This book proposes a new solution to the problem of the migration crisis engulfing the world by creating safe harbours or Free Global Cities In the face of the largest displacement crisis on record, even the most optimistic view of the future suggests that in the years ahead more and more people will migrate in order to survive The world requires places where refugees and other migrants forced to leave their homes have the opportunity to work, study, create, start businesses and rebuild new lives for themselves and their families Free Global Cities can deal with this growing global crisis in a completely new way They are autonomous, self-governed subnational entities that provide a safe environment and rule of law that will create wealth and prosperity for its residents as well as for the nations hosting them Such a model would contribute significantly to handle the largest migration crisis in history which the world will be experiencing in the coming decades

Challenging conventional leadership models, this timely and pioneering volume offers a critical rethinking of educational leadership in the context of global crises, particularly climate change and social inequality. Chapters introduce transformative approaches that prioritise sustainability, social justice, and collaboration by critically examining historical and philosophical foundations of current educational leadership through a blend of scholarly analysis and practical insights. Qualitative international data used in this book lend insight into educators' lived perspectives. This book introduces thinkers such as Habermas, Serres, Foucault, Heidegger, and Anders on knowledge generation as applied to educational leadership. This book challenges neoliberal and patriarchal models of leadership that dominate the field. It offers innovative frameworks such as degrowth and political ecology to address the pressing issues of climate change and social inequality. Ultimately, this book champions critical thinking as a tool for leadership and a resource for leading and will be of use to researchers, scholars, and postgraduate students interested in leadership strategy, sustainability, education training and leadership, and the theory of education more broadly. Those involved with higher education management and philosophy of education will also find this book of value. *National Security : Emerging Dimensions and Threats* Navniit Gandhi, 2010. There is a visible change in the outlook towards security all over the world, probably because of the increasing complexity of global problems and their repercussions for millions of people all over the world. Insecurity is not just all pervasive but is reiterating its alarming overtones more forcefully than during the cold war era. There are now threats very different from a military attack on a nation's territory. The concept of National Security hence needs to be redefined. The gamut of its perceptions has undergone a paradigm shift. The context against which the policy makers seek to establish national security is undergoing tumultuous changes. While not downplaying the relevance of strategic means of maintaining national security, this book explores the emerging non-strategic threats to national security with the obvious grave consequences on human security. This book attempts to address several questions: Can the concepts of National Security and Human Security be reconciled meaningfully? Can their approaches and objectives be intertwined so that we can live a fuller life? Can the nations and citizenry both feel equally secure at the same time? **Handbook of International Social Work** Lynne M. Healy, Rosemary J. Link, 2011-10-20.
