**Historical Dictionary of Thailand** Gerald W. Fry,Gayla S.

Nieminen,Harold E. Smith,2013-08-08 Throughout its history Thailand has shown remarkable resiliency adaptability and creativity in responding to serious threats and crises and this since much earlier times when it was known as Siam This book while focusing on the modern period does reach back to ancient kingdoms but also shows the impressive rise to a modern democracy although still endowed with a king and even more impressively an economic tiger Moreover it has become a prime tourist destination and is thus known to vast numbers of foreigners as a sort of instant Asia The Historical Dictionary of Thailand now in its third edition covers this amazing story in various ways First the chronology traces the most significant events from year to year The introduction then provides a good overview of the land and people the history and traditions and where it now seems to be heading The dictionary which by now has hundreds of detailed and cross referenced entries looks more closely at important persons places institutions and events as well as more generally its politics economy society culture and religion So this is an excellent reference work not only for scholars but many others who have visited the country and were fascinated by it

Historical Dictionary of Thailand May Kyi Win,Harold E. Smith,Gayla S. Nieminen,2005-10-04

*Handbook of Religion and the Asian City* Peter van der Veer,2015-05-19 Handbook of Religion and the Asian City highlights the creative and innovative role of urban aspirations in Asian world cities It points out that urban politics and governance are often about religious boundaries and processions in short that public religion is politics The essays show how projects of secularism come up against projects and ambitions of a

religious nature a particular form of contestation that takes the city as its public arena Asian cities are sites of speculation not only for those who invest in real estate but also for those who look for housing for employment and for salvation In its potential and actual mobility the sacred creates social space in which they all can meet Handbook of Religion and the Asian City makes the comparative case that one cannot study the historical patterns of urbanization in Asia without paying attention to the role of religion in urban aspirations Provided by publisher **The Routledge Handbook of Place** Tim Edensor, Ares Kalandides, Uma Kothari, 2020-05-26 The handbook presents a compendium of the diverse and growing approaches to place from leading authors as well as less widely known scholars providing a comprehensive yet cutting edge overview of theories concepts and creative engagements with place that resonate with contemporary concerns and debates The volume moves away from purely western based conceptions and discussions about place to include perspectives from across the world It includes an introductory chapter which outlines key definitions draws out influential historical and contemporary approaches to the theorisation of place and sketches out the structure of the book explaining the logic of the seven clearly themed sections Each section begins with a short introductory essay that provides identifying key ideas and contextualises the essays that follow The original and distinctive contributions from both new and leading authorities from across the discipline provide a wide rich and comprehensive collection that chimes with current critical thinking in geography The book captures the dynamism and multiplicity of current geographical thinking about place by including both state of the art in depth critical overviews of theoretical approaches to place and new explorations and cases that chart a framework for future research It charts the multiple ways in which place might be conceived situated and practised This unique comprehensive and rich collection will be an essential resource for undergraduate and graduate teaching for experienced academics across a wide range of disciplines and for policymakers and place marketers It will provide an invaluable and up to date guide to current thinking across the range of disciplines such as Geography Sociology and Politics and interdisciplinary fields such as Urban Studies Environmental Studies and Planning Local Sustainable Urban Development in a Globalized World Susan M. Opp, Lauren C. Heberle, 2016-05-06 Sustainable development is a key issue of concern to urban planners across the globe How it is defined implemented and measured at the local level remains highly contested and subject to a wide range of external cultural political and economic pressures Bringing together leading experts from North America Europe the Middle East and SE Asia this book provides a timely overview of the various methods for understanding and implementing sustainable practices at local levels In doing so they present the wide range of local action alternatives available to planners that may be pursued in spite of the constraints generated by globalization processes and highlight the array of public policy options that could reduce the external pressures shaping the possible local alternatives The book argues that while local planners and local authorities are willing to act many are unaware of the range of options available to them In bringing together these case studies not only diverse in geographic terms but also reflecting very

different levels of income general population education cultural norms legal systems and government structures it points out innovations and examples of best practice

