critically examines various aspects of higher mathematical education The two EU Tempus IV projects MetaMath and MathGeAr investigate the current methodologies of mathematics education for technical and engineering disciplines The projects aim to improve the existing mathematics curricula in Russian Georgian and Armenian universities by introducing modern technology enhanced learning TEL methods and tools as well as by shifting the focus of engineering mathematics education from a purely theoretical tradition to a more applied paradigm MetaMath and MathGeAr have brought together mathematics educators TEL specialists and experts in education quality assurance from 21 organizations across six countries The results of a comprehensive comparative analysis of the entire spectrum of mathematics courses in the EU Russia Georgia and Armenia has been conducted have allowed the consortium to pinpoint and introduce several modifications to their curricula while preserving the generally strong state of university mathematics education in these countries The book presents the methodology procedure and results of this analysis This book is a valuable resource for teachers especially those teaching mathematics and curriculum planners for engineers as well as for a general audience interested in scientific and technical higher education Paul Samuelson and the Foundations of Modern Economics K. Puttaswamaiah, 2019-01-22

Paul A Samuelson was the first American Nobel Laureate in economics and the second overall He was credited for the scientific work through which he has developed static and dynamic economic theory and actively contributed to raising the level of analysis in economic science That recognition is now thirty years old and Samuelson remains at work in the cutting edge of the discipline He is also widely known for a basic textbook that became a landmark learning tool throughout the second half of the twentieth century This excellent collegial appreciation focuses heavily on Samuelson's Foundations of Economic Analysis In that work and a series of brief essays he has contributed to an integration of statics and dynamics by way of the correspondence principle He has also combined the multiplier and accelerator mechanisms in a model of economic fluctuations he has reformed the foundations of consumption theory by his concept of revealed preferences he has developed or improved several major theorems within international trade and created theories of maximum efficiency and maximum growth rate Finally he has clarified the role of collective goods in resource allocation In considering the work and life of Samuelson editor Puttaswamaiah has assembled a worthy group of brilliant commentators Among the analytic papers in this volume are An essay on the Accuracy of Economic Prediction by L R Klein Analytical Aspects of Anti Inflation Policy by Robert M Solow a paper by Vittorangelo Orati on Samuelson's linkage to Schumpeter and Keynes Money and Price Theory by Carlo Benetti and Jean Cartelier and a concluding essay on The Role of Samuelson's Economics by Michael Emmett Brady Most unusual in works of this kind are some strong critical statements including a pungent examination of vanity as well as creativity in Samuelson's work What emerges is a clear picture of a special scholar Scholars and students will welcome it alike a result that well fits the purpose and character of Samuelson The festschrift has its origins in several issues of the International Journal of Applied Economics and Econometrics Professor K Puttaswamaiah has more than three decades of

editing journals in economics He is a member of the journal Savings and Development issued at the University of Milan He is author of Economic Development of Karnataka Cost Benefit Analysis and Nobel Economists Lives and Contributions
