Tarcher, 2013-11-11 Throughout the world, scientists and the general public are concerned about the adverse effects of chemical and physical agents commonly found in contaminated air, water, food, and soil. In the past, attention has focused on hazardous wastes, also discussed as originating in the workplace. As a consequence, Part II characterizes the body's defense against occupational hazards, which has become a well recognized discipline. Much less attention has been paid to nonoccupational hazards. There, nutrition, detoxication, and immunologic defense is a growing awareness, however, of the dangers of mechanisms are described. Part IV indicates the exposure to toxic chemical and physical agents in importance of and provides instruction on the home, community, and general environment method of including occupational and environmental especially for the fetus, the infant, the very young, and factors in the routine medical history. The role of the elderly and the chronically ill, those most susceptible, enhanced susceptibility as a factor in an individual's response to toxic exposure is discussed.      *Principles and Practice of Head and Neck Surgery and Oncology* Paul Q. Montgomery, Peter H. Rhys Evans, Patrick J. Gullane, 2009-07-09 This second edition of an award winning title has been thoroughly updated by a team of world leading head and neck surgeons, oncologists, and allied healthcare professionals. *Principles and Practice of Head Neck Surgery and Oncology* 2nd edition is a comprehensive evidence based account of the current scientific knowledge about head and neck tumors.      **Basics of Oncology** Frederick O Stephens, Karl Reinhard Aigner, 2009-04-29 *Basics of Oncology* provides an easily understood and general overview of the basic medical, scientific, and clinical aspects of cancer. Causes, pathology, clinical features, diagnostic investigations, treatments, and outcomes are all carefully explained and discussed, both for cancers in general and for the common cancers in individual countries. The reader will thereby be provided with an understanding of how and why people

develop cancer how the body reacts to cancer what can be done to prevent the disease and how the various cancers are best diagnosed and treated The book will serve as a sound basis for the more detailed or specific studies that may be needed in different areas of practice and in different countries It will be invaluable for students of medicine nurse oncologists students of medical sciences and other health professionals in all parts of the world
