Abstract

Technologies have dramatically changed the way people gather information, carry out research, and communicate with others worldwide. Technology has removed the distance obstacles and has made it possible for higher education to effectively teach anyone. Technology integration is being increasingly used in instruction to improve teaching and learning. This rapid development of technology integration has presented a better pattern to find the new teaching models. Consequently, it has a key role in learning and teaching language skills. The integration of technology to create a context to teach and learn English skills has a lot of advantages. The fundamental aim of this paper is to review the issues related to technology integration in the learning and teaching of language skills. In this paper, the researcher defines the term technology integration, expresses the reason of integrating technology, explains the role of technologies in promoting learning, elaborates teachers' roles and learners' roles, reviews previous studies on the benefits of technology in the learning and teaching of language skills, indicates the situation of Information and Communication Technologies (ICTs) in Iran, and finally mentions the recommendations for the successful integration of technology. The review of literature revealed that the integration of technology into the classrooms considerably improves the learning and teaching of English language skills.

1. Introduction

The method of English language teaching has been considerably changed due to the entry of technology. Technology offers a lot of benefits as making teaching interesting and more productive in terms of advancements. The use of technology helps learners get involved and learn based on their interests. It has been extensively accepted for teaching English in the modern world. Technology satisfies both visual and auditory senses of the learners (Solanki & Shyamdee1, 2012). Graddol (1997) said that technology is the center of the globalization process and impacts education and culture.

Friggard (2002), Miner (2004), and Timucin (2006) confirmed that technology increases the development of teaching methods and learners' knowledge. Lam & Lawrence (2002) also expressed that technology helps learners to regulate their own learning process and have access to many information that their teachers cannot provide. Pourhosein Gilakjani and Lai-Mei (2012) elaborated that the unique opportunities technologies provide have brought about new tools, approaches, and strategies in the teaching and learning of language skills. Technologies are increasingly widespread, impacting many aspects of our social and work lives, and many of our leisure activities.

Many researchers stated that technology can be used as an instructional tool in teaching and learning skills. Pourhosein Gilakjani (2013) and Bruce and Levin (2001) expressed that technology can be useful in classroom by helping communication, making teaching products, and assisting learners' self-expression. According to Pourhosein Gilakjani (2013), when we talk about instruction, education, or training issues we have to consider the important role of technology. The researchers continued that the application of technologies in education opens a new area of knowledge and provides a tool that has the great potential to change the existing teaching methods.

The effect of using technology on education has been examined by different researchers in various fields. All of these researchers unanimously agreed that technology helps teachers improve their teaching methods and

Science and Technology Denis Joseph Grogan, 1976 Cites sources of reference material in the sciences and technological fields to help librarians and beginning science students locate information Technology, Literature and Culture Alex Goody, 2013-04-25 Technology Literature and Culture provides a detailed and accessible exploration of the ways in which literature across the twentieth century has represented the inescapable presence and progress of technology As this study argues from the Fordist revolution in manufacturing to computers and the internet technology has reconfigured our relationship to ourselves each other and to the tools and material we use The book considers such key topics as the legacy of late nineteenth century technology the literary engagement with cinema and radio the place of typewriters and computers in formal and thematic literary innovations the representations of technology in spy fiction and the figures of the robot and the cyborg It considers the importance of broadcast technology and the internet in literature and covers major literary movements including modernism cold war writing postmodernism and the emergence of new textualities at the end of the century An insightful and wide ranging study Technology Literature and Culture offers close readings of writers such as Virginia Woolf Samuel Beckett Ian Fleming Kurt Vonnegut Don DeLillo Jeanette Winterson and Shelley Jackson It is an invaluable resource for students and scholars alike in literary and cultural studies and also introduces the topic to a general reader interested in the role of technology in the twentieth century The Assault on Progress J. Adam Johns, 2008 A belief in progress is a fundamental ethos in American history and culture The Assault on Progress probes American literary works that challenge the prevailing notion of technology as a manifestation of progress J Adam Johns argues that the idea of technology as destiny has long been explored and undercut in American literary works and that literature remains a crucial site for ongoing debates in this area BOOK JACKET **British Literature and Technology, 1600-1830** Kristin M. Gerten, Aaron R. Hanlon, 2023-01-13 Enlightenment era writers had not yet come to take technology for granted but nonetheless were as we are today both attracted to and repelled by its potential This volume registers the deep history of such ambivalence examining technology's influence on Enlightenment British literature as well as the impact of literature on conceptions of attitudes toward and implementations of technology Offering a counterbalance to the abundance of studies on literature and science in seventeenth and eighteenth century Britain this volume's focus encompasses approaches to literary history that help us understand technologies like the steam engine and the telegraph along with representations of technology in literature such as the political machine Contributors ultimately show how literature across genres provided important sites for Enlightenment readers to recognize themselves as chimeras hybrids of machine and organism and to explore the modern self as a creature of social reality as well as a creature of fiction **Literature, Technology and Magical Thinking, 1880-1920** Pamela Thurschwell, 2001-07-05 In this 2001 book Pamela Thurschwell examines the intersection of literary culture the occult and new technology at the fin de siècle Thurschwell argues that technologies began

suffusing the public imagination from the mid nineteenth century on they seemed to support the claims of spiritualist mediums Talking to the dead and talking on the phone both held out the promise of previously unimaginable contact between people both seemed to involve magical thinking Thurschwell looks at the ways in which psychical research the scientific study of the occult is reflected in the writings of such authors as Henry James George du Maurier and Oscar Wilde and in the foundations of psychoanalysis This study offers provocative interpretations of fin de siècle literary and scientific culture in relation to psychoanalysis queer theory and cultural history

Technology, Literature, and Digital Culture in Latin America Matthew Bush,Tania Gentic,2015-07-16 Grappling with the contemporary Latin American literary climate and its relationship to the pervasive technologies that shape global society this book visits Latin American literature technology and digital culture from the post boom era to the present day The volume examines literature in dialogue with the newest media including videogames blogs electronic literature and social networking sites as well as older forms of technology such as film photography television and music Together the essays interrogate how the global networked subject has affected local political and cultural concerns in Latin America They show that this subject reflects an affective mode of knowledge that can transform the way scholars understand the effects of reading and spectatorship on the production of political communities The collection thus addresses a series of issues crucial to current and future discussions of literature and culture in Latin America how literary visual and digital artists make technology a formal element of their work how technology from photographs to blogs is represented in text and the ramifications of that presence how new media alters the material circulation of culture in Latin America how readership changes in a globalized electronic landscape and how critical approaches to the convergences boundaries and protocols of new media might transform our understanding of the literature and culture produced or received in Latin America today and in the future

Intuitions in Literature, Technology, and Politics Alan Ramón Clinton,2012-09-14 Using the idea of parability or the ability for writers to tell improper stories as a foundation Alan Ram n Clinton synthesizes a new model for a creative more daring literary criticism Sharp and surprising this wide ranging project engages with the work of Pynchon Eco Forch Merrill Weiner Plath Ashbery and Eigner

Literature, Technology, and Modernity, 1860-2000 Nicholas Daly,2004-02-12 Industrial modernity takes it as self evident that there is a difference between people and machines but the corollary of this has been a recurring fantasy about the erasure of that difference The central scenario in this fantasy is the crash sometimes literal sometimes metaphorical Nicholas Daly considers the way human machine encounters have been imagined from the 1860s on arguing that such scenes dramatize the modernization of subjectivity This book will be of interest to scholars of modernism literature and film
