**Time and Psychological Explanation** Brent D. Slife, 1993-07-01 Psychology has been captured by an assumption that is almost totally unrecognized This assumption the linearity of time unduly restricts theory and therapy yet this restriction is so common so customary that it is often completely ignored This book traces the influence of this assumption and reveals the many overlooked anomalies to its dominance Slife describes the many findings and explanations that are incompatible with linear time in several psychological specialties He contends that these unnoticed anomalies point to alternative conceptions of time that offer innovative ideas for psychological explanation and treatment *Kierkegaard, Eve and Metaphors of Birth* Alison Assiter, 2015-04-29 There has been a recent revival of interest in reading Kierkegaard as an ontologist as a thinker who engages with questions about the kinds of entity or process that constitute ultimate reality This new way of reading Kierkegaard stands alongside a revival of interest in ontology and metaphysics more generally This highly original book concentrates on the claim that Kierkegaard focuses in part on ontological questions and on issues pertaining to the nature of being as a whole Alison Assiter asserts that Being for Kierkegaard following Schelling can be read in terms of conceptions of birthing the capacity to give birth as well as the notion of a birthing body She goes on to argue that the story offered by Kierkegaard in *The Concept of Anxiety* about the origin of freedom connects with a birthing body and that Kierkegaard offers a speculative hypothesis in terms of metaphors of birthing about the nature of Being

Ending the Science Wars John D. Baldwin, 2015-12-03 The science wars have been raging for decades raising many questions about the power of science Some critics claim that science including social science is merely a social construction that fallible humans have created with words and other symbols If this is true is science as formidable a source of knowledge as most scientists claim Baldwin explains why the edifice of science has robust properties that make it one of the most useful forms of knowledge that humans have ever created although it is not perfect He trenchantly examines all sides of the debate and uses the philosophy of pragmatism to reveal the special characteristics that make science work as well as it does Ending the Science Wars shows how science is far better grounded than its critics claim The book not only helps resolve many current debates about science it is a major contribution for explaining science in terms of a powerful philosophical system This makes the book valuable to scientists in all fields of research and intellectually challenging for science's critics

**The Coming of God** Jürgen Moltmann, Margaret Kohl, 2004-07-27 Winner of Grawemeyer Award In this remarkable and timely work in many ways the culmination of his systematic theology world renowned theologian Jürgen Moltmann stands Christian eschatology on its head Moltmann rejects the traditional approach which focuses on the End an apocalyptic finale as a kind of Christian search for the final solution He centers instead on hope and God's promise of new creation for all things Christian eschatology he says is the remembered hope of the raising of the crucified Christ so it talks about beginning afresh in the deadly end Yet Moltmann's novel framework deeply informed by Jewish and messianic thought also fosters rich and creative insights into the perennially nettling questions of eschatology Are there eternal life and personal identity after death How is one to think of heaven hell and purgatory What are the historical and cosmological dimensions of Christian hope What are its social and political implications In a heartbreakingly fragile and fragment world Moltmann's comprehensive eschatology surveys the

Christian vista bravely envisioning our horizons of expectation for personal social even cosmic transformation in God

**Analytics and Intuition in the Process of Selecting Talent** Jürgen Deters, 2022-11-07 Human decisions especially in management and personnel selection are based on making judgments about people analytically and intuitively Yet in business and scientific contexts judgments are expected to be based on a rational analysis rather than intuitions or emotions Intuition is often seen as something mystical that should not be trusted and thus eliminated from human decision making Our empirical and theoretical research shows that this is impossible when people are dealing with people Instead intuitions and emotions have significant power in the decision making process Neuroscience even shows that humans are incapable of switching off their emotions or intuitions when making decisions Therefore intuition and emotions as evolutionary achievements of human beings should be looked at more closely to use the wisdom they offer This book provides an insight into the current state of research on rational analytical procedures in personnel selection and complements this with research on intuitions and emotions in personnel diagnostics By integrating scientifically verifiable rational analytical decision making procedures with the inner experiential knowledge of people this book bridges two complementary ways of recognizing and making good decisions It demonstrates how intuitions are developed and used in different fields of practice and cultures and how scientific research results from rational analytical and intuitive emotional selection procedures are successfully integrated by practitioners
