International Labor Working Class No58:

International Labor and Working Class History, 2005 *Ostkrieg* Stephen G. Fritz, 2011-09-08 On June 22 1941 Germany launched the greatest land assault in history on the Soviet Union an attack that Adolf Hitler deemed crucial to ensure German economic and political survival As the key theater of the war for the Germans the eastern front consumed enormous levels of resources and accounted for 75 percent of all German casualties Despite the significance of this campaign to Germany and to the war as a whole few English language publications of the last thirty five years have addressed these pivotal events In *Ostkrieg* Hitler's War of Extermination in the East Stephen G Fritz bridges the gap in scholarship by incorporating historical research from the last several decades into an accessible comprehensive and coherent narrative His analysis of the Russo German War from a German perspective covers all aspects of the eastern front demonstrating the interrelation of military events economic policy resource exploitation and racial policy that first motivated the invasion This in depth account challenges accepted notions about World War II and promotes greater understanding of a topic that has been neglected by historians *Laboring Along* Adrian Grama, 2018-11-05 Products of war rather than revolution the socialist regimes of Eastern Europe emerged in a global conjuncture defined by the aftermath of the Second World War How did these regimes manage to overcome the domestic impact of the war and build socialism at the same time This book shows how a commitment to productivity structured the transition from the period of postwar reconstruction to the take off of industrial development during the late 1950s Conceived as 1 pacification of labor relations 2 the recovery of managerial authority 3 monetarization of everyday life 4 rationalization and 5 austerity the politics of productivity provides a comprehensive conceptual framework for grasping together the end of the postwar period and the building of state socialism in Eastern Europe By revealing how the social consequences of the Second World War were absorbed in the transition to authoritarian state socialism in the age of the rolling steel mill this book carries implications for the way in which we may think about the aftermath of wars reconstruction and development during the second half of the twentieth century Red Holocaust Steven Rosefielde, 2009-12-16 Twentieth and twenty first century communism is a failed experiment in social engineering that needlessly killed approximately 60 million people and perhaps tens of millions more These high crimes against humanity constitute a Red Holocaust that exceeds the combined carnage of the French Reign of Terror Ha Shoah Showa Japan's Asian holocaust and all combat deaths in World War I and II This fascinating book investigates high crimes against humanity in the Soviet Union eastern and central Europe North Korea China Vietnam Laos and Cambodia 1929 2009 and compares the results with Ha Shoah and the Japanese Asian Holocaust As in other studies blame is ascribed to political ideological and personal causes but special emphasis is given to internal contradictions in Marx's utopian model as well as Stalinist and post Stalinist transition systems concocted to realize communist ends This faulty economic engineering forms a bridge to the larger issue of communism's historical failure The book includes a comprehensive study of the transcommunist

holocaust a judicial assessment of holocaust culpability and special pleadings an obituary for Stalinism everywhere except North Korea and a death watch for contemporary communism in China Vietnam Laos Cambodia North Korea Cuba and Nepal a comparative assessment of totalitarian high crimes against humanity a call for memory as a defense against recurrent economic racial and ethnic holocausts The book will be useful to undergraduate and higher level students interested in Russian history Stalism communism North and South Korean economic performance and international affairs Steven Rosefielde is a Professor of Economics at the University of North Carolina Chapel Hill and a member of the Russian Academy of Natural Sciences *Challenging Global Capitalism* N. Pizzolato, 2013-05-14 In the 1950s 1960s and 1970s Detroit and Turin were both sites of significant political and social upheaval This comparative and transnational study examines the political and theoretical developments that emerged in these two motor cities among activist workers and political militants during these decades Red Holocaust , **Builders of the Third Reich** Charles Dick, 2020-11-12 This is the first comprehensive critical study of the Organisation Todt OT a key institution which oversaw the Third Reich's vast slave labour programme together with the SS Wehrmacht and industry The book breaks new ground by revealing the full extent of the organisation's brutal and murderous operations across occupied Europe and in the Reich For the first time Charles Dick provides a strong voice for camp survivors overseen by the OT drawing on an extensive collection of personal accounts and analysing the violence they endured Builders of the Third Reich shows Hitler used the OT which had a labour force of around 1.5 million people in 1944 as an instrument of subjugation and occupation to project German imperial power Drawing on a broad range of primary sources it demonstrates how the organisation participated in the plunder of Europe's raw materials and manpower greatly boosting the German war economy The book reveals how OT staff shot beat or worked tens of thousands of prisoners to death both within the SS run concentration camp system and outside it with analysis of OT operations showing that where it had sole or very high levels of control over camps prisoner death rates were extremely high Examining how engineers and builders individuals who fitted the category of ordinary men as precisely as any other group so far examined by historians perpetrated war crimes this volume reflects on how few OT personnel were interrogated or came to trial and how the organisation passed largely under the radar of post war prosecutors researchers and the general public

