

A Study of Fundamental Concepts in Ancient Chinese Philosophy

Philosophical thought emerged in three primary regions: Greece, India, and China, each contributing uniquely to the development of global intellectual traditions. Among these, ancient Chinese philosophy is distinct in its approach and profound in its influence, shaping not only Chinese intellectual history but also its cultural practices, medicine, religion, and even cuisine. The foundational ideas of ancient Chinese philosophy have continued to inform later traditions, such as Taoism and Confucianism, underscoring the importance of examining these early concepts to better understand their lasting impact. This research focuses on identifying the fundamental principles that underpin ancient Chinese philosophical thought. Specifically, three key concepts are explored: Yu and Wu, which represent existence and non-existence; Yin and Yang, the complementary forces that embody balance and duality; and the I Ching (Book of Changes), a classic text that outlines the dynamic interplay of opposites and change in the universe. Understanding these core ideas is essential for grasping the broader scope of Chinese philosophical discourse. The research methodology employed is qualitative, relying primarily on a comprehensive literature review. Data is collected from classical texts and contemporary interpretations, while the analysis is conducted using the Kantian critique approach, which allows for a rigorous examination of the philosophical concepts within their historical and cultural context. This study provides a deeper understanding of ancient Chinese philosophy and highlights its enduring relevance in shaping not only Chinese thought but also the broader spectrum of human philosophy.

Keywords: Yu-Wu, Yin-Yang, I Ching, Ancient China, Chinese Philosophy
