

Advanced Manufacturing Technology Seminar Series **Fundamentals of Welding**

Welding is a process of joining materials, usually metals or thermoplastics, by using heat, pressure, or both to create a strong, permanent bond. It is a fundamental skill in manufacturing and construction, and is used in a wide range of applications, from automotive and aerospace to shipbuilding and infrastructure. This seminar series is designed to provide a comprehensive overview of the fundamentals of welding, covering the various types of welding processes, the materials used, and the safety considerations involved. The series is intended for both beginners and those with some experience in welding, and will provide a solid foundation for further study and practice. The topics covered include the history of welding, the basic principles of welding, the different types of welding processes (such as arc welding, gas metal arc welding, and gas tungsten arc welding), the materials used in welding (such as steel, aluminum, and titanium), and the safety considerations involved in welding. The series will also cover the various applications of welding, from automotive and aerospace to shipbuilding and infrastructure. The seminar series is presented by a leading expert in the field of welding, and will provide a comprehensive overview of the fundamentals of welding, covering the various types of welding processes, the materials used, and the safety considerations involved. The series is intended for both beginners and those with some experience in welding, and will provide a solid foundation for further study and practice.

The Fundamentals of Piping Design Peter

Smith,2013-11-21 Written for the piping engineer and designer in the field, this two-part series helps to fill a void in piping literature since the Rip Weaver books of the 90s were taken out of print at the advent of the Computer-Aided Design (CAD) era. Technology may have changed, however, the fundamentals of piping rules still apply in the digital representation of process piping systems. *The Fundamentals of Piping Design* is an introduction to the design of piping systems, various processes, and the layout of pipe work connecting the major items of equipment for the new hire, the engineering student, and the veteran engineer needing a reference.