**Asian and Pacific Cities** Ian Shirley, Carol Neill, 2013-03-12 The cities of Asia and the Pacific are at the epicentre of development in what is arguably the most populous culturally distinctive and economically powerful region in the world 16 major cities such as Tokyo Shanghai Manila Jakarta Bangkok Singapore Auckland Kuala Lumpur and Santiago located in countries as diverse as Mexico and Vietnam Samoa and India China and Australia exemplify the changing patterns of development across this vast region of the world By tracking economic and social trends the contributors to this collection reveal how a wide range of political and cultural factors have interacted over time to provide a powerful explanation for the shape and characteristics of the city today Based on a collaborative research programme and drawing on the work of local researchers this book examines the realities of city development characterised by domestic migration spatial and social fragmentation squatter settlements and gated communities economic experiments and the emergence of the Asian Tigers The collection as a whole records the way in which countries in this region have moved from underdevelopment to become global economic and political powers This book provides a fascinating journey through Asia and the Pacific by generating an insiders view of each city and an insight into national development As such it will be of great interest to students and scholars interested in the Asian and Pacific region in disciplines such as economics politics geography and sociology and in policy domains such as urban planning and economic development

**The Intimate Economies of Bangkok** Ara Wilson, 2004-07-19 Wilson shows us how global dreams come to life in the cacophony of Bangkok's markets Business tycoons sex workers mall strollers and penny capitalists Each forms an exemplary figure a source of reflection and emulation In this engrossing work the women and men of Bangkok produce themselves and the global economy I have seen no better ethnography of globalization Anna Tsing author of *In the Realm of the Diamond Queen* This fascinating book draws together the strands that weave intimate and kinship worlds into the fabric of the modern Thai economy From floating markets to department stores and go go bars Wilson's inquiry reveals the gendered practices that sustain economic domains and how these commercial venues in turn recast the intimate life Upending stereotypical notions about Thai gender *Intimate Economies* casts a complex feminist perspective on the new styles of being emerging in the spaces of global capitalism Aihwa Ong author of *Buddha Is Hiding* Wilson brilliantly deciphers the ways intimate lives personas subjectivities relations are involved in the formation of modern and transnational capitalist markets To do this she carefully unpacks the social infrastructure of five different globalized markets in Bangkok Saskia Sassen author of *Guests and Aliens* Offers something rare and valuable in studies of globalization a fine grained ethnography at the intersection of capitalist and non capitalist economies In Ara Wilson's fascinating study of urban Thailand the sex trade is intertwined with the gift economy the department store with the kin economy Navigating this often surprising terrain with unusual agility Wilson has produced a masterful record of new worlds and new subjects in the making Julie Graham co author of *The End of*

