Robotics Nicholas Roy,Paul Newman,Siddhartha Srinivasa,2013-07-05 Robotics Science and Systems VIII spans a wide spectrum of robotics bringing together contributions from researchers working on the mathematical foundations of robotics robotics applications and analysis of robotics systems Advanced Hybrid Information Processing Shuai Liu,Liyun Xia,2021-02-02 This two volume set constitutes the post conference proceedings of the 4th EAI International Conference on Advanced Hybrid Information Processing ADHIP 2020 held in Binzhou China in September 2020 Due to COVID 19 the conference was held virtually The 89 papers presented were selected from 190 submissions and focus on theory and application of hybrid information processing technology for smarter and more effective research and application The theme of ADHIP 2020 was Industrial applications of aspects with big data The papers are named in topical sections as follows Industrial application of multi modal information processing Industrialized big data processing Industrial automation and intelligent control Visual information processing DOW ,1951 **Image** Sergio Vitulano,2003 This volume emphasizes the primary role played by images in computer science In the last two decades images have replaced written texts the enormous possibilities of the image language have overcome written language in an ever more restricted ambit An image is better than one thousand words so it was straightforward to apply visual language in the field of computer science Nowadays everything that appears on a computer screen is an image regardless of whether it is a word or a picture Is it possible to realize an e learning program without working in terms of images The answer is undoubtedly no even if several problems arise in this context the qualitative and quantitative content of the image we need to use for a specific task the psychological effect on the user including the level of attention and the correct perception of the image significance Most of these problems form the basis of image understanding techniques Widespread use of images requires organization of the information in the databank or database whose dimensions are sometimes so wide as to be too complex to manage therefore information retrieval techniques arise from this need The new instruments used in image and or remote diagnosis image transmission the respect of the law in force and the ever more relevant image storage capacity required for this task imply the use of techniques of visual language and information retrieval The proceedings have been selected for coverage in OCo Index to Scientific Technical Proceedings ISTP ISI Proceedings OCo Index to Scientific Technical Proceedings ISTP CDROM version ISI Proceedings **PVC Technology** M.V. Titow,2012-12-06 This book continues the tradition of the first two editions of the late W S Penn s original PVC Technology and the extensively revised third 1971 edition prepared by myself and B J Lanham In the present edition the original general format and the arrangement of chapters have been largely preserved but virtually nothing now remains of Penn s own text a part of the contents is based on material from the 1971 TitowLanham version revised updated and mainly rewritten the rest is new including inter alia several chapters specially contributed by experts from the plastics industry in the UK and Europe The section listing international ISO and national BS ASTM and DIN

standards relevant to PVC which was first introduced as Appendix 1 in the 1971 edition proved a popular feature it has now been brought up to date and considerably extended Two further appendices provide respectively comprehensive unit conversion tables with additional information on some of the most frequently encountered units and the SI units and a list of many properties of interest in PVC materials with definitions typical numerical values and references to relevant standard test methods For various reasons work on this edition involved more than the usual quota of problems I am truly grateful to the Publisher's Managing Editor Mr G B Olley for his understanding patience unfailing courtesy and friendly encouragement

Energetic Materials Manoj K. Shukla, Veera M. Boddu, Jeffery A. Steevens, Reddy Damavarapu, Jerzy Leszczynski, 2017-10-09 This book offers a comprehensive account of energetic materials including their synthesis computational modeling applications associated degradation mechanisms environmental consequences and fate and transport This multi author contributed volume describes how armed forces around the world are moving their attention from legacy explosive compounds which are heat and shock sensitive thus posing greater challenges in terms of handling and storage to the insensitive munitions compounds formulations such as insensitive munitions explosive IMX and the Picatinny Arsenal Explosive PAX series of compounds The description of energetic materials focuses on explosives pyrotechnic compositions and propellants The contributors go on to explain how modern generation energetic compounds must be insensitive to shock and heat but at the same time yield more energy upon explosion Nanoinspired and/or co-crystallized energetic materials offer another route to generate next generation energetic materials and this authoritative book bridges a large gap in the literature by providing a comprehensive analysis of these compounds Additionally it includes a valuable overview of energetic materials a detailed discussion of recent advances on future energetic compounds nanotechnology in energetic materials environmental contamination and toxicity assessment of munitions lethality the application quantitative structure activity relationship QSAR in design of energetics and the fate and transport of munition compounds in the environment
