative AI and a pattern book where patterns serve as starting points that makers can reimagine and remix Firmly grounded in the humanities and utilizing free tools and platforms including Twine Voyant and Tracery wherever possible this engaging and accessible guide to digital methods introduces and puts into practice concepts that are essential to preparing students to navigate a changing landscape of media and information without investing in proprietary software dedicated lab space or expensive creative tools The book s eight patterns are especially appropriate for those just beginning to explore digital scholarly methods and one goal of Critical Making in the Age of AI is to provide structure for work that is both meaningful and achievable with limited resources and time By centering critical making through a design justice and feminist lens the coauthors model how inclusive and expansive approaches to making in research and teaching are vital to shaping the humanities of the future *Resources in Education* ,2001-10