Capitalism As We Knew It A Feminist Critique of Political Economy      Contemporary Socio-Cultural and Political Perspectives in Thailand Pranee Liamputtong, 2014-01-13 This volume examines contemporary Thailand It captures aspects of Thai society that have changed dramatically over the past years and that have turned Thailand into a society that is different from what most people outside the country know and expect The social transition of Thailand has been marked by economic growth population restructuring social and cultural development political movements and many reforms including the national health care system The book covers the social cultural and economic changes as well as political situations It discusses both historical contexts and emerging issues It includes chapters on social and public health concerns and on ethnicity gender sexuality and social class Most chapters use information from empirical based and historical research They describe real life experiences of the contributors and Thai people who participated in the research      **Owners of the Map** Claudio Sopranzetti, 2018 On May 19 2010 the Royal Thai Army deployed tanks snipers and war weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality Key to this mobilization were motorcycle taxi drivers who slowed down filtered and severed mobility in the area claiming a prominent role in national politics and ownership over the city and challenging state hegemony Four years later on May 20 2014 the same army general who directed the dispersal staged a military coup unopposed by protesters How could state power have been so fragile and open to challenge in 2010 and yet so seemingly sturdy only four years later How could protesters who had once fearlessly resisted military attacks now remain silent Owners of the Map provides answers to these questions central to contemporary political mobilizations around the globe through an ethnographic study of motorcycle taxi drivers in Bangkok Claudio Sopranzetti explores the unresolved tensions in the drivers everyday lives their migration trajectories consumer desires and political demands amidst the restructuring of Thai capitalism after the 1997 economic crisis Reconstructing the entanglements between their everyday mobility and political mobilization Sopranzetti reveals mobility not just as a strength of contemporary capitalism but also as one of its fragile spots always prone to disruption by the people who sustain its channels but remain excluded from their benefits In so doing Owners of the Map advances an analysis of power that focuses not on the sturdiness of hegemony or the ubiquity of everyday resistance but on its potential fragility as well as the work needed for its maintenance      **Working towards the Monarchy** Serhat Ünalı, 2016-05-31 In the twilight years of Thailand's ailing King Bhumibol battles between royalists and their red shirt opponents are increasing and the tectonic shifts that lie beneath Thailand's decade old political crisis have become increasingly apparent Serhat naldi's Working towards the Monarchy sheds new light on recent developments with its bold analysis of urban space in downtown Bangkok buildings the author finds are abstractions of the complexities that shape Thailand's transformation Most criticism of the political role of the Thai monarchy its deep involvement in Thailand's uneven capitalist development Bhumibol's endorsement of military coups and his silent acquiescence to political violence has focused

on the role of individuals the king the royal family or privy councilors naldi departs from such limited intentionalist approaches to show instead just how deeply enmeshed the monarchy is in Thai society as a whole He demonstrates how and why Thais from all walks of life drew on royal charisma to advance their individual aims in effect working towards the monarchy naldi s sociological analysis of urban space reveals how buildings and spaces have been constructed for political and economic ends particularly to shore up the monarchy For several decades the architecture in central Bangkok has helped protect the charisma of the monarchy which dominates landholdings and investments in the area Because the sacred aura of the royal family legitimized capitalist expansion and consumerism it was defended and enhanced by those Bangkokians who profited from it Yet politically and geographically marginalized Thais failed to benefit from this royalist led capitalist development and eventually found a new leader business tycoon cum politician Thaksin Shinawatra When Thaksin s followers turned against royal charisma and attacked the architecture that represented and supported it movement away from royal charismatic authority became a real possibility for the first time By combining sociology political science architecture and anthropology Working towards the Monarchy offers a unique interdisciplinary approach It will interest scholars and generalists alike particularly those involved in the comparative study of monarchies **Siege of the Spirits**

Michael Herzfeld,2016-03-11 What happens when three hundred alleged squatters go head to head with an enormous city government looking to develop the place where they live As anthropologist Michael Herzfeld shows in this book the answer can be surprising He tells the story of Pom Mahakan a tiny enclave in the heart of old Bangkok whose residents have resisted authorities demands to vacate their homes for a quarter of a century It s a story of community versus government of old versus new and of political will versus the law Herzfeld argues that even though the residents of Pom Mahakan have lost every legal battle the city government has dragged them into they have won every public relations contest highlighting their struggle as one against bureaucrats who do not respect the age old values of Thai Siamese social and cultural order Such values include compassion for the poor and an understanding of urban space as deeply embedded in social and ritual relations In a gripping account of their standoff Herzfeld who simultaneously argues for the importance of activism in scholarship traces the agile political tactics and styles of the community s leadership using their struggle to illuminate the larger difficulties tensions and unresolved debates that continue to roil Thai society to this day **Researching the**

