Future Of Foundations In An Open Society:

The Future of Foundations in an Open Society Bertelsmann Stiftung (Gütersloh, Germany), 1999 The forces of globalization affect the world of politics and business in powerful ways Electronic media instant communication and the free flow of goods and services exert pressure on societies to adapt to new ways of life But they also allow for the rapid dissemination of new ideas and perspectives and have made possible the spreading of democratic values and open societies This new environment presents both challenges and opportunities for foundations They are called upon to adopt new roles that were once the domain of state and governmental institutions At the same time they are asked to perform them in better and more efficient ways In addition international integration mandates that their perspectives and strategies transcend national borders This book contains the proceedings of an international symposium hosted by the Bertelsmann Foundation It documents the growing consensus that in the open society it is not enough for foundations to do good they have to do it well The contributors are Dieter Feddersen Caio K Koch Weser Reinhard Mohn Kenneth Prewitt John Richardson and Dorothy S Ridings

Foundations of the American Century Inderjeet Parmar, 2012-04-03 Inderjeet Parmar reveals the complex interrelations shared mindsets and collaborative efforts of influential public and private organizations in the building of American hegemony Focusing on the involvement of the Ford Rockefeller and Carnegie foundations in U S foreign affairs Parmar traces the transformation of

America from an isolationist nation into the world's only superpower all in the name of benevolent stewardship Parmar begins in the 1920s with the establishment of these foundations and their system of top down elitist scientific giving which focused more on managing social political and economic change than on solving modern society's structural problems Consulting rare documents and other archival materials he recounts how the American intellectuals academics and policy makers affiliated with these organizations institutionalized such elitism which then bled into the machinery of U S foreign policy and became regarded as the essence of modernity America hoped to replace Britain in the role of global hegemon and created the necessary political ideological military and institutional capacity to do so yet far from being objective the Ford Rockefeller and Carnegie foundations often advanced U S interests at the expense of other nations Incorporating case studies of American philanthropy in Nigeria Chile and Indonesia Parmar boldly exposes the knowledge networks underwriting American dominance in the twentieth century

to deliver on that idea with impact **Strategic Giving** Peter Frumkin,2008-09-15 The philanthropic landscape is changing dramatically as a new generation of wealthy donors seeks to leave its mark on the public sphere Peter Frumkin reveals in *Strategic Giving* why these donors could benefit from having a comprehensive plan to guide their giving And with this thoughtful and timely book he provides the much needed framework to understand and develop this kind of philanthropic strategy After listening for years to scores of individual and institutional funders discuss the challenges of giving wisely Frumkin argues here that contemporary philanthropy requires a thorough rethinking of its underlying logic Philanthropy should be seen he contends as both a powerful way to meet public needs and a meaningful way to express private beliefs and commitments He demonstrates that finding a way to simultaneously fulfill both of these functions is crucial to the survival of philanthropy and its potential to support pluralism in society And he goes on to identify the five essential elements donors must consider when developing a philanthropic strategy the vehicle through which giving will flow the way impact will be achieved the level of engagement and profile sought the time frame for giving and the underlying purpose of the gift Frumkin's point is that donors must understand strategic giving as the integration of these five critical dimensions to giving Essential reading for donors researchers and anyone involved with the world of philanthropy *Strategic Giving* provides a new basis for understanding philanthropic effectiveness and a promising new way for philanthropy to achieve the legitimacy that has at times eluded it *Buying a Better World* Anna Porter,2015-02-21 George Soros is a billionaire and a philanthropist a social activist who uses his wealth to champion social causes and change the world With access to Soros and his Open Society Foundations Anna Porter examines the growth of the man and the organization the causes he has championed and his successes and failures [Europa International Foundational Directory 2024](#) Europa Publications,2024-08-22 This fully revised directory of international foundations trusts charitable and grantmaking NGOs and other similar non profit institutions provides a comprehensive picture of foundation activity on a worldwide scale Now in its 33rd edition The Europa International Foundation Directory includes Information on some 2 700 organizations organized by country or territory including details of funding priorities and projects geographical area of activity principal staff and contact details Details of coordinating bodies and centres that assist foundations grantmaking organizations and other NGOs Bibliography Comprehensive index section This new edition has been revised and expanded to include the most comprehensive and up to date information on this growing sector **The Europa International Foundation Directory 2025** Europa Publications,2025-07-24 This fully revised directory of international foundations trusts charitable and grantmaking NGOs and other similar non profit institutions provides a comprehensive picture of foundation activity on a worldwide scale Now in its 34th edition The Europa International Foundation Directory includes Information on some 2 700 organizations organized by country or territory including details of funding priorities and projects geographical area of activity principal staff and contact details Details of coordinating bodies and centres that assist foundations grantmaking organizations and other NGOs

Miller, Karl Zinsmeister, Ashley May, 2015-03-07 Donating money to modify public thinking and government policy has now taken its place next to service centered giving as a constructive branch of philanthropy Many donors now view public policy reform as a necessary adjunct to their efforts to improve lives directly This is perhaps inevitable given the mushrooming presence of government in our lives In 1930 just 12 percent of U S GDP was consumed by government by 2012 that had tripled to 36 percent Unless and until that expansion of the state reverses it is unrealistic to expect the philanthropic sector to stop trying to have a say in public policies Sometimes it s not enough to build a house of worship one must create policies that make it possible for people to practice their faith freely within society Sometimes it s not enough to pay for a scholarship one must change laws so that high quality schools exist for scholarship recipients to take advantage of Yet public policy philanthropy has special ways of mystifying and frustrating practitioners It requires understanding of governmental practice interpretation of human nature and some philosophical perspective Public policy philanthropists may encounter opponents operating from different principles who view them as outright enemies Moreover public policy struggles never seem to end victories one year become defeats the next followed by comebacks then setbacks and on and on This book was written to help donors navigate all of those obstacles It draws on deep history and rich interviews with the very best practitioners of public policy
