Gendlin, 1986 A Profound Method to Work with Dreams In research at the University of Chicago Dr Gendlin found that certain specific bodily responses can open up and lead to small steps of a new experience These bodily responses can indicate the steps for interpreting a dream Theories about dreams differ and give contradictory interpretations Dr Gendlin derives 16 questions from the many existing theories to aid you the dreamer in the process of interpretation In this book Dr Gendlin teaches you to ask the questions so that your body can respond You learn to recognize how it feels when a question is about to lead to a breakthrough You learn to let the question complete itself so that the dream opens and you know without doubt what it is about The first stage is learning what the dream is about But this alone may not yet tell you anything you did not know before The second stage is getting something new from the dream for your own development The BIAS CONTROL solves what was until now an insurmountable problem People could not interpret their own dreams because they always imposed their usual biases on them The BIAS CONTROL shows you how to open yourself to a new step Eugene T Gendlin Ph D is Professor of Psychology at the University of Chicago He has written books and articles in philosophy and psychology His work has been translated into more than seven languages He was for many years the editor of *Psychotherapy Theory Research and Practice* In 1970 he was chosen by the Psychotherapy Division of the American Psychological Association for their first Distinguished Professional Psychologist of the Year Award
