International Migration And Security Opportunities And Challenges:

International Migration and Security Elspeth Guild, Joanne van Selm, 2005 Every day newspapers in the Western world carry articles about illegal immigrants asylum seekers and other migrants The focus of these articles varies greatly from migrants as a threat to one or another important social or societal interest to migrants as an important asset to those same interests The tone is most often emotional whichever way the focus goes The overall impact is to confuse is migration good or bad In this book Guild and van Selm seek to investigate these value assessments regarding migrants in Europe the USA Canada and Australia While looking at issues such as security human rights legal systems identity racism welfare health and labour the authors also respond to critics of immigration *International Migration and Security* Elspeth Guild, Joanne van Selm, 2005-03-31 This book investigates value assessments regarding migrants in Europe the USA Canada and Australia While looking at issues such as security human rights legal systems identity racism welfare health and labour

Immigration, Integration, and Security Ariane Chebel D'Appollonia, Simon Reich, 2008-05-01 Recent acts of terrorism in Britain and Europe and the events of 9 11 in the United States have greatly influenced immigration security and integration policies in these countries Yet many of the current practices surrounding these issues were developed decades ago and are ill suited to the dynamics of today's global economies and immigration patterns At the core of much policy debate is the inherent paradox whereby immigrant populations are frequently perceived as posing a potential security threat yet bolster economies by providing an inexpensive workforce Strict attention to border controls and immigration quotas has diverted focus away from perhaps the most significant dilemma the integration of existing immigrant groups Often restricted in their civil and political rights and targets of xenophobia racial profiling and discrimination immigrants are unable or unwilling to integrate into the population These factors breed distrust disenfranchisement and hatred factors that potentially engender radicalization and can even threaten internal security The contributors compare policies on these issues at three relational levels between individual EU nations and the U S between the EU and U S and among EU nations What emerges is a timely and critical examination of the variations and contradictions in policy at each level of interaction and how different agencies and different nations often work in opposition to each other with self defeating results While the contributors differ on courses of action they offer fresh perspectives some examining significant case studies and laying the groundwork for future debate on these crucial issues The Routledge Handbook of Security Studies Myriam Dunn Cavelty, Victor Mauer, Thierry Balzacq, 2009-12-16 Pt 1 Theoretical approaches to security and different securities pt 2 Contemporary security challenges pt 3 Regional security challenges pt 4 Confronting security challenges Handbook of Security Science Anthony J. Masys, 2022-09-27 This handbook offers insights into how science physical natural and social and technology can support new developments to manage the complexity resident within the threat and risk landscape The security landscape can be described as dynamic and complex stemming from the emerging threats and risks that are both persistent and transborder

Security Beyond the State Rita Abrahamsen, Michael C. Williams, 2010-11-18 Across the globe from mega cities to isolated resource enclaves the provision and governance of security takes place within assemblages that are de territorialized in terms of actors technologies norms and discourses They are embedded in a complex transnational architecture defying conventional distinctions between public and private global and local Drawing on theories of globalization and late modernity along with insights from criminology political science and sociology Security Beyond the State maps the emergence of the global private security sector and develops a novel analytical framework for understanding these global security assemblages Through in depth examinations of four African countries Kenya Nigeria Sierra Leone and South Africa it demonstrates how global security assemblages affect the distribution of social power the dynamics of state stability and the operations of the international political economy with significant implications for who gets secured and how in a global era

Fluid Security in the Asia Pacific Claudia Tazreiter, Leanne Weber, Sharon Pickering, Marie Segrave, Helen McKernan, 2016-02-20 This book explores the experiences of temporary migrants in the Asia Pacific region It develops the original concept of fluid security to analyse the way in which persons carry a set of tools strategies and attitudes across spatial temporal and imagined borders This concept applies a mobilities lens to human security in order to take into account the aspirations and needs of mobile populations appropriate for a globalising world The book brings to light the diverse experiences of mobility and the multiple vulnerabilities experienced by individuals that intersect with and sometimes challenge national security domains The authors analyse mobility patterns that are diversifying at a rate far outstripping the capacity of governments to adapt to the human security needs of mobile populations While the idea of global citizenship may be held up as an ideal through which access to rights is not an arbitrary lottery it remains far from a reality for the majority of migrants They are excluded from the migratory flows global elites engage in almost at will This important book advances the idea that mobile individuals can generate their own security when

they have agency and the ability to plan that experiences of security are not necessarily tied to permanence that mobile populations benefit from policies that support transnational life and that fluid security is enhanced when individuals are able to carry a bundle of rights with them **The Long-Term Residence Status as a Subsidiary Form of EU Citizenship**

