Bowen, J.E. Nicholls, 2013-03-09 The Z notation has been developed at the Programming Research Group at the Oxford University Computing Laboratory and elsewhere for over a decade It is now used by industry as part of the software and hardware development process in both Europe and the USA It is currently undergoing BSI standardisation in the UK and has been proposed for ISO standardisation internationally In recent years researchers have begun to focus increasingly on the development of techniques and tools to encourage the wider application of Z and other formal methods and notations This volume contains papers from the Seventh Annual Z User Meeting held in London in December 1992 In contrast to previous years the meeting concentrated specifically on industrial applications of Z and a high proportion of the participants came from an industrial background The theme is well represented by the four invited papers Three of these discuss ways in which formal methods are being introduced and the fourth presents an international survey of industrial applications It also provides a reminder of the improvements which are needed to make these methods an accepted part of software development In addition the volume contains several submitted papers on the industrial use of Z two of which discuss the key area of safety critical applications There are also a number of papers related to the recently completed ZIP project The papers cover all the main areas of the project including methods tools and the development of a Z Standard the first publicly available version of which was made available at the meeting Finally the volume contains a select Z bibliography and section on how to access information on Z through comp specification z the international computer based USENET newsgroup Z User Workshop London 1992 provides an important overview of current research into industrial applications of Z and will provide invaluable reading for researchers postgraduate students and also potential industrial users of Z *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 Californium-252 Isotope for 21st Century Radiotherapy J.G. Wierzbicki, 2012-12-06 Californium 252 is a neutron emitter with a high specific activity making it useful in a variety of applications the most spectacular of which is in brachytherapy for cancer patients Radiation oncology has exhausted nearly every option for treating radioresistant tumors by photon brachytherapy and therefore new types of radiation need to be studied to improve the curability of cancer Audience Californium brachytherapy is used in only a few radiation therapy centers in the world so the book will be highly instructive for radiation oncologists medical physicists and radiobiologists The nuclear techniques used in clinical applications may also interest nuclear physicists and engineers **Future Energy Conferences and Symposia** ,1994 **Epac'90** ,1990 **Journal of the National Cancer Institute** ,1992-07 Each issue is packed with extensive news about important cancer
