The Internationalisation of Retailing in Asia Sang Chul Choi, John Dawson, Roy Larke, Masao Mukoyama, 2004-03-01 European retailers have successfully internationalised their activities in Europe but have been less successful in North America American retailers have been successful in their home market but less so in Europe The major European and American retailers are now entering Asia and competing directly with each other in a substantive way for the first time These Western retailers using modern managerial methods are entering markets typified by more traditional managerial approaches Western managerial cultures and values are interfacing with Asian ones The results of these moves are new stresses for Asian retail structures that bring a new dynamism to Asian retailing The contributions in this book explore the conflicts and benefits that arise as retailing in Asia becomes internationalised The contributions are provided by experts in retail research from across Asia and for the first time in depth analyses are provided of the ways that Western retailers are provoking change in Asia The book results from a seminar held at the University of Marketing and Distribution Sciences Kobe in November 2001 under the auspices of Society for Asian Research in Distribution Scholars from across the region presented research results of their analyses of the New Commerce now appearing in Asia

Business History and International Business Peter Buckley, 2014-01-02 Business History and International Business are cognate subjects There are few if any studies of international business that do not require a proper study of context International business decision making must be made relevant by a considered evaluation of the circumstances surrounding that decision This often means putting it into its historical context The contributions that the study of international business can make to business history are the input of appropriate theory and appropriate research methods The best international business theory can illuminate the seemingly disparate strategies of firms in given historical circumstances and can provide an integrated overarching conceptual structure of the study of business history The research methods used in international business are also worthy of scrutiny by business historians The proposition of this book is that international business theory and method can complement business history This cross fertilization has been occurring with increasing regularity over the past few decades and this book brings together some of the fruits of this conjunction of two important intellectual domains This book was published as a special issue of Business History