Where was the Working Class? Linda Fuller, 1999 In six months bridging 1989 and 1990 the German Democratic Republic underwent a transformation that took the world almost completely by surprise Yet unlike the revolution in Poland a decade earlier only a small percentage of workers played a politically active role in the fall of socialism in Germany In this unprecedented study Linda Fuller sets out to explain why the working class was largely missing from the 1989-90 revolution Drawing on pre and post revolutionary visits to East German work sites and dozens of interviews Fuller documents workers day to day experience of the labor process workplace union politics and class She shows how all three factors led most workers to withdraw from politics even while prompting a handful to become actively involved in the struggle *Hunger*

and War Wendy Z. Goldman, Donald A. Filtzer, 2015-06-01 Drawing on recently released Soviet archival materials *Hunger and War* investigates state food supply policy and its impact on Soviet society during World War II It explores the role of the state in provisioning the urban population particularly workers with food feeding the Red army the medicalization of hunger hunger in blockaded Leningrad and civilian mortality from hunger and malnutrition in other home front industrial regions New research reported here challenges and complicates many of the narratives and counter narratives about the war The authors engage such difficult subjects as starvation mortality bitterness over privation and inequalities in provisioning and conflicts among state organizations At the same time they recognize the considerable role played by the Soviet state in organizing supplies of food to adequately support the military effort and defense production and in developing policies that promoted social stability amid upheaval The book makes a significant contribution to scholarship on the Soviet population s experience of World War II as well as to studies of war and famine **Plutocratic Insurgency Reader** Robert J.

Bunker, 2019-07-23 Plutocratic insurgency represents an emerging form of insurgency not seen since the late 19th century Gilded Age It is being conducted by high net worth globalized elites allowing them to remove themselves from public spaces and obligations including taxation and to maximize their ability to generate profits transnationally It utilizes lawyers lobbyists and corruption rather than armed struggle though mercenaries may be employed to create shadow governance in pursuit of plutocratic policy objectives Ultimately this form of insurgency is representative of the challenge of 21st century predatory and sovereign free capitalism to 20th century state moderated capitalism and its ensuing public welfare programs and middle class social structures It can be viewed as a component of Dark Globalization that along with the emergence of criminal insurgency is now actively threatening the public institutions and citizenry of the Westphalian state form This important and groundbreaking *Small Wars Journal* book is composed of over thirty readings by fifteen contributors The Christian Slaves of Depok Nonja Peters, 2021-07-28 This book recounts the little known history of Cornelis Chastelein a high ranking official of the Dutch East India Company and the 150 200 slaves he purchased from slave markets around South East Asia to work his landed estates in the Batavian Jakarta hinterlands It traces the making and unravelling of his dream to create a self sustaining Christian community of freed slaves in the midst of a Muslim stronghold To this end on his death on 28 June 1714 he freed most of his slaves and bequeathed those who had embraced Christianity his 1244 hectare Depok estate in collective ownership The book isolates behaviours and events that influenced these Depokers lives after Chastelein s death such as endogamy religion war revolution and diaspora Its main characters are the missionaries bent on Depokers Dutchification the Japanese invaders who demand obedience to their Asia for the Asians thinking and the Indonesian Pemuda freedom fighters who insist Depokers throw their weight behind the Independence movement Enslavement made Depokers inbetweeners In the Netherlands they were considered Indonesian and the Dutch to whom they thought they belonged painfully excluded them Following the transfer of sovereignty the Republic of Indonesia confiscated the rice fields of those

