International Management Jonathan P. Doh,Fred Luthans,2023 The global business environment in recent years has been characterized by substantial and often unforeseen change By some accounts the degree of uncertainty and volatility in global political and economic affairs has increased as several long term trends have come to a halt or in some cases reversed Political conflicts economic disruptions and realignment of security arrangements have all created challenges for global business Around the world support for global economic integration and engagement appears to be on the decline The vote by the United Kingdom to separate from the European Union and the withdrawal of the United States from the Trans Pacific Partnership a proposed trade agreement among 12 Pacific facing nations are two stark examples of this broad trend Some see the United States as retreating from its long held position as the leading advocate of trade and economic interdependence Further trade tensions have risen not just between the U S and China two world powers jockeying for global leadership but also between the U S and its key allies such as the European Union and Canada Concurrently nationalist sentiments in the United States Europe Asia and elsewhere have resulted in raised barriers to both legal and illegal immigration Exacerbating these pressures longstanding concerns about the uneven impacts of globalization on jobs wages and incomes have resurfaced as have broader questions about the costs of economic globalization to both developed and developing countries and their citizens

Imperial Formations Subhabrata Bobby Banerjee, Vanessa C. M. Chio, Raza Mir, 2009-01-01 This edited collection is an extraordinarily welcome text for those of us teaching international management in the US while observing with dismay the lack of critical awareness about the rest of the world in extant disciplinary scholarship Rather than giving us the view from the rest the collection advances a temporal and spatial relational approach to understanding globalization and compels its audience to bridge the gap between the west and the rest by bringing to visibility the cultural and material encounters co constructing them In this context the various contributions deconstruct international management as market based activity exposing its mode of existence within complex power relations networks extending over time and space Marta B Cal s University of Massachusetts US Organizations Markets and Imperial Formations offers a set of innovative critiques of contemporary economic globalization A major theme of the book is that our imperialist histories have resulted in a globalization process that replicates exploitative colonialist patterns Chapter authors provide insights on a variety of subjects including a critique of mainstream international management textbooks and the simplistic toolkits they offer to managers an analysis of how a universalistic view of capitalism and economic organization results in exploitative patterns of resource appropriation and documentation of the negative consequences of globalization specifically patterns of inequality and class segregation Alison M Konrad University of Western Ontario Canada This authoritative book explores the nexus between organization theory globalization and imperialism and examines the effects of a global order organized around development and markets The authors explore how interconnections between organization theory and the global political economy have led to the perpetuation of inequality and active reconfigurations of life labour and the economy They contend that cultural ethnocentrism and Western ideologies of development continue to inform the field of organizational studies and offer an alternate mode of theorizing Through theoretical and empirical reflections the authors produce a patchwork quilt of innovatively critical approaches to globalization Graduate students academics and scholars in the fields of management and organizational sciences as well as postcolonial development and globalization studies will find this book of particular interest It is also an invaluable read for international management and strategy scholars including those focused on multinational operations in the Third World
