Nasser and the Missile Age in the Middle East Owen L. Sirrs,2007-01-24 Egyptian efforts to acquire long range surface to surface missiles in the early 1960s carry important lessons for our time when weapons of mass destruction and charges of politicizing intelligence are key issues This new study traces the history of the early Egyptian ballistic missile program which began with the successful recruitment of German scientists who had experience in Hitler s V1 and V2 missile projects Yet even as these Germans began their work on developing missiles for Egyptian President Gamal Abdel Nasser Israeli intelligence was busy collecting information on their activities sparking a crisis in the Israeli leadership as top Israeli officials anxiously debated strategies to grapple with this new threat to their

national security Ultimately they adopted a multifaceted approach that included intimidation of the scientists and their families appeals to the West German government to order the scientists recall and an attempt to involve the US government in the intricacies of the Arab Israeli conflict Drawing extensively on material from recently declassified US government documents this new major work demonstrates how Nasser s missile program played an instrumental role in cementing the US Israeli national security relationship The book concludes with several key lessons that can help stem the global proliferation of advanced weapons This book will be of great interest to scholars of proliferation international relations the Middle East disarmament and security studies in general *Nuclear India in the Twenty-First Century* D. Bahgat,Anoushiravan Ehteshami,2021-09-23 An authoritative analysis of Iran s defense doctrine and security policies set within the context of security and political relations in the Middle East **Korean Endgame** Selig S. Harrison,2009-02-10 Nearly half a century after the fighting stopped the 1953 Armistice has yet to be replaced with a peace treaty formally ending the Korean War While Russia and China withdrew the last of their forces in 1958 the United States maintains 37 000 troops in South Korea and is pledged to defend it with nuclear weapons In Korean Endgame Selig Harrison mounts the first authoritative challenge to this long standing U S policy Harrison shows why North Korea is not as many policymakers expect about to collapse And he explains why existing U S policies hamper North South reconciliation and reunification Assessing

North Korean capabilities and the motivations that have led to its forward deployments he spells out the arms control concessions by North Korea South Korea and the United States necessary to ease the dangers of confrontation centering on reciprocal U S force redeployments and U S withdrawals in return for North Korean pullbacks from the thirty eighth parallel Similarly he proposes specific trade offs to forestall the North s development of nuclear weapons and missile delivery systems calling for the withdrawal of the U S nuclear umbrella in conjunction with agreements to denuclearize Korea embracing China Russia and Japan The long term goal of U S policy he argues should be the full disengagement of U S combat forces from Korea as part of regional agreements insulating the peninsula from all foreign conventional and nuclear forces A veteran journalist with decades of extensive firsthand knowledge of North Korea and long standing contacts with leaders in Washington Seoul and Pyongyang Harrison is perfectly placed to make these arguments Throughout he supports his analysis with revealing accounts of conversations with North Korean South Korean and U S leaders over thirty five years Combining probing scholarship with a seasoned reporter s on the ground experience and insights he has given us the definitive book on U S policy in Korea past present and future

Preventing Chemical Weapons Michael Crowley, Malcolm Dando, Lijun Shang, 2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and

combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all

The Unspoken Alliance Sasha Polakow-Suransky,2011-06-14 Prior to the Six Day War Israel was a darling of the international left vocally opposed to apartheid and devoted to building alliances with black leaders in newly independent African nations South Africa for its part was controlled by a regime of Afrikaner nationalists who had enthusiastically supported Hitler during World War II But after Israel s occupation of Palestinian territories in 1967 the country found itself estranged from former allies and threatened anew by old enemies As both states became international pariahs a covert and lucrative military relationship blossomed between these seemingly unlikely allies Based on extensive archival research and exclusive interviews with former generals and high level government officials in both countries The

Unspoken Alliance tells a troubling story of Cold War paranoia moral compromises and startling secrets