that stayed and labelled them Belanda Depok black Hollanders The history of the Depokkers is a tale of survival in the face of adversity that takes in the dying embers of the Netherlands East Indies and the birth of Indonesia The Elgar Companion to Social Economics, Second Edition John B. Davis, Wilfred Dolfsma, 2015-05-29 Social economics is a dynamic and growing field that emphasizes the key roles social values play in the economy and economic life This second edition of the Elgar Companion to Social Economics revises all chapters from the first edition and adds im

Imperial Japan's Allied Prisoners of War in the South Pacific C. Kenneth Quinones, 2021-09-30 Three weeks after Imperial Japan's surrender five men dressed in baggy khaki uniforms stared at the camera They and two colleagues were the only survivors out of the 210 Allied airmen which Imperial Japan had imprisoned in paradise Joining them were 18 British soldiers the only survivors of 600 of their countrymen similarly but separately imprisoned Another 10 000 Allied soldiers and civilians were also imprisoned on the South Pacific island of New Britain More than half died before liberation What motivated such inhumane treatment This book's quest for an answer traces the genesis of Bushido Imperial Japan's martial code and surveys the prisoners' recollections of their ordeal as the Battle for Rabaul raged around them from 1942 to March 1944 **Ford, General Motors, and the Nazis** Scott Nehmer, 2013-09-04 The threat of concentration camps untimely strikes and propaganda influenced Ford and GM's war efforts in the U S and Europe Dealing with both the brutal Nazi regime and Communist attempts to influence American opinion leaders at Ford and GM attempt to balance loyalty to their corporations and homeland **Shelter from the Holocaust** Mark Edele, Sheila Fitzpatrick, Atina Grossmann, 2017-12-04 This pioneering volume will interest scholars of eastern European history and Holocaust studies as well as those with an interest in refugee and migration issues Global Criminal and Sovereign Free Economies and the Demise of the Western Democracies Robert J. Bunker, Pamela Ligouri Bunker, 2014-09-15 Much has been written about the many economic benefits of globalization and the triumph and spread of democratic liberalism with the end of the Cold War following the demise of the Soviet Union This work takes issue with such wine and roses perspectives about the future of the Western democracies and their faith based views on the moral purity of a globalized marketplace It also questions many of the assumptions found in the status quo reinforcing discipline of international political economy IPE a discipline that focuses on the formal and legitimate economies and the fa ade they present that international relations and commerce is still dominated and dictated solely by the old Westphalian state centric system Having highlighted these concerns this book looks at two major themes The first theme focuses on the theoretical perception that a Dark Renaissance is taking place globally one in which the Western liberal democracies and its citizens are ill prepared to respond because it exists at the trans civilization level bridging the modern to the post modern world The second theme focuses on the actual process of state deconstruction that is taking place This process is leading to what may become the very undoing of the democracies Drawing together experts from a variety of backgrounds this work explores the increasing shift away from formal based capitalism and evaluates through case studies how different states are responding to

the challenges they face This work will be of great interest to students and scholars of international political economy

