**Information System**, 1991 *Statistical Strategies for Small Sample Research* Rick H. Hoyle, 1999-03-30 Newer statistical models such as structural equation modeling and hierarchical linear modeling require large sample sizes inappropriate for many research questions or unrealistic for many research arenas How can researchers get the sophistication and flexibility of large sample studies without the requirement of prohibitively large samples This book describes and illustrates statistical strategies that meet the sophistication flexibility criteria for analyzing data from small samples of fewer than 150 cases Contributions from some of the leading researchers in the field cover the use of multiple imputation software and how it can be used profitably with small data sets and missing data ways to increase statistical power when sample size cannot be increased and strategies for computing effect sizes and combining effect sizes across studies Other contributions describe how to hypothesis test using the bootstrap methods for pooling effect size indicators from single case studies frameworks for drawing inferences from cross tabulated data how to determine whether a correlation or covariance matrix warrants structure analysis and what conditions indicate latent variable modeling is a viable approach to correct for unreliability in the mediator Other topics include the use of dynamic factor analysis to model temporal processes by analyzing multivariate time series data from small numbers of individuals techniques for coping with estimation problems in confirmatory factor analysis in small samples how the state space model can be used with surprising accuracy with small data samples and the use of partial least squares as a viable alternative to covariance based SEM when the N is small and or the number of variables in a model is large **Cost Management in Plastics Processing** Robin Kent, 2017-09-29 Cost Management in Plastics

Processing Strategies Targets Techniques and Tools Fourth Edition makes readers think about current practices and how to go forward with effective cost management This is a practical workbook that provides a structured approach to reducing costs in plastics processing for all the major plastics shaping processes moulding extrusion forming as well as elsewhere in the company e g in factory services and non manufacturing areas Competition in all manufacturing sectors is increasing and there is continuous pressure to drive costs down and to increase cost management Good cost management improves profits and margins improves management control and opens the door to becoming a world class company The approach throughout this book looks rigorously at where costs are incurred and proposes projects and targets for cost reduction This book is designed to provide a well structured map broken down into simple tasks and achievable goals This book offers a structured approach to the techniques of cost management from how costs are calculated by accountants to the effective use of

machines and labor to the minimization of waste It begins by looking at traditional methods of accounting and costing and whether these are helpful or accurate for project management Practical examples of cost management in plastics processing are included together with many useful flow charts and diagrams to illustrate the points under discussion Enables plastics processors to institute an effective cost management system going beyond simply trying to cut costs Provides a holistic perspective on cost management shining a light on areas on costs which may not have previously been considered or accounted for and proposing projects and targets for cost reduction Serves as a route map to help companies move toward improved margins and greater profitability
