Interpretations of Life and Mind Marjorie Grene, 1971      *Interpretations of life and mind: essays around the problem of reduction*, ed ,      **Interpretations of Life and Mind** Marjorie Grene, 1971      *Reconsidering Michael Polanyi's Philosophy* Stefania Ruzsits Jha, 2017-03-13 The chemist and philosopher Michael Polanyi 1891 1976 was one of the first twentieth century scientists to propose a program to resolve the internal conflict of the modern Enlightenment scientific detachment and moral nihilism with humanist values Stefania Jha s intellectual biography places Polanyi in the context of his time and culture analyzes his key philosophical ideas and explicates the application and at times misappropriation of his work Polanyi s method was not laid out in his published works and his vocabulary tends to make his writings difficult to understand By exposing the structure of his theory of tacit knowing and by tracing the growth of his thinking Jha shows how the various elements of his thought are integrated Through examination of his philosophical roots in Kant and the complexity of his evolving thought she counteracts the popular notion that Polanyi s philosophy stands apart from the western philosophic tradition Jha s deep analysis makes Polanyi s shift of focus from science to philosophy more intelligible his philosophy more approachable and the causes he championed such as the freedom of science and cultural freedom more understandable Applying his notion of tacit knowing in practical directions Jha seeks to bring the study of Polanyi s philosophy out of the specialists enclave and into such fields as ethics and clinical medicine      The Routledge Handbook of Interpreting and Cognition Christopher D. *Phenomenalism, Phenomenology, and the Question of Time* Adam Berg,2015-12-15 Phenomenalism Phenomenology and the Question of Time A Comparative Study of the Theories of Mach

Husserl and Boltzmann analyzes two interconnected themes the split between phenomenalism and phenomenology and the question of time in relation to physical processes and irreversibility in physics The first theme is the overlooked connections between the modern phenomenology of Edmund Husserl and his mentor Franz Brentano and phenomenalism as associated with Ernst Mach The book's historical conceptual perspective draws attention to the ways in which Husserl's twentieth century advance of phenomenological method was conceived in relation to Mach's late nineteenth century and early twentieth century work both in science and philosophy At first glance Mach's phenomenalism appears to be in stark contrast to Husserl's phenomenology but on closer inspection it influenced and informed its inception By analyzing Husserl's revolutionary method of phenomenology in connection to Mach's earlier conceptions the book elucidates the rise of modern physics especially through the work of Ludwig Boltzmann as an important context to both Mach's philosophical work and Husserl's early overtures into phenomenology and his later critique of the crisis of European sciences The discursive affinities and differences between phenomenalism and phenomenology are examined in terms of a more contemporary debate over naturalizing phenomenology either as a method continuous with science or reduced to it This immanent tension is examined and evaluated specifically through the second thematic axis of the book which deals with the question of time and irreversibility Time in physics conforms to an explanatory scheme that relegates the issues of directionality and symmetry of time to concepts that are radically different from any phenomenological attempts to explain temporality in terms of intuition and consciousness It is precisely through the notion of irreversibility that both perspectives scientific and phenomenological explicate time's arrow not as a mere manifestation of sensory asymmetry as Mach would have it but rather through indirect descriptions of time and temporal objects The issue of time's arrow irreversibility and Boltzmann's physical hypotheses regarding the nature of time are introduced and comparatively assessed with Husserl's work on phenomenology and the role of temporality to consciousness

**The Game of Contradictions** Sven-Eric Liedman, 2022-12-19 What is the nature of the laws that Marx and Engels sought to formulate for the development of capitalism How to understand and judge Engels's attempt to formulate a general philosophy and worldview These are the questions highlighted in this magnificent work that situates Marx and Engels's writing against the background of the entire nineteenth century world of scientific problems from physics to historiography One of the major contributions to scholarship on Marx Engels and nineteenth century science Liedman's work is here presented in English translation and with a new preface by the author

**Chaos And Complexity** Michael R. Butz, 2018-05-11 The nature of this book is to emphasize the inherent complexity and richness of the human experience of change Now the author believes there to be an acceptable scientific explanation for this phenomena Explored here are 30 years of studies to describe nonlinear dynamics today termed either chaos theory or complexity theory The connotations of both theories are discussed at length Offering social scientists validation in their attempts to describe and define phenomena of a previously ineffable nature this book explores chaos implications for psychology and the social

sciences It describes the benefits psychology can glean from using ideas in chaos theory and applying them to psychology in general individual psycho therapy couples therapy and community psychology and also considers possible directions for research and application **Individuals as Producers of Their Development** Richard M Lerner,Nancy A.