Dark Heritage in Contemporary Japan Jung-Sun Han, 2024-05-13 This book examines civic activism to conserve dark heritage built by the colonial and wartime labor regime in contemporary Japan Introducing and analyzing local organizations and their activities in multiple locations throughout Japan this book looks at the ways in which the Japanese have remembered negotiated and re experienced their wartime past Drawing insights from disciplines including critical heritage studies social movements the history of colonialism imperialism and decolonization the book brings into focus the Japanese civic activism which confronts the legacies of the wartime labor regime operated throughout the colonial empire By tracing the formation of grassroots movements to conserve war related sites throughout Japan it argues that reclaiming places for plural war memories bequeathed by colonial empire has been pivotal in creating public spaces for civic activism attentive to identities and differences in contemporary Japan Delving into the multilayered connections between the memories of imperial wars colonial empire and place based politics in postwar Japan this book will be a valuable resource to students and scholars of colonialism heritage studies and Japanese history

Unknown Enemy Charles Dick, 2025-05-22 Riveting timely and truly revelatory The Organisation Todt is the Nazi era secret that still needs to emerge from the shadows DAMIEN LEWIS author of SAS Brothers in Arms and The Nazi Hunters Charles Dick has done a major service to the history of the Third Reich The Organisation Todt exploited camp prisoners and forced labourers as ruthlessly and murderously as the better known SS but its responsibility has never been properly explored RICHARD OVERY author of Blood and Ruins Discover for the first time the story of the Organisation Todt a hidden and brutal organisation overseen by Hitler at the heart of the Nazi machine Adolf Hitler described the Organisation Todt as the greatest construction organisation of all time It was from this organisation headed by Albert Speer that Hitler enlisted the nation s leading engineers and architects to build his empire of dreams In time it became a key partner to the SS and the Wehrmacht and led to the deaths of millions Unknown Enemy reveals the full extent of the OT and its long arm across Europe and the Reich In wartime its operations relied mainly on Germany s slave labour system the largest exploitation of foreign labour since the end of the Transatlantic Slave Trade Charles Dick takes us inside the OT s vast building projects throughout German occupied Europe from the Arctic circle to the Balkans to tell the story of how engineers and builders so called ordinary men perpetrated some of the gravest war crimes under its banner Despite its extensive network the Organisation Todt largely managed to slip under the radar of war prosecutors after Germany s defeat Drawing on extensive new research first person accounts and survivor testimony Unknown Enemy finally unearths its dark story

Japan on Display Morris Low, 2006-09-27 Sixty years on from the end of the Pacific War Japan on Display examines representations of the Meiji emperor Mutsuhito 1852 1912 and his grandson the Showa emperor Hirohito who was regarded as a symbol of the nation in both war and peacetime Much of this representation was aided by the phenomenon of photography The introduction and development of photography in the nineteenth century coincided with the

need to make Hirohito's grandfather the young Meiji Emperor more visible. Photo books and albums became a popular format for presenting seemingly objective images of the monarch, reminding the Japanese of their proximity to the Emperor and the imperial family. In the twentieth century, these national albums provided a visual record of wars fought in the name of the Emperor while also documenting the reconstruction of Tokyo, scientific expeditions, and imperial tours. Drawing on archival documents, photographs, and sources in both Japanese and English, this book throws new light on the history of twentieth-century Japan and the central role of Hirohito. With Japan's defeat in the Pacific War, the Emperor was transformed from wartime leader to peace-loving scientist. *Japan on Display* seeks to understand this reinvention of a more human Emperor and the role that photography played in the process.

Divorce, American Style Suzanne Kahn, 2021-05-28 This book examines feminist divorce reformers, their relationship with the broader feminist movement, and their lasting effects on the American social welfare regime. It shows how the two distinctive qualities of the American welfare state—its gendered nature and its public-private nature—combined to encourage the breadwinner-homemaker model of marriage's use as a policy tool. The linking of access to economic benefits to marriage began early in the development of the American social insurance system, shaped political identity and activism in the 1970s, and has continued to do so into our current political moment. The result has not only affected policy questions directly relating to marriage but also limited the possibilities for expanding America's social welfare provisions. As a gateway to full economic citizenship, marriage has always served as an institution that protects and perpetuates class privilege.