Diego Acosta Arcarazo, 2011-05-23 This book studies the implications for third country nationals of the adoption of the Long term Residence Directive This Directive has the potential to become a subsidiary form of EU citizenship which escapes direct control by Member States Hence this Directive brings the prospect of transforming Member States control over the relationship between territory and population In order to arrive at this conclusion the book looks at its content and at the way in which Member States have implemented some of its most controversial articles It then explores how the Court of Justice could interpret those articles taking into account its previous jurisprudence on Turkish workers and EU citizens and calling into question the compliance of several national provisions with EU law **The Challenge of Global Migration - Human Rights, Security and Refugees**

Christoph Bluth, 2024-07-30 This is a comprehensive study that examines the sources of refugee flows in particular as they relate to political persecution trafficking human slavery and human rights challenges Liberal democratic states have been contending with significant refugee inflows The migration of large populations to Europe and North America is driven by various factors including regional conflicts the impacts of global warming political opposition to autocratic regimes and societal as well as cultural relations The purpose of this study is to understand the nature of human rights challenges to cut through false perceptions and myths in relation to the sources of migration and refugee flows and to provide a deeper understanding for academics and practitioners in relation to the support for refugees and victims of human slavery **Transnational Islam and Regional Security**

Frederic Volpi, 2013-09-13 This volume investigates the impact of a new brand of transnational terrorism and political violence produced by radical Islamist groups from the Maghreb on the regional security dynamics It describes the causes of the problems and the strategies devised by European and North African states in order to address it and details the successes and failures of co operation between states and society on both shores of the Mediterranean Investigating the grand security strategies that have been devised for the Mediterranean after the Cold War and after 9 11 the contributors focus on the role of police and military apparati in securitizing the new threats that have become prominent after 9 11 and the unintended consequences of these strategies In addition the contributors analyze the relationship between Islamist groups the state and society and highlight some key causes of political violence and radicalism They outline how a better use of the law migration and intercultural dialogue might provide useful alternatives or complements to the mostly securitarian strategies that are currently dominant in the region **Security Versus Freedom?**

security and justice at a time when key policy priorities are taking shape within the EU Bringing together contributors from different backgrounds the volume is ideal for students and scholars of European studies law political science political theory and sociology

Accumulating Insecurity Shelley Feldman, Charles C. Geisler, Gayatri A. Menon, 2011 *Accumulating Insecurity* examines the relationship between two vitally important contemporary phenomena a fixation on security that justifies global military engagements and the militarization of civilian life and the dramatic increase in day to day insecurity associated with contemporary crises in health care housing incarceration personal debt and unemployment Contributors to the volume explore how violence is used to maintain conditions for accumulating capital Across world regions violence is manifested in the increasingly strained often terrifying circumstances in which people struggle to socially reproduce themselves Security is often sought through armaments and containment which can lead to the impoverishment rather than the nourishment of laboring bodies Under increasingly precarious conditions governments oversee the movements of people rather than scrutinize and regulate the highly volatile movements of capital They often do so through practices that condone dispossession in the name of economic and political security

The Rise and Decline of a Global Security Actor Anne Hammerstad, 2014-02-20 *The Rise and Decline of a Global Security Actor* investigates the rise of the United Nations High Commissioner for Refugees UNHCR as a global security actor It follows the refugee agency through some of the past two decades major conflict induced humanitarian emergencies in northern Iraq 1991 Bosnia 1991 95 eastern Zaire 1994 96 Kosovo 1998 99 Afghanistan 2001 and Iraq 2003 It analyses UNHCR s momentous transformation from a small timid legal protection agency to the world s foremost humanitarian actor playing a central role in the international response to the many wars of the tumultuous last decade of the 20th century Then as the 21st century set in the agency s political prominence waned It remains a major humanitarian actor

whose budgets and staffing levels continue to rise But the polarised post 9 11 period and a worsening protection climate for refugees and asylum seekers spurred UNHCR to abandon its claim to be a global security actor and return to a more modest quietly diplomatic role The rise of UNHCR as a global security actor is placed within the context of the dramatic shift in perceptions of national and international security after the end of the Cold War The Cold War superpower struggle encouraged a narrow strategic military understanding of security In the more fluid and unpredictable post Cold War environment a range of new issues were introduced to states security agendas Prominent among these were the perceived threats posed by refugees and asylum seekers to international security state stability and societal cohesion This book investigates UNHCR s response to this new international environment adopting adapting and finally abandoning a security discourse on the refugee problem

Race, Ethnicity and Welfare States Pauli Kettunen, Sonya Michel, Klaus Petersen, 2015-06-29 In this interdisciplinary volume leading and emerging scholars examine the relationship between homogeneity and welfare state development They trace Gunnar Myrdal s influence on thinking about race in the US and explore current European states appro
