Marks,Stephen Parkin,2023-11-20 A richly illustrated look at some of the British Library s most beautiful books from around the world For centuries across the world books have been created as objects of beauty with bookmakers lavishing great care on their paper binding materials illustrations and lettering The Book by Design featuring an array of books from

the British Library's collection focuses on the sensory experience of holding and reading these objects. Each selection represents a specific moment in the development of what we know today as the book from scrolls and bound illuminated manuscripts to paperbacks and formatted digital information. These range from the seventh century to the present and include examples from China, Japan, Southeast Asia, the Middle East, Europe, and North America, in addition to a look at book traditions in Africa and Oceania. John James Audubon's *Birds of America*, the works of Chaucer, Russian Futurist books, limited editions, historic copies of the Qur'an and the Bible, mass market paperbacks, and more come together to tell the visual, tactile, artistic, and cultural history of books. Expert curators and specialists explore these books from the perspective of design and manufacturing; original art photographs offer vivid representations of their textures and materials, and graphics detail the size and specifications of each book. Offering a wide-ranging look at the creation and use of books, illustrated with hundreds of color images, this volume is itself an object of beauty.

British Museum. Department of Printed Books, 1969 The Nation, 1869 Treasures of Knowledge: An Inventory of the Ottoman Palace Library (1502/3-1503/4) (2 vols) Gülru Necipoğlu, Cemal Kafadar, Cornell H. Fleischer, 2019-08-12. The subject of this two-volume publication is an inventory of manuscripts in the book treasury of the Topkapı Palace in Istanbul, commissioned by the Ottoman sultan Bayezid II from his royal librarian Atufi in the year 908/1502-3 and transcribed in a clean copy in 909/1503-4. This unicum inventory, preserved in the Oriental Collection of the Library of the Hungarian Academy of Sciences (Magyar Tudományos Akadémia Könyvtára Keleti Gyűjtemény MS. T. r. k. F. 59), records over 5,000 volumes and more than 7,000 titles on virtually every branch of human erudition at the time. The Ottoman palace library housed an unmatched encyclopedic collection of learning and literature; hence the publication of this unique inventory opens a larger conversation about Ottoman and Islamic intellectual/cultural history. The very creation of such a systematically ordered inventory of books raises broad questions about knowledge production and practices of collecting, readership, librarianship, and the arts of the book at the dawn of the sixteenth century. The first volume contains twenty-eight interpretative essays on this fascinating document, authored by a team of scholars from diverse disciplines including Islamic and Ottoman history, history of science, arts of the book, and codicology, agriculture, medicine, astrology, astronomy, occultism, mathematics, philosophy, theology, law, mysticism, political thought, ethics, literature, Arabic, Persian, Turkish, Turkic philology, and epistolarity. Following the first three essays by the editors on implications of the library inventory as a whole, the other essays focus on particular fields of knowledge under which books are catalogued in MS. T. r. k. F. 59, each accompanied by annotated lists of entries. The second volume presents a transliteration of the Arabic manuscript, which also features an Ottoman Turkish preface on method together with a reduced-scale facsimile.
