The Sustainable Development Goals (SDGs) like the Millennium Development Goals (MDGs) before them were born of a larger social development movement which over the last 25 years has become increasingly mainstream in the fields of international development, sustainability and social work. These practitioners are essential to the implementation of the SDGs. This handbook examines how the SDGs are being implemented in diverse contexts. No previous work has surveyed social development and social work's contribution to the SDGs nor represented voices from the Global South on the SDGs. This book broadens the current literature by focusing on key sites throughout the Global South and featuring underrepresented voices from Africa, Asia and Latin America. These regions are vitally important to assessing the SDGs as this is where innovative social development projects are occurring and where social workers are playing a leading role in achieving the SDGs. The book is divided into eight parts: Context of Social Development, Social Work and the SDGs, Perspectives on the SDGs, Case Studies on Engagement with the SDG Agenda, Case Studies on Ending Poverty, Case Studies on Health and Well Being, Case Studies on Gender Equality, Case Studies on Climate and Sustainability, Case Studies on Governance, Peace and Justice. It comprises 35 newly written chapters by 74 authors. It will be of interest to a broad interdisciplinary audience of scholars, educators and students in the fields of social development, social welfare, social work, social policy, human rights, international relations, political science, international affairs, sustainability, community development, area studies and development studies.

North American and European Perspectives on Sustainability in Higher Education Walter Leal Filho, Julie Newman, Amanda Lange Salvia, Laís Viera Trevisan, Laura Corazza, 2025-04-02. The scientific, cultural and diplomatic relations between Europe and its partners in North America are very strong. From a scientific point of view, this long-standing cooperation has taken place across a wide range of areas. They include the field of sustainability where North America and Europe are working hand in hand seeking solutions to the many regional and global problems currently faced. Against this backdrop and in order to facilitate a broad discussion on the contribution of higher education institutions from both sides of the Atlantic towards a more sustainable future, this book is being produced. The book gathers inputs from universities and research organizations on the one hand but also from companies and enterprises on the other from Europe and North America working on matters related to sustainable development in a higher education context. It also provides a platform for the dissemination of information on the latest initiatives paving the way for technology transfer and networking. Furthermore, the book intends to provide a fertile basis upon which European and North American organizations may cooperate more closely in this key area. Last but not least, a further aim of the book is to present methodological approaches and experiences deriving from case studies and projects which aim to show how sustainability in North America and in Europe may be enhanced in practice.