**contemporary city** Peter Kellett,Jaime Hernández García,2013-11-12 The city is perhaps the most complex of all human constructs In the 21st century when cities are bigger than ever and the majority of the world s population now live in urban areas the need for research into this complexity to address the large scale challenges of urban life has never been greater This collection of research studies from different parts of the world brings together case studies underpinned by theory to contribute to the urgent search to make our cities more just more livable more accessible more participatory and more democratic in short more humane places to live and work These crosscutting themes of social inclusion spatial integration

and poverty alleviation are the ever present motifs and motivations throughout this volume The eleven chapters are grouped into four interrelated sections the creation and representation of the urban the production and transformation of the informal the construction and appropriation of public spaces and finally the transformation use and meaning of home Collectively the essays engage with the city at a range of scales but underpinning all of them is a concern for the everyday realities of ordinary people s lives These detailed and finegrain analyses of complex processes are a modest contribution towards the creation of cities which are not simply more economically viable and environmentally sustainable but also embody the ideals of social justice

*Surviving Capitalism* Erik Ringmar, 2005 A fresh funny and imaginative discourse on the nature of capitalism and how society has learned to cope with it

Landscape Culture - Culturing Landscapes Diedrich Bruns, Olaf Kühne, Antje Schönwald, Simone Theile, 2015-04-29 In this book an international group of authors reflects mechanisms of the cultural and social construction of landscapes International migration and global exchange are associated with a multitude of different cultural meanings of landscapes The logics of multi cultural perceptions and meanings of landscape call for trans disciplinary research and for guidance on addressing culturally sensitive issues and inclusion in practical planning

**Encyclopedia of Urban Cultures** Melvin Ember, Carol R. Ember, 2002 Presents articles on over 240 major cities around the world including demographic information history politics public systems culture social life and future outlook

Wounded Cities Jane Schneider, Ida Susser, 2020-06-29 Although the seemingly apocalyptic scale of the World Trade Center disaster continues to haunt people across the globe it is only the most recent example of a city tragically wounded Cities are in fact perpetually caught up in cycles of degeneration and renewal As with the WTC from time to time these cycles are severely ruptured by a sudden unpredictable event In the wake of recent terrorist activities this timely book explores how urban populations are affected by wounds inflicted through violence civil wars overbuilding drug trafficking and the collapse of infrastructures as well as natural disasters such as earthquakes Mexico City New York Beirut Belfast Bangkok and Baghdad are just a few examples of cities riddled with problems that undermine on a daily basis the quality of urban life What does it mean for urban dwellers when the infrastructure of a city collapses transport communication grids heat light roads water and sanitation What are the effects of foreign investment and huge construction projects on urban populations and how does this change the look and character of a city How does drug trafficking intersect with class race and gender and what impact does it have on vulnerable urban communities How do political corruption and mafia networks distort the built environment Drawing on in depth case studies from across the globe this book answers these intriguing questions through its rigorous consideration of changing global and national contexts social movements and corrosive urban events Adopting a grass roots up approach it places emphasis on peoples experiences of uneven development and inequality their engagement with memory in the face of continual change and the relevance of political activism to bettering their lives It is especially attentive to the historical interaction of particular cities with wider political and economic forces as these interactions have

shaped local governance over time      Becoming Urban Ellen Elizabeth Boccuzzi, 2007      Embodied Utopias Amy  
Bingaman, Lise Sanders, Rebecca Zorach, 2003-12-16 Utopia has become a dirty word in recent scholarship on modernism  
architecture urban planning and gender studies Many utopian designs now appear impractical manifesting an arrogant  
disregard for the lived experiences of the ordinary inhabitants who make daily use of global public and private spaces The  
essays in Embodied Utopias argue that the gendered body is the crux of the hopes and disappointments of modern urban and  
suburban utopias of the Americas Europe and Asia They reassess utopian projects masculinist feminist colonialist progressive  
of the late nineteenth and early twentieth centuries they survey the dystopian landscapes of the present and they gesture at  
the potential for an embodied approach to the urban future to the changing spaces of cities and virtual landscapes