Busch-Rossnagel,2013-09-03 Individuals as Producers of Their Development A Life Span Perspective provides an assessment of the usefulness of viewing the individual as an active contributor to his or her development It extends the breadth of organism environment reciprocities beyond those involved with the child and family On the one hand this extension involves a consideration of the role of evolutionary biological processes on the other it pertains to the broader ecology of human development the social network lying outside the family and the physical environmental contexts of development Person context reciprocities linked to variables that may play their greatest role in the extrafamilial context are also considered Variables such as physical attractiveness race and physical handicap are examples of those discussed in this regard Finally because of the greater scope of the analysis a potentially greater data base is examined in a search for documentation of the presence and role of dynamic person context interactions *Animalism* Stephan Blatti,Paul F. Snowden,2016 What are we

What is the nature of the human person Animalism has a straightforward answer to these long standing philosophical questions we are animals Fifteen philosophers offer new essays exploring this increasingly popular view some defending animalism others criticizing it and others exploring its more philosophical implications **Handbook of New Age** James Lewis,Daren Kemp,2007-05-30 The Handbook of New Age is a comprehensive survey of alternative spiritualities their history their global impact their cultural influence and how they are understood by scholars Chapters by many of the leading scholars of the movement give the latest analysis of contemporary spiritual trends and present up to date observations of the interaction between the New Age movement and many different fields of knowledge and research Strange Case of Dr

Wartofsky,2013-06-29 In three volumes a distinguished group of scholars from a variety of disciplines in the natural and social sciences the humanities and the arts contribute essays in honor of Robert S Cohen on the occasion of his 70th birthday The range of the essays as well as their originality and their critical and historical depth pay tribute to the extraordinary scope of Professor Cohen s intellectual interests as a scientist philosopher and a humanist and also to his engagement in the world of social and political practice The essays presented in *Physics Philosophy and the Scientific Community* Volume I of *Essays in Honor of Robert S Cohen* focus on philosophical and historical issues in contemporary physics on the origins and conceptual foundations of quantum mechanics on the reception and understanding of Bohr s and Einstein s work on the emergence of quantum electrodynamics and on some of the sharp philosophical and scientific issues that arise in current scientific practice e g in superconductivity research In addition several essays deal with critical issues within the philosophy of science both historical and contemporary e g with Cartesian notions of mechanism in the philosophy of biology with the language and logic of science e g with new insights concerning the issue of a physicalistic language in the arguments of Neurath Carnap and Wittgenstein with the notion of elementary logic and with rational and non rational elements in the history of science Two original contributions to the history of mathematics and some studies in the comparative sociology of science round off this outstanding collection

*Bifurcation Analysis* Michiel Hazewinkel,R. Jurkovich,J.H.P. Pealinck,2012-12-06 Bifurcation theory has made a very fast upswing in the last fifteen years Roughly speaking it generalises to dynamic systems the possibility of multiple solutions a possibility already recognised in static systems physical chemical social when operating far from their equilibrium states It so happened that quite a few staff members of the Erasmus University Rotterdam were thinking along those lines about certain aspects of their disciplines To have a number of specialists and potential fans convene to discuss various aspects of bifurcation al thinking seemed a natural development The resulting papers were judged to be of interest to a larger public and as such are logically regrouped in this volume one in a series of studies resulting from the activities of the Steering Committee on Interdisciplinary Studies of the Erasmus University Rotterdam Although the volume is perhaps multidisciplinary rather than interdisciplinary the interdisciplinary aspect being only latent as a soft interdisciplinary exercise the application of formal structures of one discipline to another it has a right to interdisciplinary existence This book could not have been published without a generous grant of the University Foundation of the Erasmus University Rotterdam which allowed the conference to be held and the resulting papers to be published that generosity is gratefully acknowledged
