I.S.B.N. ,1997 **Libros españoles en venta** ,1998 Psicología de la educación virtual César Coll Salvador, Carles Monereo, 2010-05-10 Psicología de la educación virtual versa sobre la educación y el aprendizaje en entornos virtuales al tiempo que se sitúa de forma clara y explícita en el ámbito de la psicología y más concretamente de la psicología de la educación. En el transcurso de las dos o tres últimas décadas ha habido una producción relativamente abundante tanto en castellano como en otras lenguas de libros que tratan temas relacionados con la educación y las tecnologías de la información y la comunicación TIC desde perspectivas epistemológicas teóricas y disciplinares diversas. Cuando se analiza en su conjunto puede constatar que esta producción responde de forma mayoritaria a preocupaciones y planteamientos de tipo sociológico tecnológico o didáctico y que las aproximaciones y los análisis psicológicos son más bien escasos. El objetivo de esta obra es contribuir a compensar esta carencia mediante la adopción de un punto de vista psicológico en el estudio de los procesos educativos que tienen lugar en entornos sustentados total o parcialmente en la utilización de tecnologías digitales de la información y la comunicación. La obra se estructura en cuatro partes. El impacto de las TIC sobre la educación y la psicología de la educación. Se centra en el estudio de los procesos de aprendizaje que tienen lugar como consecuencia de la participación de las personas en situaciones y actividades educativas caracterizadas por el uso de tecnologías digitales de la información y la comunicación. Factores y procesos psicológicos implicados en el aprendizaje virtual. Una mirada constructivista. Se tratan los tres vértices del triángulo interactivo: el aprendiz, el profesor y los contenidos del aprendizaje así como sus interrelaciones.
