

**Steps:** Children read or listen to text and then the question. They decide which of the three choices is the answer and either use their words to answer or touch the picture.

**Tip:** Responding to this visual cue card while reading the book helps children generalize predicting what will happen next. They begin to understand that determining, "What shall I do?" means the same thing. Use this same cue card in other circumstances throughout the day once students learn its meaning of an impending sequence, such as, "Oh, oh my shoe is untied. What's next, or what shall I do?" or, "Lunch is finished. What's next, or what shall I do?" When using a text in a group setting, have available cue support so that all students have an opportunity to answer the questions. Think about each student's developmental language needs and prepare objects, picture overlays, answer booklets, or augmentative devices as needed. What students comprehend can be missed if they do not have available avenues for sharing information.

**Predictions - Word Bank**

**Steps:** Children or teacher reads the question while looking at the picture. Students discuss what might happen next and write a sentence describing their prediction using some of the suggested words in the bank.

**Tip:** Students with special needs are often concrete thinkers who have a difficult time figuring out what will happen next in text or even in their own experiences. Helping children think about what is next will aid their ability to sequence and organize their thinking, writing, and actions.
